Hello Hackforums!

Well I decided to make a simple Hackforum Avatar.

This is for members that don't have an avatar and would like to use one.

Here is a preview:

The "Hackforums.net" text is difficult to read. Consider removing the shadow from it.

I like it I was only just looking at the avatars a minute ago well done.

Badass Bro, PM me. Got a few things to ask.

Brock Obama - May 5, 2011, 2:13 pm

This is nice, good job! :)

I find it very Glow like, you may want to reduce a lot of it. And the gradient is a bit too much for me, might want to change it a little, play about with a bigger variety of colours

Great avatar, really looks Great. Fuck if i could make those, i would have been a lucky ass.

Stenography - May 7, 2011, 7:23 am

loved it.

But hackforums.net as said, difficult to read.

Kill4joy KJ-Vulcan Tools - May 7, 2011, 7:27 am

I would get rid of the hackforums.net gradient.
