This list has about 102 working shells that have been checked with

<http://shellchecker.devilscript.com/>

I got some from my friend, I Googled for some and some are probably being used right now. I just wanted to give back to the community and this is the only way I can right now!

? Out!

? me a PM if you have any questions. Again, my friend gave me about 70% of these and the other ones are found on google from the past 3 days.

EDIT: If people want to be retards and re-post, do it. I don't care for these shells and they are yours. Anything you do with them is up to you but I am not liable for anything that happens to you/others or anything.

I don't PM anyone. I will post a new thread with more shells or an updated list once I get them.

Portland Timbers - *May 21, 2011, 2:31 pm*

I deleted some and added some new ones in the list. I have the same amount of shells but will add more once I scan these new ones I got.
