Thread: [Free hosting sites for istealer](#)

Jinu - May 2, 2011, 11:07 am

I had been use 0fees.net for hosting my istealer logs.

However, now they disabled php So, please suggest some free hosting sites that should allow istealer,email bomber.

Regards,

I can't be able to get SPAM because they still verify my account since one year LOL

So please suggest some other site.

byethost Doesn't allow PhP.

Don't put the stealer in root directory on SPAM.

Put a plain HTML homepage with a layout, and they won't suspect anything.

I did that when I used iStealer, still not banned.
