Very interesting!!!! Do you know if 3d effect remains when printed????

RandyCandy - May 6, 2011, 3:45 am

LOL, i wouldnt know never printed it out before, hmm that's a very good question actually, maybe it depends on the ink and printer? Not sure

creator is still sitting with his 3d glasses on and his pants around his ankles fapping like a champ.

and this is not how to make a 3d image, it is how to assemble a 3d image using pictures you have taken with a stereoscopic camera rig. (if you dont have one then this is useless)
