Thread: [Crypter Owners, Shut The Fuck Up.](#)

C.o3ing - May 8, 2011, 3:49 am

Anybody can take a public Source, For example a VB6 Source,

- Change the Stub's Icon.
- Change the Stub's Assembly.
- Encrypt the Stubs Strings.
- Change the Stubs Strings.

;) and there you go a FuD crypter... and plus ... YOU'VE MADE IT!

So shut the F*** up, Crypter Owners.

Your customer's will "out-grow cybergate" little fucking kids.

Virus1x - May 8, 2011, 3:51 am

I'm confused all I hear here is EPIC RAGE.

Saddy there are a few crypters here on HF that were built from scratch using only snippets of code from others and some feature coded directly from scratch as well as the shitty ones..

C.o3ing - May 8, 2011, 3:55 am

Its not really Epic Rage,

Just trying to start a debate.

To get crypter owner's to shut the hell up.

Not everyone on hackforums has the mind of a 12 year old and above.
