Nice TuT man..

This is the most HQ tut on HF..

Keep up the good work

Lol, at least it's explained well.

Honestly, though, I haven't touched the DDoSer login I got for a while now. You realize there's a lot better options (not trashing anyone who's selling, it's still not bad).

Actually, I might sell it...

Why you said that? There are many people who need a good tutorial. We are not quite as good as you.

How to buy a program..?

Only a total imbecile wouldn't know how to do this,anyhow if you thought this was necessary this brings the forums a worse reputation.

Anyhow,thanks for your time and effort that you have put into this tutorial for 12 year olds.
