Thread: [Gmail id's](#)

kitesurfer2010 - May 5, 2011, 1:34 pm

Making new gmail id without using a telephone :-)

1. <http://k7.net/>. and sign up there.

This is a site where you can receive fax or voice calls without having a phone no. When you create an account on this site, it will provide you an unique phone no. of US.

2. Now go for creating account on gmail, enter all the information as you want, but in Location fill 'United States'.

3. click on 'I accept, create an account'.

4. it will take you to mobile verification page. Here select the option of Voice call and fill the no. that you got from k7.net.

5. You will get a mail having verification code as voice mail on that account from which you have registered on K7.net. Open it, download the attachment file and listen the code.

6. Enter the code of your voice mail in verification code. and click OK.

7. After making a new e-mail write it down with txt.

8 close gmail en make an new one.

9 only this time you can couple your new mail adress on your newer e-mail adress.

10. No fax number needed.

11. voila je have gmail adres number 2 :-)

12. You can do this several times.

13. Also you can use the fax site for this one.

This is nice for use with the next gen e-mail nukers :-)
