Thread: [\[Preview\] Decay Logger Public Version 2.0 \[Feedback\]](#)

Impurity - May 2, 2011, 8:27 am

Hey everyone. So I don't have internet today, so I figured I should start working on Decay Logger Public Version 2.0! I'm not adding in any special features, what you see is what you get. It will be CodeDom (learning experience). So tell me what you think of how it looks! Of course it will be FUD when released and reFUD'd when I can. Thanks, and all feedback is welcome.

Spoiler [\(Click to View\)](#)

Walter White - May 2, 2011, 9:56 am

Looks really nice! Looking forward to using it.

The Stig - May 2, 2011, 9:57 am

Awesome man ! I really like it.

trojanspy - May 2, 2011, 11:16 am

yea nice man keep use to give peoples public version ?

Cerebro - May 2, 2011, 11:17 am

This looks amazing, nice layout and an extensive feature range. However is there anything you can do to emphasize the titles?

!Root - May 2, 2011, 11:38 am

Looking forward for the release, I loved your last version! :) Nice work!

hav0c1995 - May 2, 2011, 1:30 pm

Vouch for this guy. Your keylogger is awesome. I like the functions. And At Last you added a fake error message. So, Impurity when are you going to release it? And What features will have the paid version?

Viti - May 2, 2011, 1:37 pm

Looking forwards to it being released.

-DownFall - May 2, 2011, 1:46 pm

Looks amazing, way better GUI then the last one. Plus it will be FUD....looking forward to it.

Fake. - May 2, 2011, 2:02 pm

Hmm, make the log interval a numericupdown?

halimaw15 - May 2, 2011, 2:47 pm

its really nice..!!more features..

looking forward to it..

Impurity - May 2, 2011, 5:37 pm

(May 2, 2011 02:02 PM)Fake™ Wrote: [\[CITE\]](#) Hmm, make the log interval a numericupdown?

I was debating that. I think I'm going to make it a combobox instead, with preset intervals, but of course allowing you to set your own. Numeric Up Down's annoy me >.<

.Astro - May 2, 2011, 5:37 pm

It looks all scrunched up together. Maybe space it out more?
You should also make the "What is This?" button a bit longer.

Kom - May 2, 2011, 5:44 pm

Love it, but as said, make it a numeric up down lol

ch4x0r - May 2, 2011, 5:45 pm

I think it looks great impurity i like the gui and all , i just wished it took screen shots!!!

Impurity - May 2, 2011, 6:07 pm

I might add screen shots into the paid version. Undecided yet.

-DownFall - May 2, 2011, 6:08 pm

(May 2, 2011 06:07 PM)Impurity Wrote: [\[CITE\]](#) I might add screen shots into the paid version.
Undecided yet.

Never knew there was a paid version available...Would be nice to see the GUI and features of it.

Impurity - May 2, 2011, 6:33 pm

Paid version isn't out yet! It will be soon.

Fake. - May 3, 2011, 12:17 am

(May 2, 2011 05:37 PM)Impurity Wrote: [\[CITE\]](#) I was debating that. I think I'm going to make it a combobox instead, with preset intervals, but of course allowing you to set your own. Numeric Up Down's annoy me >.<

I don't see why. You can change the increment, min and max values of them, so I don't understand how they're annoying o.O

KeGeX - May 3, 2011, 1:10 am

nice, but i'm sure its not support russian letters^^

agentmax69 - May 3, 2011, 4:18 am

cool so many option :D and how about the screen logger option ?

bahabaha - May 3, 2011, 11:55 am

it only lack stealers option !

trojanspy - May 4, 2011, 6:45 am

go and fuck u die with you new loggger ?

Impurity - May 4, 2011, 7:29 am

(May 4, 2011 06:45 AM)trojanspy Wrote: [\[CITE\]](#) go and fuck u die with you new loggger ?

You know, I saw that you posted and couldn't help but smile. Thank you, I can now make you look like a complete idiot.

I'm assuming you do not have a firm (or any) grasp of the English language, which is why you put "u" instead of "you". Honestly it makes you look illiterate. I mean, I wouldn't use something "u" programmed for that reason. Secondly, you're obviously extremley anally hurt. I'm sorry. But here:

Spoiler [\(Click to View\)](#)

[img]http://imagemacros.files.wordpress.com/2009/09/butthurt_report_form.jpg[/img]

Go ahead and PM me that, once you've filled it out. I know I know...you have to "really work" on that

"superawesomeprosauce" logger of yours. But, take a break, I'm sure your Ctrl+C and Ctrl+V are tired. Its okay, no one is holding their breath for it.

Your insult was not only epicly retarded, but made no sense. I'm going to disregard the failed attempt of looking like a "superl33tbadass" by you and pretend it never happened.

Mortalis Piratica - May 4, 2011, 8:23 am

You should make those button colour to white and if you need help, i am here to help you.

Impurity - May 4, 2011, 9:52 am

I'm not sure what you mean? What part of the buttons...the text?

Belgio - May 4, 2011, 2:25 pm

Looks epic man ;) Love it

-DownFall - May 4, 2011, 2:36 pm

(May 4, 2011 07:29 AM)Impurity Wrote: [\[CITE\]](#) I know I know...you have to "really work" on that "superawesomeprosauce" logger of yours. But, take a break, I'm sure your Ctrl+C and Ctrl+V are tired. Its okay, no one is holding their breath for it.

^^

I laughed my ass off. That is called owned. I also noticed a few posts above, someone asked about a screen capture. Will that be implemented?

Impurity - May 4, 2011, 2:59 pm

I'm unsure. Probably not in the free version. Paid will have it.

x3mendo - May 4, 2011, 4:37 pm

Congratulation first of all for your nice Keylogger full of many app. I'm wondering if is this software been tested under any Antivirus ... I'm sure you did already I just double check :)

in advance thanks and best regards

Impurity - May 4, 2011, 4:52 pm

(May 4, 2011 04:37 PM)x3mendo Wrote: [\[CITE\]](#) Congratulation first of all for your nice Keylogger full of many app. I'm wondering if is this software been tested under any Antivirus ... I'm sure you did already I just double check :)

If you're asking if it will be FUD for initial release, then yes, it will be.

ch4x0r - May 4, 2011, 8:10 pm

Looks good impurity be glad to try it out when released, im also like a few of the other's would love to see the screen shot capture option,but i understand you got too save some of the goody's for the paid version! Also good luck with all your sales bro.

Mortalis Piratica - May 5, 2011, 3:10 am

(May 4, 2011 09:52 AM)Impurity Wrote: [\[CITE\]](#) I'm not sure what you mean? What part of the buttons...the text?

Yes exactly the text, Sorry though.

jeave - May 5, 2011, 7:18 am

Give:Buy Paid,Donate,Support,Credits in a different section
Not all in one,because its not very clear in my opinion

Red Sub - May 5, 2011, 7:42 am

looks awesome, are you adding stealers to it?

Defil3d ko3d - May 5, 2011, 9:01 am

Awesome, should add a screenshot taking feature too :)

rapidguide - May 5, 2011, 11:35 pm

Looks AmazingBro

Good Job

Gui Rocks < Credits To Aeon hack ^^ we love him :)

AoEMonk - May 6, 2011, 12:48 am

Can't wait for the new version! Good luck! :)

Gangstar - May 6, 2011, 6:52 am

wow nice GUI can you add some stealers?

Death by Stereo - May 6, 2011, 7:32 am

O.O looks awesome!

keep it up ^^

SilverGlory - May 6, 2011, 3:19 pm

is the download available yet? and is there a certain .net framework that is required for it to work or is it only 3.5 or something?

Impurity - May 6, 2011, 3:22 pm

No, it is nowhere near being done yet. It will require 2.0 for both building and spreading (the virus).

Zanerdie - May 6, 2011, 9:16 pm

This gui is so sexy. great job bud

ewjeiweoerrwerr - May 7, 2011, 8:35 am

hey there this is not very good fails big time

Impurity - May 7, 2011, 8:40 am

(May 7, 2011 08:35 AM)ewjeiweoerrwerr Wrote: [\[CITE\]](#) hey there this is not very good fails big time
Sorry, I don't speak idiot. Try typing with some form of intelligence. I'm assuming "fails" is "fails" in the world of intelligence. In that case, can you please show me your CodeDom keylogger? Please?
I'm dying to see it.

loli221 - May 7, 2011, 9:35 am

Looks great and many features :) Cant wait for Release :)

Pr0N00B - May 7, 2011, 11:03 am

Looks Awesome Cant Wait To Use it :D

RussianFederation - May 7, 2011, 11:14 am

Looks good. Nice job ;0 ;0

VORKYHD - May 7, 2011, 9:09 pm

Worked great for the time I used it, Never really spread it though.

SilverGlory - May 9, 2011, 2:42 pm

can you make it work off of 2.5 i believe that is the newest so your keylogger will only work for about 1/3 of the people who download...

Impurity - May 9, 2011, 5:43 pm

It will work on .Net Framework 2.0 and up. Aka, 90% of the population.

nouman80 - May 9, 2011, 7:15 pm

Uhm when i saw the gui my penis erected a little.

Looks great man cant wait for it to come out !

SilverGlory - July 23, 2011, 8:49 am

Release date for public version 2.0?

Jeppe K - July 23, 2011, 12:36 pm

i need a cure... + the last version checkip.dydns or something didnt work. im getting an error from it on startup its annoying

Impurity - July 23, 2011, 12:46 pm

I made a few changes to the GUI thanks to Bannedshit. You can find an updated one on the thread as well as this post. I am about 95% completed. Just a few minor things to attend to.

Spoiler ([Click to View](#))

MirrorDude - July 23, 2011, 1:12 pm

Spoiler ([Click to View](#))

The heading's just like Concealed logger, just with Changed Text & Color...

Impurity - July 23, 2011, 1:17 pm

Never seen Concealed logger so I wouldn't know.

Kom - July 23, 2011, 1:46 pm

Most likely because they got the graphics from the same person, I had brought that up before but meh >.> still looks fine. I don't see what the logo has to do with the logger working great anyway ;) Would rather have a shitty gui / look but amazing logger than an amazing gui and shitty logger ;) =p

Network. - July 23, 2011, 3:25 pm

Awesome.. loooks like. Looking forward to this.

SilverGlory - July 23, 2011, 7:12 pm

When do you expected the payed version out and what would the price be around, I'm thinking of maybe purchasing the paid version

TheR3mA - July 24, 2011, 11:53 am

When will public and when will privite version be realised?I may buy this...:D

SilverGlory - July 24, 2011, 12:13 pm

Yes a release date would be wonderful... I really need to get a hold of that public version soon

Kom - July 24, 2011, 12:53 pm

Should be out soon, Just finishing things up =)

Patience is key.

Thegame - July 24, 2011, 1:03 pm

Previous one was shit all the way so no big surprises i should expect from this one ?

Wise Owl - July 24, 2011, 2:59 pm

Cannot Wait for the download Link Bro nice Work on the Gui's i love it nice make keep it up! Pm the keylogger when out Cheers

inpure - August 31, 2011, 3:18 pm

Is the free version out?

ive been waiting for ever for this

Impurity - August 31, 2011, 4:53 pm

This will be out by Sunday. Keep your eyes peeled.

ekkamina420 - August 31, 2011, 10:54 pm

i want this keylogger gove me diretc link surveys arent available for my country
plz

ur reputes person help me

ChaseGZ - March 7, 2012, 1:12 am

Hey do you have any idea when this will be out?

DarkVergilDante - March 7, 2012, 3:51 am

looks great! if it has a free version i will definitely try it :)

Impurity - April 2, 2012, 7:12 pm

Finally released [here](#). Thanks for all the suggestions!
