Introduction

There are an infinite amount of people in the world. Everyone is different. There are no duplicates. The same can be said in the world of hackers. Not all hackers are the same, and a lot of hackers have different views on "Hacking", but it is not the fact that we are all identical that makes us one entity; it is the big idea. See, what makes us hackers is the desire to learn, the urge to tweak any object we encounter, we want control, we don't want to be controlled, we want to be anonymous, and we are intellectually years ahead of others; I would go on on this list if boredom didn't exist. So, how do you know if you have the "Hacker Mindset"?

[Read this document](#). It is titled "The Hacker Manifesto".

[img]http://www.catb.org/~esr/faqs/glider.png[/img]

Respect

One of my favorite things about the hacker community is how open it is to anyone. Quoted from the Hacker Manifesto "We exist without skin color, without nationality, without religious bias" In your days of being a hacker you will make friends from more than one country, you will meet someone that is a different religion than you, and you will encounter numerous people with a different mindset than you; but it doesn't matter. You, as well as them, will be accepted as long as you follow the basic guidelines.

But, you don't come into the hacker community as the best. Do not expect to be treated as a god when it is your first day. It takes work to earn the respect of a great hacker (i.e. Dennis Ritchie, Ken

Thompson, Kevin Mitnick, or Phiber Optik). There are three main categories of hackers, and they are:

Script-Kiddies: These are the people who use other people's tools and documents/resources available online. Script-kiddies usually have no idea what is going on 'behind the scenes', they just run their programs because they know that they work. These hackers usually have minimal skill level, but take up a large portion of the hacker community.

Intermediate Hackers: These are the halfway hackers. Intermediate hackers know quite a bit more than script-kiddies, and are decent enough to get by by themselves. They know about computers and networks, and use well-known exploits. A lot of halfway hackers want to be masters, and with the appropriate amount of work and dedication, they can be.

Elite Hackers: These are the skilled hacking experts. Elite hackers code many of the programs the script-kiddies use, and develop exploits that intermediate hackers use. They can hack into almost any system, and cover their tracks, and sometimes, even make it look like someone else did it. They are often very secretive and only share their information with "subordinates" when they are deemed worthy. Elite hackers are very few in numbers, which is good for security companies.

There are many things that you have to learn to reach that glorious "Elite Hacker" status. Every hacker must make their own path, but in this tutorial I will attempt to help you achieve this goal to my greatest ability.

So, what can you do to up your status a little bit? Well there are plenty of things:

Write useful software

Help debug other peoples programs

Publish useful information

Server other hackers

One word that I used more than once on that list was "useful". That is what will earn you some status in the hacker culture; being useful. Don't just be there, be there and do something.

What to Learn

There are so many things that you need to learn in order to be a successful hacker, it is almost overwhelming. But I will try to sum this up for you:

Security (PC & Network)

Website Hacking (SQLi/XSS/etc.)

The Jargon (Slang)

Social Engineering (Human Hacking)

Encryption

WiFi Hacking

Linux/Unix

Programming (Any language)

There are things that can and should be added to that list, and it is by no means in order. This is not a tutorial on how to do each and every one of the things on this list, but it is here to point you in the right direction.

If I were to tell you where to start-- assuming that you have very little experience-- I would tell you to learn html. This is not meant to be your main programming language (unless you get unbelievably good at it), but it is a great starting point. Html will help you understand a lot of the problems that you will encounter online, and if there is ever a point where you would like to make a website, it would help you there too.

If I were to tell you where to go from there, I would tell you to learn a minimal amount of batch coding. This field is very much meant for beginners, and most hackers start out just trying to learn more about it (which then develops in to much more useful skills). Batch is just Command Prompt and Notepad. Watch some tutorials on YouTube, or look at the Batch ,Shell, Dos and Command Line Interpreters section (<https://hackforums.net/forumdisplay.php?fid=49>). Learning this won't make you an Elite Hacker, but it will get you used to two things:

Basic Programming

Basic Command Line

Programming will help you all around, but the command line is mostly for Linux. If you don't already know, Linux is an operating system. Linux is evolved from the Unix Operating system, which was developed in 1969-- That's 12 years before windows! Linux was released in 1991 by Linus Torvalds. Linux actually stands for "Linux is not Unix". Now, if you are still reading after that boring history lesson, then that means you are showing a great virtue that every hacker needs.... Patience. I would advise you to head on down to <http://www.ubuntu.com/download> and pick up your own version of Linux. NOTE: Linux will run side by side with windows, you can have two operating systems on one machine.

Social Engineering is another thing that is vital for you to become a successful hacker. Social Engineering is the art of human hacking, and is often abbreviated at SE. It will do countless things for you in your career. See, flaws in a computer network get patched, but human flaws will never diminish. Kevin Mitnick was said to be one of the greatest social engineers ever. Kevin could convince anyone that he was someone else-- whether it be on the phone, or emailing, he was perfect at getting his way. The great thing about social engineering is that you can use it in everyday life, wherever you go. Out of all the skills that you could learn to be a great hacker, this may be one of the most important.

Style

Hackers can't always be at the computer, and although there is no real substitute for hacking, there are plenty of things that you can do to that can do to feel somewhat connected to the art of hacking.

Learn to write well: Hackers aren't like the media makes it seem where you only are allowed to talk in numbers. Most great hackers have near-perfect grammar and spelling. It will also help people understand you better (this is especially useful if English isn't your main language. And I know by experience that it will earn you some more respect as well.

Watch Star Trek: It's just a great movie. There are all of the T.V. episodes too, but the movie was awesome.

Mystery books are a good thing: A lot of hackers will tell you to read sci-fi, but mystery books make you think. Thinking is good.

Nerd? Don't worry about it: As mentioned earlier, real hackers don't care if you are a nerd. We exist without a bias, and most people follow that golden rule. Anyone who doesn't isn't a real hacker.

Meditate: It may seem weird if you have never done it before, but meditation will make you a ridiculously better person. If I was to recommend you a guide for mediation, it would be http://www.amazon.com/Minute-Meditation-Quiet-Mind-Change/dp/0399529950/ref=sr_1_1?ie=UTF8&qid=1305075689&sr=8-1

Have an ear for music: Learn to appreciate more than one style of music. Most hackers prefer either rap, or techno (dubstep) and some develop a love for both. The ability to enjoy any music though, is a great trait.

Be a genius: I always strive to be a genius, no matter how much of a stretch it may be. It keeps your mind active, and it will make you, obviously, smarter. Being a genius will make it infinitely easier to learn about hacking, and it will make you much more aware of everything going on around you.

If there is one thing that you shouldn't do however, is use silly/immature screen names. How respected do you think you will be if your name is "I_Rape_Yung_P00dles"? You won't ever be taken seriously like that, and it makes you look like a waste of time. Another thing that you should avoid doing is flaming. I am not saying that you should be a brownnoser to everyone that you meet, but avoiding conflicts, and a decent amount of respect for the people who deserve it will make you a well liked hacker.

Further Resources

<http://www.catb.org/~esr/faqs/hacker-howto.html> This is the document that I read that got me started hacking. It is a great starting point.

<http://www.google.com/> This website is very secret, and not many people know about it. It will answer any question that you will have on your journey.

<http://whatishacking.org/> Is a small site with the purpose of showing the world hacking isn't bad. It has a couple of the same resources listed here.

<http://www.mithral.com/~beberg/manifesto.html> The hacker manifesto. This was listed in the document as well.

<http://www.social-engineer.org/> Social Engineering hub

<http://www.amazon.com/Social-Engineering-Art-Human-Hacking/dp/0470639539> A great Social Engineering book

This guide was made entirely by [Eminent](#). If you see this posted by anyone else, please notify me. If any of the links are ever faulty, please post in this thread, and I will fix it as soon as possible. If you have any requests for a guide then contact me and there is a great chance that I will do that for you, if not, then I will reference you to a guide that I know is better than one that I could write. Anyone who needs help further than this then I will gladly assist you (Note: I will not help you if you have not read this thread. I will not help you if you have not tried everything in this thread first).

Drum and Bass - May 11, 2011, 5:20 pm

Funny, but good guide! Keep it up.

Eminent - May 11, 2011, 5:21 pm

Thanks a lot man, if anyone has anything that they think I should add, feel free to suggest it

Cyber-Security - May 11, 2011, 5:28 pm

Nice Guide Eminent!

Keep it up! This will help starters FOR SURE!!!

Eminent - May 11, 2011, 5:36 pm

(May 11, 2011 05:28 PM)Cyber-Security Wrote: [\[CITE\]](#) Nice Guide Eminent!

Keep it up! This will help starters FOR SURE!!!

I'm glad that it's serving its purpose ?

Kronesin - May 11, 2011, 5:47 pm

I found this thread to be a great read, good job OP. This should help out a lot of new people that are trying to learn, your thread is more of a history lesson I think but it is also a idea of where to start so cheers to you bro.

phybe? - May 11, 2011, 5:59 pm

Glad to see you finally released this after I got a sneak preview ;)

Great work! Your hard work and dedication proved true in this beautifully written thread :)

Lockdown - May 11, 2011, 6:20 pm

Excellent guide. :) Keep up the great work.

Eminent - May 11, 2011, 7:14 pm

HaxMuch - May 12, 2011, 5:39 pm

Where is the part about pulling all-nighters, redbull, black shades and long, black leather trench coats?

phybe? - May 12, 2011, 5:44 pm

(May 12, 2011 05:39 PM)HaxMuch Wrote: [\[CITE\]](#) Where is the part about pulling all-nighters, redbull, black shades and long, black leather trench coats?

Right here: <http://afterride.files.wordpress.com/2011/04/matrix-reloaded.jpg>

:D

Eminent - May 12, 2011, 7:18 pm

(May 12, 2011 05:39 PM)HaxMuch Wrote: [\[CITE\]](#) Where is the part about pulling all-nighters, redbull, black shades and long, black leather trench coats?

I actually hate redbulls. I prefer a monster, Amp, or Sobe No Fear

HaxMuch - May 12, 2011, 9:00 pm

(May 12, 2011 05:44 PM)phybe? Wrote: [\[CITE\]](#) Right here:

<http://afterride.files.wordpress.com/2011/04/matrix-reloaded.jpg>

:D

I SEE NO REDBULL. NICE TRY.

@Eminent, same. I find it has a pretty rank after-taste :P I go for the cheapo 6 for £1.50 cans instead, more death causing poison for your money.

GNU's not Unix - May 12, 2011, 11:01 pm

Hey, great tut!

I'd just like to interject on one point, however. What you're referring to as Linux, is, in fact,

GNU/Linux. Linux is not an operating system, it's just the kernel used in the GNU/Linux operating system. The Linux kernel is used in other operating systems, such as Android OS. So it's important to distinguish GNU/Linux from Linux. GNU stands for GNU's not Unix, a recursive acronym. The GNU project was started in 1985 by Richard Stallman.

Developer - May 12, 2011, 11:33 pm

I was the one that brought attention that book on here...

TheNeutron - May 13, 2011, 1:02 am

Nice guide....This will help a lot to the beginners.

(REATOR - May 13, 2011, 4:00 am

a really nice introduction to the world of hacking.

Jedi Mind Tricks - May 13, 2011, 4:45 am

Good tut dude. You might wanna add some colors to make it look more appealing. Keep up the good work.

Eminent - May 13, 2011, 3:34 pm

(May 12, 2011 11:33 PM)TheUnknown01 Wrote: [\[CITE\]](#) I was the one that brought attention that book on here...

Which book? I actually think that I might have first gotten the Social Engineering one from you.

<http://www.catb.org/~esr/fags/hacker-howto.html> This is the document that I read that got me started hacking. It is a great starting point.

I'm very happy you included this link because I was about to flip shit over the fact that your guide is pretty much a less verbose version of this with some minor changes. I mean, you even used the same math puzzle image haha.

(May 12, 2011 07:18 PM)Eminent Wrote: [\[CITE\]](#) I actually hate redbulls. I prefer a monster, Amp, or Sobe No Fear

You know what the most important ingredient in any of those products is?

Caffeine.

Drink coffee, noob :P

sams1764 - May 15, 2011, 1:33 am

At the part where you said about the levels of the hacker. You should add to the script-kiddies section that they never make any tutorials (and if they did it would most likely be a bad tutorial or it's leeches without giving credit). They just make an account at forums like here to just download hack tools and that's it. Also, for Intermediate Hackers and Elite Hackers, they usually code their programs with VB6 and/or C++. Lastly, where you said about Intermediate hackers also are good at hacking websites using exploits coded from Elite Hackers, there are Intermediate Hackers out there who would prefer hacking a victim's computer to mess around with rather than hacking a website (defacing). But, overall it's a good guide.?

Whiskey - May 15, 2011, 3:26 am

Very nice guide with a lot of links!

5 stars and I will be +repping you when I can.

PM me to remind me if I don't

Eminent - May 15, 2011, 8:13 am

(May 15, 2011 01:15 AM)caffeine++ Wrote: [\[CITE\]](#) I'm very happy you included this link because I was about to flip shit over the fact that your guide is pretty much a less verbose version of this with some minor changes. I mean, you even used the same math puzzle image haha.

Drink coffee, noob :P

The image is the hacker symbol, that site was not the first one to use it. Also, when I first read that guide, it inspired me to start, but a lot of the things mentioned in it I had no clue what they meant. This guide is designed to get across the same message but be completely understandable by someone with less computer experience.

I also don't like coffee either.

badwolf - May 16, 2011, 1:29 am

thanks a lot on this info.

it helps a lot specially for a dumb beginner like me. :D

Eminent - May 21, 2011, 4:38 pm

(May 16, 2011 01:29 AM)badwolf Wrote: [\[CITE\]](#) thanks a lot on this info.

No problem man, hope it helped.

AkumaKizuato - June 3, 2011, 6:59 pm

the hacker manifesto's words was the exact thought process that made me want to become a hacker, which wasn't all too long ago.

the only thing I don't agree with the manifesto about is the whole apathetic process.

I am apathetic, but only with things that don't matter to me, I.E., I'm apathetic in school because it doesn't matter to me, I have better things to do, and my knowledge of things surpasses what school can teach me (I'm not saying I know more than my teachers, but what I have learned makes school now obsolete.)

but the whole governmental system and the manifestos look on it, I wholeheartedly agree with, and

is why i am already a black-hat.

and believe me, all my hacking knowledge will be put to the same use, gaining profit and infamy through black-hat trickery, gaining more knowledge as i hack, and evolving into the greatest hacker i could ever possibly be, all while covering my tracks with the stealth of a rogue.

which is why my alias is N4R4ZUM0N0.

Kaiki - June 3, 2011, 8:34 pm

Great guide :D this really helped

seskanda - June 3, 2011, 10:07 pm

Well, well, what have we here! Intermediate hackers, i did not know of them before

zer0pwn - June 3, 2011, 10:31 pm

Not bad. You deserve the rating of this thread, Gratz.

Rick maahea - June 4, 2011, 1:36 am

You know I read this document before I joined HF back when I first realized hacking was what I wanted to do, and it really changed alot of things about me. Thank you.

xPlayer - June 4, 2011, 7:05 am

Very nice Guide!! Keep up the good work

Eminent - June 5, 2011, 4:57 pm

zenawenliang - June 9, 2011, 11:15 pm

I want to learn how to Crack programs by reverse engineering, anyone got any websites that provide tutorials legally, like how the website hackthissite.org

Eminent - June 10, 2011, 8:44 am

(Jun 9, 2011 11:15 PM)zenawenliang Wrote: [\[CITE\]](#) I want to learn how to Crack programs by reverse engineering, anyone got any websites that provide tutorials legally, like how the website hackthissite.org

To learn reverse engineering you need to understand a couple programming languages, such as C++. As far as I know, hackthissite is one of its kind, so you probably won't find one on reverse engineering. But if you look around the internet, you will be able to find some guides on it.

Turkey Dunce - June 10, 2011, 9:28 am

great read, good job OP :P

Professor X - June 10, 2011, 9:43 am

-goes to Blockbuster to get Star Trek-

FakeBlock - June 10, 2011, 1:30 pm

Hello,

Thats a nice guide !

and it kinda helped me ;) I want to be a hacker ! Now i know what HACKING means, i thought that hackers are "bad guys" but actually is hacking ART.

h0x - June 10, 2011, 3:10 pm

Sweet topic, i shall read this like the bible. MWAHAHA!

hameex123 - June 10, 2011, 3:28 pm

I really liked this one but cant we learn hacking? :)

Seblin91 - June 11, 2011, 11:16 am

Thanks. Great guide! this will get me going ;)

Nokysson - June 11, 2011, 5:19 pm

This was awesome!! really helped me alot! Thx keep it up bro!

Eruditus - June 11, 2011, 5:42 pm

Actually one of the most HQ guides I have seen.

Thanks for writing such an amazing guide :D

Shadowmind - June 11, 2011, 8:51 pm

Thank you very much! Being a nubie I really appreciated to find a starter's guide. Great job!

Trose - June 11, 2011, 9:16 pm

Nice starter guide for the noobies like myself lol

skitzofrantic616 - June 13, 2011, 4:24 pm

This is a great place to start. Thank you for all your time and effort you put into this. :D

xxbadzvincexx - June 18, 2011, 9:20 am

thanks sir this thread is very useFULL to th0se want tobe a hacker?

Anonimia - June 22, 2011, 6:41 am

Hi guys, I have a question;

do you need any specific programmes to start hacking? I know, you should install a FUD-server instead of a RAT, but HOW THE HELL does that work?

Well, I am known to computers and use Windows Vista myself, but is there anything I shoul,d think about first?

A proxy wouldn't be too bad, I think, but I share an IP-adress with my parents, so will it affect their computer?

Not that I care about that, in any way (haha, sorry), but I just want to make sure that they don't know about it. I have broken into somebody's Hyves-account (Dutch social network, like facebook) and it felt good, haha.

Please send me a personal message (if anyone has the time to), so that I know what to get and what to download. And by the way, is Linux downloadable??

Eminent - June 23, 2011, 6:40 pm

Thanks for the positive comments everybody, I am glad that I was able to help. I am also very sorry

that I haven't responded in awhile. My computer broke, so I really haven't been on the forums in general for the past few weeks. I may actually make another guide in the near future; maybe.

@Anonimia I am PMing you now

madcrazydrumma - June 23, 2011, 9:07 pm

No offence but this didnt help me at all :L

Eminent - June 23, 2011, 9:14 pm

(Jun 23, 2011 09:07 PM)madcrazydrumma Wrote: [\[CITE\]](#) No offence but this didnt help me at all :L None taken mate :) This wasn't written in a way that was supposed to tell you what to do all the time, then it wouldn't be hacking, it would just be a following someone's tasks. This was telling you how to do it yourself, like a real hacker.

skdurgesh - June 24, 2011, 12:07 am

hey thaanks Eminent, well i am new in this forum and hacking world, so i will get more info about, this is very beneficial for me. Thanks again

TheDr.GreenThumb420 - June 24, 2011, 12:53 am

Thanks for the guide man, it's very helpful to somebody thats new to hacking

johnnycrackher - June 24, 2011, 12:54 am

Eminent:

This is an AWESOME guide!! I am a "newbie" and have been reseaching and reading everything I can get my hands on that has anything to do with hacking. I've been at it for six months and still feel as NEW as I did the day I found I wanted to be a part of the hacking world. Having said that, I want to tell you that this guide has been one of the best reads I have come across. I get overwhelmed with all of the reference material I read. I jump around trying one hack after another, only to fail. It wasn't until I read your guide that I felt a calm come over me. It was clearly written and easy for a newbie like myself to understand. I have a better sense of perspective now regarding hacking and I just want to thank you for your contribution by making this guide available. I sure look forward to any guides you may write in the future. I'll be watching out for you.

Johnny

FailCircle - June 24, 2011, 1:10 am

Nice guide, will help a lot of people I'm sure.

Hyjal69 - June 24, 2011, 1:40 am

Great read, and also some great links, thanks for sharing.

Eminent - June 24, 2011, 8:48 am

Great to hear that man, I really appreciate it.

chris.z28rx7 - June 24, 2011, 9:24 pm

Starting to hack, learned a lot from this thread. THANKS!

Eminent - June 24, 2011, 10:19 pm

(Jun 24, 2011 09:24 PM)chris.z28rx7 Wrote: [\[CITE\]](#) Starting to hack, learned a lot from this thread. THANKS!

Yeah, any time man, glad I could help.

battlingturtle96 - June 26, 2011, 6:12 pm

Thanks a lot. Im still a little new at all this , and wouldnt mind some personal help from a more experienced member, if you wouldnt mind it . Amazing thread !!

Her0Hacks7 - June 26, 2011, 7:53 pm

thnx! noob hacker here and u pretty much answered my ? in a post i put up earlier today. thank u for the direction and helpful tips

AlmostUnder - June 26, 2011, 7:57 pm

Great Post. Changes the way i think of the whole thing.

fbstealer0 - June 26, 2011, 8:11 pm

nice guide, Thanks a lot..

Cicada - June 27, 2011, 5:40 am

ahhh a great guide thank you! Although im not entirely new to this, i love reading beginner guides and this is one of the best that describes how to feel like a hacker. the catb.org link isnt working for me tho. thank you again :D

Atlasx - June 27, 2011, 5:46 am

Really good post. It gives a really good starting place and some direction on where to start. Good to have people around like you who are willing to share what they know. It really makes the community better.

Leav - June 27, 2011, 6:25 am

Really great guide, thanks for this and the time you took to write it :)

centrecore7 - June 27, 2011, 9:50 am

Great post... i am a new newbie and it was just what i needed as i take my first steps.... thanks

novu - June 27, 2011, 11:57 am

Thanks for this, some interesting info. Not just what a hacker DOES but what a hacker IS :)

Eminent - June 27, 2011, 12:16 pm

Thanks everyone for the positive feedback and for keeping this thread alive.

Smiley~ - June 27, 2011, 12:23 pm

Great guide. I learned a lot from this.

HazeFazeBRO - June 27, 2011, 1:46 pm

Yeah well said, you might want to include that an expert hacker likes to dress himself in fancy sigs and avatars to properly introduce himself. ?

Eminent - June 27, 2011, 3:35 pm

(Jun 27, 2011 01:46 PM)zarakoa Wrote: [\[CITE\]](#) Yeah well said, you might want to include that an expert hacker likes to dress himself in fancy sigs and avatars to properly introduce himself. ?
An expert hacker doesn't spend his time on a forum giving out all of his secrets ;)

DreamH4X - June 27, 2011, 4:35 pm

Great job with the tutorial, I hope you get noticed for being HQ ;)

Regards,
Purple Kush.

Eminent - June 30, 2011, 1:30 pm

(Jun 27, 2011 04:35 PM)Purple Kush Wrote: [\[CITE\]](#) Great job with the tutorial, I hope you get noticed for being HQ ;)

Regards,
Purple Kush.

Thank you very much, sir. I think this thread has gotten all of the attention that it deserves by now. Looking back at it, I am not 100% happy on the job that I did, so I've been writing an ebook on the same subject. It is going to be released any day now, and I think I have done a lot better job on it.

ReLiCz - June 30, 2011, 2:30 pm

Thanks alot for the guide! It's been really helpful in teaching me the basics and giving me a lot of useful tips.

Eminent - June 30, 2011, 5:37 pm

No problem man. If you ever need help feel free to PM me.

Doctor Stein - July 1, 2011, 1:57 am

Instance Book-Mark Nice Jobs

Distonia - July 1, 2011, 2:39 am

this guide is not only good for hacking, it made me look at my art in a different light. Considering possiblitys that have slipped my vision.

keep it up! awesome.

advanda - July 6, 2011, 6:41 am

I am new as you can see and i have gained a little bit more knowledge in just three minutes of reading thank you :)

DeliverOG - July 6, 2011, 7:11 am

if i continue to follow everything, would it be possible for me to hack an xbox live account?

gocool - July 6, 2011, 7:33 am

thanks for ur guide
it's a good start:)

Eminent - July 6, 2011, 12:17 pm

(Jul 6, 2011 07:11 AM)DeliverOG Wrote: [\[CITE\]](#) if i continue to follow everything, would it be possible for me to hack an xbox live account?

Of course. The main thing that you need to focus on is patience. If you are trying to rush through and learn everything in a day, you won't get there; it takes time and effort.

miklo15 - July 6, 2011, 2:45 pm

Nice job man :) I found some some if it amusing. But overall I found this to be a great way for new people to look at as you said. I would vouch, if I could.

P.S. I will bring people I know to this link if they want to learn about hacking.

Eminent - July 6, 2011, 2:58 pm

Thanks for the feedback man, hopefully a few more people will learn from this before the thread completely dies.

R1DDL3R - July 6, 2011, 3:03 pm

Thanks for this! Definitely helps me begin my hacker journey.

Glass - July 6, 2011, 4:01 pm

Thanks for the help man, I appreciate it.

-Taliquo- - July 6, 2011, 4:07 pm

Thanks Alot this guide Really Helped Me Out.

Eminent - July 6, 2011, 4:07 pm

Yeah, no problem guys, thanks for taking the time to read it.

Agent Q - July 6, 2011, 4:15 pm

Awesome guide for sure! saved as a resource ;)

Stewen - July 6, 2011, 4:25 pm

Hey, no problem man, I appreciate that you took the time to go back and post on my thread anyways.

ChAmabile - July 7, 2011, 6:44 pm

Thanks, now I know where I should start!

Dr Rage - July 7, 2011, 7:08 pm

Thank you! This will help me a lot, great guide!

Glitched - July 8, 2011, 11:22 am

Nice guide! You did a great job with this guide.

j0hs4D - July 9, 2011, 8:27 am

i read the guide and it sounds very well, i like your humor;D

Unicorn man - July 9, 2011, 8:50 am

I love this!

Your a boss.

Windify - July 9, 2011, 11:43 am

Nice guide. It's the first thing I have read on HF, as a newb at hacking as of now. You know, at first I considered being a script-kiddie, but I realised that there are far more advanced things to do than that. I want to be an Elite-Hacker :P

Eminent - July 9, 2011, 5:29 pm

(Jul 9, 2011 11:43 AM)Windify Wrote: [\[CITE\]](#) Nice guide. It's the first thing I have read on HF, as a newb at hacking as of now. You know, at first I considered being a script-kiddie, but I realised that there are far more advanced things to do than that. I want to be an Elite-Hacker :P

I hope that you can get there some day =)

xGarrett - July 9, 2011, 6:32 pm

Wow. This is really helpful. Will be using this as a reference to check when I get around to start hacking.

XxiiExploitxX - July 9, 2011, 8:32 pm

Great Guide :p ?

GAMERRiTALiN - July 9, 2011, 11:21 pm

THANK YOU I REALLY NEEDED THIS IF I CAN DO YOU KNOW ANYBODY THAT NEEDS A MEMBER TO THERE GROUP THAT CAN NULL SCRIPTS

Chebyshev - July 10, 2011, 12:52 am

Why is Unix/Linux a skill? How is that necessary?

De-cryption - July 10, 2011, 1:17 am

Nice guide for any hacker that can read or wants to read lol.

SQLInjectionisfun - July 10, 2011, 1:29 am

I wouldn't suggest hacking your school system ehhehm I got in a a lot of trouble by the administrator ehhehm

sleep walker - July 10, 2011, 1:44 am

That is good idea thanks bro.

POPPING - July 10, 2011, 4:17 am

i had started trying all this

thanks but please tell me i had really tried to increase my reputation but i don't know it becomes very low or negative ??

what to do??? please tell!!!

xxGunslingerXx - July 10, 2011, 5:59 am

This is a great guide! Thanks so much for posting it.

Exzi - July 10, 2011, 9:07 am

This is an great guide man. Thanks.

almostazn - July 10, 2011, 9:37 am

Keep it up! This will help starters FOR SURE!!!

Dizz - July 10, 2011, 9:50 am

This is helping me much in my beginner hacking! Keep it up! ?

cyb3rbiT3 - July 10, 2011, 10:04 am

wow this really got me going. I actually know some Python code...is that enough to set me on the right track towards being more knowledgeable when it comes to computers and software?

Smookeey - July 10, 2011, 10:54 am

Thanks alot Dude :) will be trying this out

TrenchCoatHacker - July 10, 2011, 11:38 am

Thanks for posting this, it definitely is more in-depth than the crappy e-book I bought yesterday.

elldur8 - July 10, 2011, 12:08 pm

loved the guide, ill b sure took keep this favorited :)

spyrow - July 10, 2011, 12:09 pm

This really helped alot thanks!!

sfera - July 10, 2011, 12:37 pm

great starting point. much appreciated !

In my guide, I wasn't refering to Hack Forums reputation.

BL00DBATH - July 10, 2011, 9:21 pm

Well said, i see alot of hackers, or should i say would be hackers, use short terms or mis-spellings but you actually seem to be very well rounded and do the hacker community proud ..great post man!!

Eminent - July 10, 2011, 10:30 pm

(Jul 10, 2011 09:21 PM)BL00DBATH Wrote: [\[CITE\]](#) Well said, i see alot of hackers, or should i say would be hackers, use short terms or mis-spellings but you actually seem to be very well rounded and do the hacker community proud ..great post man!!
Thanks man, that means a lot.

-Nix- - July 11, 2011, 12:55 am

I like how you stressed a lot on other subjects outside of JUST sitting on a computer. Most people tend to think that hacking is just sitting on a computer. However things like SE, striving to be smarter, better grammar, meditation; all are great skills that make you a more witty and well rounded person that attributes your hacking ability that people tend to greatly overlook when they think of a stereotypical hacker.

serrembo - July 11, 2011, 2:50 am

Thanks man & good guide, Keep up the great work.

Nuclear Squid - July 11, 2011, 5:15 am

Thanks, this was very helpful. A good starting point for me.

name - July 11, 2011, 9:39 pm

Very good guide, great job. I would say allot of new hacker's will really benefit from this.

mind_master17 - July 11, 2011, 9:46 pm

very helpful post, a good start in hacking.

Ruhat - July 12, 2011, 1:23 am

Thank you man!
I rly appericiate ur work, some things u said in the post i recognized myself from.

anox19 - July 12, 2011, 2:52 am

Thanks a lot for this guide, really good stuff.

kingm0ve - July 12, 2011, 3:41 am

? I appreciate the effort and the information, will print and place on reading table.

p0pwow~ - July 15, 2011, 7:36 am

Thanx >>> I wanna try this tooo!!!

aActive - July 15, 2011, 9:18 am

Great guide. This is like a inspiration to me. Thanks for your hard work by making this guide.

madhanmech - July 16, 2011, 12:03 am

good guide learned a lot.. and thanks..

Mobcanvas - July 16, 2011, 12:19 am

Hey man, your Manifesto link at the beginning is off. thought you should know.

<http://whatishacking.org/manifesto.html> (I tried to go to it and it took me to a never ending loading screen :p)

Jamez™ - July 16, 2011, 12:57 am

What type of hacker would this TuT direct you to be?

Psyberion - July 16, 2011, 3:36 am

Very good guide I'd say. It made my hunger for knowledge even bigger and raised my eager to start studying computer security at the university this fall!

hsoJTehPwn - July 16, 2011, 5:05 am

Wow, really awesome job on this guide. Had a good read of this and found it to be very helpful and informative - thanks.

KwOwNs - July 16, 2011, 6:12 am

thanks man ;) reading the whole 'how to become a hacker' page now :D

Eminent - July 17, 2011, 9:59 am

(Jul 16, 2011 12:19 AM)Mobcanvas Wrote: [\[CITE\]](#) Hey man, your Manifesto link at the beginning is off. thought you should know. <http://whatishacking.org/manifesto.html> (I tried to go to it and it took me to a never ending loading screen :p)

That's weird, it loaded for me in about 2 seconds. =/

(Jul 16, 2011 12:57 AM)Jamez™ Wrote: [\[CITE\]](#) What type of hacker would this TuT direct you to be?

It is really all up to you. This tutorial gets you started by knowing a little bit more about how hacking in general works. I try to be unbiased, and if I directed you to be a certain hat, it would, indeed, be biased. This is more of an inspiration and a starting point for your journey, rather than a step by step guide to becoming the master.

Infectory - July 17, 2011, 10:51 am

Its a really good guide, thank you very much !

fishsoup - July 18, 2011, 4:38 pm

I would really like to have this ebook.

Please give me a copy :)

I already posted at the first part, but I just want to make sure that I get the second part too :)

Eminent - July 18, 2011, 6:16 pm

Yeah, I'll PM you now. You will need to get 5 posts before you can PM back though.

Shaniz - July 20, 2011, 5:22 pm

I have to say this is quite useful, glad i came across it. It had surely pointed me in the right direction.

klajor - July 20, 2011, 7:31 pm

I couldn't agree more with everything that you have said here.

I was surprised by the meditation part though. I recently began to meditate. I do mantras and an exercise where I pick up an object, close my eyes, and focus solely on the object in hand. I'm kind of proud of myself. I can go a good 30 minutes without cracking :D.

I would +rep, but....

well I can't XD.

Very well thought out post. Good work.

Riku9182 - July 20, 2011, 7:45 pm

Very Nice Guide :D

I really enjoyed it

v360 t0xic - July 20, 2011, 7:50 pm

this is a really good guide keep it up.

S?arlet - July 20, 2011, 9:02 pm

i love this guide! thanks

Adam? - July 20, 2011, 9:15 pm

I found this a good thread nice dude!

oEncorev - July 20, 2011, 10:02 pm

This is honestly one of the greatest things I've ever read. I have few friends friends, and my closest friends happen to be hackers. I envy every attribute they gain from hacking, and all of the knowledge that is granted throughout their hacking "career". I'm going into my Junior year in high school, and my hacking friends are seniors, but since I've been hanging out with them more frequently, I have noticed that I'm gaining a great amount of knowledge by just listening to them talk.

But anyway, this article was definitely worth reading, and made me feel accepted for once. Thank you for sharing this!

Ther-TeeN - July 21, 2011, 11:00 am

Wonderful!! Thanks A lot!

Eminent - July 21, 2011, 9:59 pm

(Jul 20, 2011 10:02 PM)oEncorev Wrote: [\[CITE\]](#) This is honestly one of the greatest things I've ever read. I have few friends friends, and my closest friends happen to be hackers. Thanks! I'm really glad to hear it. I am available to talk anytime if you ever want to.

hockeyplaya612 - July 21, 2011, 10:06 pm

this thread was helpful. it took me awhile to read it,but helpful

Timbo Slice - July 21, 2011, 10:28 pm

Thanks so much for the guide mate :) Been googling different information on hacking and so far this site is just perfect... And everyone seems really nice haha. Thanks for the good read and information

bsquidwrld - July 21, 2011, 10:45 pm

Dude, I can not tell you how much this helped. I have always wanted to learn some sort of hacking, even if I was a Script-Kiddie at first.

Cole - July 21, 2011, 10:55 pm

Good post, very nice/organized. Thankyou, keep up the good work.

Mootzy - July 21, 2011, 11:04 pm

Nice one man, keep up the good work.

-Mootzy

JOhnSmith - July 22, 2011, 1:06 am

This is outstanding. 5 Stars OP.

InfiniteDream - July 23, 2011, 1:56 am

Good read - Great job OP :)

sakalonys - July 30, 2011, 1:44 am

thank you very much for sharing

addfriend - July 30, 2011, 3:54 am

Thanks my friend,I've learnt so much from it.

penguin19985 - July 30, 2011, 7:08 am

Nice tutorial!

Keep it up!

?

Succes! ?

shiin - July 30, 2011, 9:23 am

Great guide. Keep up the good work!

Arcturus Mengsk - July 30, 2011, 11:55 am

Great tutorial, I think it deserves a sticky, it was in depth and made sense when you read it, it is really good.

Pwn - July 30, 2011, 1:02 pm

Thanks for the help buddy :)

\$@! - August 1, 2011, 12:51 am

thnks for the guidance..

u have one a good job for the learners like mee..

thanks alot..

i will follow ur steps

try to post more guidance threads which wil be use ful for learners

clinkz.xd - August 1, 2011, 2:00 am

Looks Nice !

Thanks For Sharing yours experience !

Sniper_Rock - August 1, 2011, 2:08 am

Thank for all thing, I'm beginner please suggest me

valalith - August 1, 2011, 4:35 am

Thank you for the guide! Very helpful

GxD - August 2, 2011, 7:40 am

Great post my friend, keep it, but I have a question, I'm trying to start off by learning some programming languages, but i do not know where to start, and also some network and computer security (as you posted above!), so can you tell me what to learn first, and if you have some names for books that i can read or websites that can help, please tell me, thanks a lot!

AfroX - August 2, 2011, 10:14 pm

hey can you please send me the guide :)?

CandLe - August 3, 2011, 2:27 am

Thanks for your guide. It's very encouraging and inspiring, I bought "8 minute meditation: quiet your mind" few minutes ago.

That's funny because I started to meditate just few days ago, and now I found that kind of thing in a

hacking site. Who would have thought it? Awesome. :)

XYZ_cbot_1 - August 7, 2011, 10:15 am

Keep up the good work, this thread helped me a lot, Thanks

B-Rabbit - August 7, 2011, 10:43 am

Hello and thanks for the great guide, I just started here on the forum for twenty minutes ago and I'm already following most of your steps in my opinion. Keep up the good work, I appreciate it.

Metamorphic - August 7, 2011, 12:23 pm

nothing much up to coding, anyway verry nice tut. i actually read it all :D

creativesnipr - August 7, 2011, 12:49 pm

Great work! thanks for this ..

specially i like the book: 8 Minute Meditation: Quiet Your Mind. Change Your Life

B A L O C H - August 12, 2011, 3:58 am

Hey eminent ! Very Cool ! Thanks alot for sharing. Million of thanks. Your post is the source of motivation for everyone here.

RaweAbbud - August 12, 2011, 10:28 am

So how can i start ?

from where , what i can hack for beginner ?

B3cnoc - August 12, 2011, 10:53 am

Very usefull Tutorial :)

Keep up the good work :).

Vats - August 12, 2011, 8:46 pm

I am an exploring newbie and such threads are a lot more guiding bars which are necessary thanks bro for making it available!

zer0pwn - August 12, 2011, 8:55 pm

(May 11, 2011 05:28 PM)Cyber-Security Wrote: [\[CITE\]](#) Nice Guide Eminent!

Keep it up! This will help starters FOR SURE!!!

Yes, it definitely will, however, all the newbs here are trying to go to more advanced subjects right away. The people who should be reading this aren't, which is sad, because it's a GREAT tutorial.

Keep up the good work Eminent :)

Eminent - August 13, 2011, 9:50 am

Thanks a lot. I am actually working on a "Mega Version" of this guide right now. I was gonna keep it a surprise, but I think I can tell you. Just make sure you don't tell anyone ;) shh

~Aer - August 13, 2011, 10:47 am

Thanks for the Help Bro. Bookmakred, Im gunna have to try all of this :D

Dawnwriter18 - August 13, 2011, 11:24 am

i feel like an idiot, that did absolutly nothing for me...perhaps its cause i learn by doing, not reading...it was a very interesting read though, thanks for posting it.

DsntExist - August 15, 2011, 4:00 pm

Thank you for the useful article.

Very brilliant.

Rage Against The Machine - August 17, 2011, 6:08 am

thanks for this tut nice way of defining a hacker i hate how everyone this you just push a button and doors magicly open

phybe? - August 17, 2011, 8:21 am

(Aug 13, 2011 11:24 AM)Dawnwriter18 Wrote: [\[CITE\]](#) i feel like an idiot, that did absolutly nothing for me...perhaps its cause i learn by doing, not reading...it was a very interesting read though, thanks for posting it.

Some people learn differently,it's not a bad thing at all.

mamboking - August 17, 2011, 9:34 am

nice..glad to have this on here.. your good man thanks

2Beast - August 17, 2011, 9:45 am

good guide. i ll keep this in mind next time i attempt to hack something

DarkComet! - August 17, 2011, 10:35 am

Holy... Good guide brotha.. Dang,if i could make myself to write this long guide about something,i would be proud of myself hehe...

Rly,nice one!

TrapZz - August 17, 2011, 10:48 am

Great article,this will help me a lot along the way.

???qrizta??? - August 18, 2011, 5:08 am

we hackers are rock and rolling the cyberworld !!!\m/

w4steland3r - August 18, 2011, 10:07 am

Before I even read this guide, I watched the show Burn Notice on USA. It makes you think tactically and I recommend it to anyone!!!

Well done guide!!!

w4steland3r send his regards

Another good tip: If you game, try out some tactical/strategy games i.e. Halo Wars R.U.S.E etc. etc.

Blackv3ngenc - August 18, 2011, 10:42 am

Thank you so much this guide!

I now have a basic idea on where to start hacking on being on the right path to become a Elite Hacker.

parrot strike - August 19, 2011, 2:46 pm

It sounds a little like the first resource you cited, but alot shorter and more to the point!

snappcamera - August 19, 2011, 4:36 pm

looks great! guess I have some reading to do..

Royce - August 19, 2011, 10:54 pm

Thank you very much for the guide, this will help me a lot

DsntExist - August 21, 2011, 7:49 pm

I've just finished reading, analyzing and also taking a few (Or a lot) of notes on the article that got YOU started. And I like it. Nice read. Gracias for providing that article too amigo.

xxCaSp3RZz - August 21, 2011, 8:16 pm

this helped a lot bro keep it up, very inspiring :)

USxARMYxNED - August 21, 2011, 9:06 pm

Wow great post man, thanks for this.

Z.e.z.o. - August 21, 2011, 9:30 pm

Thank You vry much Ill be the best hacker soon :)

hazeleekaizera - August 22, 2011, 6:56 am

thank you...

this is made me brilliant before.. haha :D

i love the tutor

Marked - August 27, 2011, 1:01 pm

AMAZING GUIDE! thanks so much posting this mate.

Hacker16 - September 19, 2011, 12:16 am

nice tut bro keep it up thanks man

i will use this in future thanks again

this is a good tut everyone use it

Small_Cat - September 19, 2011, 1:49 am

cool, but good guide! Keep it up!!!

RsShadowX - September 19, 2011, 2:24 pm

Thanks for guide. Read all of it :p

DRAGONATO - September 20, 2011, 12:16 pm

Nice :)

I'll surely try all those u have listed to do

Thanx for this guide !!!

JessicaR - September 21, 2011, 7:13 pm

Thank you very much this is going to help me a whole lot! I really appreciate it. Im new to hacking but im eager to further hack.

373rN1745 - September 21, 2011, 7:37 pm

Awesome guide! It really gave some good points and a lot of direction. Thank you for taking the time

to do this. I feel like it really explains the Hacker as a whole. I would like to hear more about what other people believe hacking is all about and the cybernetic culture that surrounds it.

spykids007 - October 2, 2011, 3:17 pm

thanks man really great in depth guide!

StinkyBrownApple - October 9, 2011, 1:50 pm

Thanks dude, amazing guide. This will help me a lot :)

kandkcrystalclear - October 9, 2011, 3:31 pm

Thank you for all the info. I started learning how to hack (or should I say use someone else hack) for the purposes of getting into paid websites for free. I have always been a kind of "take a short cut person", and your thread has opened my eyes to the fact that taking the short cut learning this art would be worthless. I mean anyone can take someone else's program and run it, but that's not really hacking. I would like to learn at least what that specific program is actually doing in order to hack whatever it is I may be hacking. A term I learned in these forums for stealing user name and password which is leach. I would have been just a sort of hacking leach had I not read your article and not opened my eyes. Thanks?

-DMT- - October 9, 2011, 3:39 pm

very nice tut man keep it up with all the good work man

CyberDelic_Hippie - October 10, 2011, 1:28 pm

This is very helpful. Thanks for posting this man!

Pirate - October 14, 2011, 8:54 pm

Thanks for the perfect guide master. This will be useful to everyone who is willing to hack. I'm still wondering that how I read this guide COMPLETELY without stopping or skipping anywhere. That much useful and interesting it is.

Thanks again! ?

Kappah - October 14, 2011, 9:11 pm

The Hackers Manifesto has extremely good content.

I highly recommend all hackers to listen to the Hackers Manifesto on a daily basis. I do, it's like my prayer.

Anyways, nice post, high quality shit right there.

Lee Anderson - October 14, 2011, 10:24 pm

Great guide :), i'm learning more and more as i read this great thread :P

flame3 - October 14, 2011, 11:58 pm

thanks for the guide i think i now know where to start

wimmpie - October 15, 2011, 12:16 am

Good work, i really liked it.

Thanks for making this guide

Kappah - October 15, 2011, 12:46 am

PS: I was reading under "Style", I know a lot of real hackers that have awful grammar. Plus, I know a whole lot that speak in binary code.

Just gonna say that, lol.
I got good grammar though so no worries :P

minion. - *October 15, 2011, 12:59 am*
Very helpful read.

Thank you. ?

jublive - *October 15, 2011, 2:24 am*
Thank you for this !!

Very good guide :D

TooDoubtful - *October 15, 2011, 11:51 am*
lol thanks mate for the help :D gona try and do my best

voke - *October 15, 2011, 12:30 pm*
Thanks for the help :) mate , i'll follow your tips , and become a good hacker.

Maven - *October 15, 2011, 12:56 pm*
Very good read and nice to see other aspects of life considered, such as music and mindset. Will refer to this regularly, thank you!

yoyo701 - *October 15, 2011, 1:11 pm*
Thanks bro, it's very helpful guide!
Awesome guide man!
You assisted me alot.

ForthRight - *October 16, 2011, 3:51 am*
Thank you very much for this awesome guide. I am already learning HTML but was confused whether I was doing the right thing or not. Now I will be learning HTML full force :) .

Noob_Hacker159 - *October 16, 2011, 4:43 am*
Very nice guide.Can you tell me is linux is necessary for hacking ?
Actually i have noob pc and cant install 2 OS at the same time,I prefer window XP..

Undead_Soldier - *October 16, 2011, 4:49 am*
Nice Guide Thanks for the help Leaned some things from this

SIM-1029192 - *October 27, 2011, 4:24 am*
Thanks man. This is the best start guides for anyone to start getting anonymous and hunt.

Techie??? - *October 27, 2011, 6:15 am*
Good guide for Neophytes. Keep it up.

nuka_cola52 - *October 28, 2011, 9:46 am*
Wow that was great... I'm pretty damn new at this stuff. This one post has helped me a TON. :D

Silent JDB - *October 28, 2011, 10:50 am*
Great guide mate.. knew most of this but learnt a few things..

rudypiorun - *October 30, 2011, 2:48 am*

YOU ARE THE BEST MAN ON THIS SITE !!

Venomz1337 - *October 30, 2011, 5:37 am*

Finally something that actually is usefull unlike those beginners ones, Thanks

Gemsczar - *November 3, 2011, 11:11 am*

Pure Satisfaction, A wonderful place to review and learn, now I just need to get my adderall script refilled ~ Gratefully~

BaBy GhOsT - *November 3, 2011, 8:48 pm*

nice one dude?????

Razerclaus - *November 3, 2011, 9:34 pm*

I must say, I don't know if I want to hate or love you... You made me go from my bed with my laptop to my other PC and i kept reading ALL night long xD Great tutorial/guide.

Keep it up!

unlinkedbeast - *November 3, 2011, 10:49 pm*

Im new to this whole hacking world. And this "guide" will help me move on from the Script Kiddie stage to the intermediate. I can not thank you enough. I am looking forward to learning and growing as a contributing factor of this website.

kclayr - *November 5, 2011, 10:19 pm*

great guide. I especially like the style's section; its a new section I haven't seen in guides like this. Although, "Be a Genius". :) Three small words that convey such meaning and yet so hard to achieve.

thearticle - *November 7, 2011, 6:15 pm*

can I have the full ebook? that would be awesome.

DreadfulGlory - *November 7, 2011, 6:43 pm*

This was a pretty comical guide. But it is very interesting. I like the part after the "history lesson." :P

impz267 - *November 9, 2011, 8:22 pm*

thanks eminent helped me alot now im just not wondering about where to start. thanks for the great e-books and posts.

James001 - *November 10, 2011, 3:29 pm*

How can I hack yahoo account online? is there any (easy I should say) way to do so?

I am not well known to keylogger and want to hack only one yahoo account? will anyone help me out?

TheArchitect - *November 10, 2011, 11:47 pm*

Eminent,

Unsure if you are even continuing to look at the posts/replies made to this but that is beside the point, the urge to express the utter lust for being an 'elite hacker' I now have thanks to this post is just too intense. I have about 10 tabs open in my browser currently and I'm in for a long night of learning HTML, touching up on Batch and the various coding you suggested. Hopefully I am able to continue my interest in this, I often get extremely bored and sick of things quickly, but if that is to happen I will just redirect to this article and I'm sure I will be back on track. You sir have created a

monster.

P.S I picked up a few errors in your article ;) (regarding your comment about being well spoken).

Beasttt - November 11, 2011, 1:34 am

Great guide bro, 10/10 overall. Keep the good guides coming :D

Eminent - November 11, 2011, 8:16 am

@P.S -- I tend to never read over my work when I write longer articles. Sorry about the errors =/

Simegu - November 14, 2011, 7:12 am

Thanks very useful ^^ never found out where to start but i rly like this

Hacker-error - November 14, 2011, 2:02 pm

A good text that summarizes concretely the subject ! Great !

leeeet52k - November 14, 2011, 2:57 pm

Thanks iv learned Alot!, big vouch for you man!

balihari - November 15, 2011, 8:50 am

nice tut..like it..awesome pretty awesome

Th3-Gh0st - November 15, 2011, 9:46 am

Nice tutorial man

Thnx a lot :) You are right about the things you wrote. I would try it.

loay HR - November 18, 2011, 1:23 am

Thx dude for this great help

Keep it up :) and if you made any new guides can plz PM me ? Ty TC

Waqas1 - November 23, 2011, 11:08 am

great guide :).

keep it up.

thanks man!!!

Eminent - November 23, 2011, 11:57 am

Thanks for 300 posts and the great feedback everyone.

burkspatrick - December 7, 2011, 6:35 pm

Nice tutorial for a beginner. Really awesome.

Andy1337 - December 8, 2011, 12:22 am

Great tutorial! Keep up the work! I found this very usefull!

Madmansdeath - December 10, 2011, 6:04 am

Great info man

Really good read

Cheers

:)

Rasmous - December 10, 2011, 4:31 pm

Thanx that was assome :) I should try this

chaos0000 - December 10, 2011, 4:47 pm

u need a prize brp

thanks for all that u wrote

Heyzen - December 10, 2011, 4:53 pm

Good tutorial.

It will help a lot of people out.

nothing1 - December 10, 2011, 5:11 pm

This is nice bro.

It actually made me feel like less of a skid ?

ZerQl - December 10, 2011, 5:12 pm

Thanks a lot man..

Its nice Guide..

brushi - December 10, 2011, 5:46 pm

Great stuff, really put alot of effort into it

starcassie - December 11, 2011, 1:02 am

tnx 4 for this

my eagerness doubled up.

iTzMaalre - December 11, 2011, 2:20 am

Personally, I disagree with most of that stuff. That, really, is a summary of 'How to become a stereotypical hacker'; a script kiddie. All they need to learn is how to keep them selves on the down low, learn to program and how to exploit. If they wanted to go a step further they could learn Cryptography.

Good amount of effort though, if you want to breed more stereotypes. ?

NOTE: Your post reminds me the movie named 'Hackers'. LOL! That was as dumb ass, as fuck. Not that I'm saying your post it is. They all had silly aliases: <http://www.imdb.com/title/tt0113243/>

TIMMAAAAAA - December 11, 2011, 9:56 am

Can someone give me a link to a good coding language to start off with like HTML or the C family.

1jonathan - December 11, 2011, 10:01 am

Thanks for the help! this really helps alot, keep up the good work!<3

iTzMaalre - December 11, 2011, 10:17 am

(Dec 11, 2011 10:56 AM)TIMMAA Wrote: [\[CITE\]](#) Can someone give me a link to a good coding language to start off with like HTML or the C family.

Those are two completely different things. C is a programming language, which is very hard for beginners. HTML(Hyper Text Markup Language) is a markup language used for Web Design, of which is not necessary for hacking(unless it be 'web' hacking).

For HTML visit W3Schools; for C checkout video tutorials on YouTube.

EDIT: To start of with I'd advice you know HTML, then learn Python/Perl. After mastering either scripting language, I'd advice you learn C and C++. Once you've learned them, it's Assembly language time; time for actual hacking.

Good luck. ? -iTzMaalre

Catnip - December 11, 2011, 10:47 am

Wow, this is really nice, thanks man! :D

GBK - December 11, 2011, 11:13 am

Wow i really do like this TuT thankss it is really good

Lunchmunch - December 11, 2011, 10:29 pm

Thanks for all of your help, you're great!

NashwaMostafa - December 11, 2011, 10:41 pm

Good guide really,thnx.. for sharing

wert2828 - December 12, 2011, 1:23 am

Put some links. Like some good tutorials for programming languages.?

cas040 - December 13, 2011, 12:43 pm

thank you for this! its helping me out ! ty

Asxi - December 13, 2011, 1:05 pm

Great guide. Makes you think of where we all came from. Nice to enjoy a flashback every once in a while.

Vrieskip - December 13, 2011, 1:57 pm

This is super interesting thanks !!!

TASLEEM KHAN - December 13, 2011, 2:41 pm

simple and educational wow i love it

Ichi - December 14, 2011, 5:38 pm

Amazing guide. Simple and to the point. Love it, great job Eminent

lanz90 - December 14, 2011, 9:47 pm

Thanks for the guide man, it was really helpful...i also found a really good website to help start

anyones future HTML endeavors and it is on http://www.w3schools.com/html/html_intro.asp

Defile - December 15, 2011, 8:00 am

Hey Thanks!

Helped me out quite a bit =D

Gerges - December 15, 2011, 8:12 am

Great tut, points out where to start hacking and what to learn to start hacking.

Thanks

bos1234 - December 23, 2011, 5:45 am

thanks. Was a good read. I'm leaning c at the moment

SuicideBomber - December 28, 2011, 8:13 pm

I like the manifesto, man. This definitely got me inspired.

Lust. - December 28, 2011, 8:27 pm

Brilliant guide! Looking forward to more from you!

blufang - December 28, 2011, 11:42 pm

Nice TUT bro! quite a good read, everyone who read this might end up being a decent hacker i guess :3

Detain - December 29, 2011, 3:22 am

Thank you for this, helped me a great deal ,especially the link you first read,

crossera - December 29, 2011, 3:26 am

Nice TUT bro! quite a good read really tnh

abhay.unrated - December 29, 2011, 7:04 am

Really nice article. I hope it will help me in getting started.

wannabehacker2k12 - December 29, 2011, 8:17 am

Hi, thanks man, really good guide, I want to be a hacker but didn't have a clue where to start until I read this and the links you give me. Thanks a lot!

Sil3nc3 - December 29, 2011, 8:53 am

Beautiful review. I think the people really new to the hacking scene will find this to be useful to them.

bobermen1 - December 29, 2011, 2:13 pm

thankyou for inspiring me to become an intermediate hacker!

LogicDenied - December 29, 2011, 2:27 pm

Thank you a lot for this. I knew most of it, but covered some nice points, very nice share.

thedeadwalkk - December 29, 2011, 2:45 pm

Nice tutorial man, really useful and informative.

I'm going to college in 5 months to learn CIT (basically networking, system admin, etc..) and currently I'm in the process of being able to SQL completely by memory, and without a note pad with a few steps I have difficulty remember. I want to progress past this point, but I'm not sure when. I'm thinking I may just wait until I go to college to begin serious learning, as it would easily complement my course load. Do you think this would be a good route to take?

Syph Xero - January 1, 2012, 4:46 pm

Thank you for this thread. This really shows what is behind media, the attitude of hackers and their lifestyle. Media talks us down every day and still we find hackers like you describing what real hackers are like. We explore, we seek after knowledge and we exist without skin color, without nationality, without religious bias. We are hackers!

Keep on the good work!

AliveAgain - January 1, 2012, 5:08 pm

Very Nice job! Continue the great work!

ufuk - January 6, 2012, 5:02 am

Nice tutorial it helps ppl alot! ? ?

BaMBuS - January 6, 2012, 5:22 am

Great and usefull tutorial, this is like guiding star for begginers. Good Job dude!

blackhatboy - January 8, 2012, 7:39 pm

Thank you very much!!!!

this will help a lot..

SapphireGrace - January 8, 2012, 8:23 pm

I liked this tutorial. It was even a bit funny. ;) Overall, really awesome thread. Keep them coming!

darklord0972 - January 13, 2012, 11:49 am

can i have the ebook please? both part one and two

snurre - January 13, 2012, 12:25 pm

thanks man! this is the best "Beginners Hacking Guide" i ever seen, keep it up!
it really helped me:)

Ego Inc - January 13, 2012, 12:29 pm

nice guide bro, not to bad ?

starglitz - January 13, 2012, 1:07 pm

Great Thread For beginners. Very useful .Thanks a Lot for sharing with us:)

AnonymousPie - January 13, 2012, 1:17 pm

Nice Post, helped alot of new comers. :)

Disobey - January 15, 2012, 7:17 am

Great and very detailed guide :) good work

Peroxide - January 15, 2012, 7:26 am

Good guide.

Should help a lot of users.

YoshiBF - January 15, 2012, 7:49 am

Wow, great tutorial.

I bookmarked this. Thanks!

achal - January 15, 2012, 9:03 am

Introduction

There are an infinite amount of people in the world. Everyone is different. There are no duplicates. The same can be said in the world of hackers. Not all hackers are the same, and a lot of hackers have different views on "Hacking", but it is not the fact that we are all identical that makes us one entity; it is the big idea. See, what makes us hackers is the desire to learn, the urge to tweak any object we encounter, we want control, we don't want to be controlled, we want to be anonymous, and we are intellectually years ahead of others; I would go on on this list if boredom didn't exist. So, how do you know if you have the "Hacker Mindset"?

[Read this document](#). It is titled "The Hacker Manifesto".

[img]<http://www.catb.org/~esr/faqs/glider.png>[/img]

Respect

One of my favorite things about the hacker community is how open it is to anyone. Quoted from the Hacker Manifesto "We exist without skin color, without nationality, without religious bias" In your days of being a hacker you will make friends from more than one country, you will meet someone that is a different religion than you, and you will encounter numerous people with a different mindset than you; but it doesn't matter. You, as well as them, will be accepted as long as you follow the basic guidelines.

But, you don't come into the hacker community as the best. Do not expect to be treated as a god when it is your first day. It takes work to earn the respect of a great hacker (i.e. Dennis Ritchie, Ken Thompson, Kevin Mitnick, or Phiber Optik). There are three main categories of hackers, and they are:

Script-Kiddies: These are the people who use other people's tools and documents/resources available online. Script-kiddies usually have no idea what is going on 'behind the scenes', they just run their programs because they know that they work. These hackers usually have minimal skill level, but take up a large portion of the hacker community.

Intermediate Hackers: These are the halfway hackers. Intermediate hackers know quite a bit more than script-kiddies, and are decent enough to get by by themselves. They know about computers and networks, and use well-known exploits. A lot of halfway hackers want to be masters, and with the appropriate amount of work and dedication, they can be.

Elite Hackers: These are the skilled hacking experts. Elite hackers code many of the programs the the script-kiddies use, and develop exploits that intermediate hackers use. They can hack into almost any system, and cover their tracks, and sometimes, even make it look like someone else did it. They are often very secretive and only share their information with “subordinates” when they are deemed worthy. Elite hackers are very few in numbers, which is good for security companies.

There are many things that you have to learn to reach that glorious “Elite Hacker” status. Every hacker must make their own path, but in this tutorial I will attempt to help you achieve this goal to my greatest ability.

So, what can you do to up your status a little bit? Well there are plenty of things:

- Write useful software
- Help debug other peoples programs
- Publish useful information
- Server other hackers

One word that I used more than once on that list was “useful”. That is what will earn you some status in the hacker culture; being useful. Don’t just be there, be there and do something.

What to Learn

There are so many things that you need to learn in order to be a successful hacker, it is almost overwhelming. But I will try to sum this up for you:

- Security (PC & Network)
- Website Hacking (SQLi/XSS/etc.)
- The Jargon (Slang)
- Social Engineering (Human Hacking)
- Encryption
- WiFi Hacking
- Linux/Unix
- Programming (Any language)

There are things that can and should be added to that list, and it is by no means in order. This is not a tutorial on how to do each and every one of the things on this list, but it is here to point you in the

right direction.

If I were to tell you where to start-- assuming that you have very little experience-- I would tell you to learn html. This is not meant to be your main programming language (unless you get unbelievably good at it), but it is a great starting point. Html will help you understand a lot of the problems that you will encounter online, and if there is ever a point where you would like to make a website, it would help you there too.

If I were to tell you where to go from there, I would tell you to learn a minimal amount of batch coding. This field is very much meant for beginners, and most hackers start out just trying to learn more about it (which then develops in to much more useful skills). Batch is just Command Prompt and Notepad. Watch some tutorials on YouTube, or look at the Batch ,Shell, Dos and Command Line Interpreters section (<https://hackforums.net/forumdisplay.php?fid=49>). Learning this won't make you an Elite Hacker, but it will get you used to two things:

Basic Programming

Basic Command Line

Programming will help you all around, but the command line is mostly for Linux. If you don't already know, Linux is an operating system. Linux is evolved from the Unix Operating system, which was developed in 1969-- That's 12 years before windows! Linux was released in 1991 by Linus Torvalds. Linux actually stands for "Linux is not Unix". Now, if you are still reading after that boring history lesson, then that means you are showing a great virtue that every hacker needs.... Patience. I would advise you to head on down to <http://www.ubuntu.com/download> and pick up your own version of Linux. NOTE: Linux will run side by side with windows, you can have two operating systems on one machine.

Social Engineering is another thing that is vital for you to become a successful hacker. Social Engineering is the art of human hacking, and is often abbreviated at SE. It will do countless things for you in your career. See, flaws in a computer network get patched, but human flaws will never diminish. Kevin Mitnick was said to be one of the greatest social engineers ever. Kevin could convince anyone that he was someone else-- whether it be on the phone, or emailing, he was perfect at getting his way. The great thing about social engineering is that you can use it in everyday life, wherever you go. Out of all the skills that you could learn to be a great hacker, this may be one of the most important.

Style

Hackers can't always be at the computer, and although there is no real substitute for hacking, there are plenty of things that you can do to that can do to feel somewhat connected to the art of hacking.

Learn to write well: Hackers aren't like the media makes it seem where you only are allowed to talk in numbers. Most great hackers have near-perfect grammar and spelling. It will also help people understand you better (this is especially useful if English isn't your main language. And I know by experience that it will earn you some more respect as well.

Watch Star Trek: It's just a great movie. There are all of the T.V. episodes too, but the movie was awesome.

Mystery books are a good thing: A lot of hackers will tell you to read sci-fi, but mystery books

make you think. Thinking is good.

Nerd? Don't worry about it: As mentioned earlier, real hackers don't care if you are a nerd. We exist without a bias, and most people follow that golden rule. Anyone who doesn't isn't a real hacker.

Meditate: It may seem weird if you have never done it before, but meditation will make you a ridiculously better person. If I was to recommend you a guide for mediation, it would be http://www.amazon.com/Minute-Meditation-Quiet-Mind-Change/dp/0399529950/ref=sr_1_1?ie=UTF8&qid=1305075689&sr=8-1

Have an ear for music: Learn to appreciate more than one style of music. Most hackers prefer either rap, or techno (dubstep) and some develop a love for both. The ability to enjoy any music though, is a great trait.

Be a genius: I always strive to be a genius, no matter how much of a stretch it may be. It keeps your mind active, and it will make you, obviously, smarter. Being a genius will make it infinitely easier to learn about hacking, and it will make you much more aware of everything going on around you.

If there is one thing that you shouldn't do however, is use silly/immature screen names. How respected do you think you will be if your name is "I_Rape_Yung_P00dles"? You won't ever be taken seriously like that, and it makes you look like a waste of time. Another thing that you should avoid doing is flaming. I am not saying that you should be a brownnoser to everyone that you meet, but avoiding conflicts, and a decent amount of respect for the people who deserve it will make you a well liked hacker.

Further Resources

<http://www.catb.org/~esr/fags/hacker-howto.html> This is the document that I read that got me started hacking. It is a great starting point.

<http://www.google.com/> This website is very secret, and not many people know about it. It will answer any question that you will have on your journey.

<http://whatishacking.org/> Is a small site with the purpose of showing the world hacking isn't bad. It has a couple of the same resources listed here.

<http://www.mithral.com/~beberg/manifesto.html> The hacker manifesto. This was listed in the document as well.

<http://www.social-engineer.org/> Social Engineering hub

<http://www.amazon.com/Social-Engineering-Art-Human-Hacking/dp/0470639539> A great Social Engineering book

Credits

This guide was made entirely by [Eminent](#). If you see this posted by anyone else, please notify me. If any of the links are ever faulty, please post in this thread, and I will fix it as soon as possible. If you have any requests for a guide then contact me and there is a great chance that I will do that for you, if not, then I will reference you to a guide that I know is better than one that I could write. Anyone who needs help further than this then I will gladly assist you (Note: I will not help you if you have not read this thread. I will not help you if you have not tried everything in this thread first). Thanks. And

liked your description of google.

borisjineman - January 17, 2012, 11:03 pm

I could know what I have to study for hacking. Thanks!

Enzoy - January 18, 2012, 12:22 am

I NEED, someone, anyone.. to teach me the ways of hacking!

polino - January 18, 2012, 12:33 am

A cool guide i found usefull, thank you! :)

uranium235 - January 18, 2012, 12:53 am

hmm really nice tut this will surely help many skids :D

lebouski - January 18, 2012, 1:43 am

nice job. It's stuff like thiks that makes this site so great

4Pur103 - January 18, 2012, 2:36 am

Looking good! thanks for sharing this guide.

hitmanben2 - January 20, 2012, 8:44 am

Thanks man for this guide. I found it really helpful considering that i am a beginner and all.

.J0K3R - January 20, 2012, 10:45 am

Thanks for the help, very interesting and helped me alot !

Hermandos - January 20, 2012, 10:54 am

This really is a great guide for me, the newbie. I saw so much samethings those are common with me and the common hackers. Many thanks

CelestiaEvermore - January 20, 2012, 12:00 pm

I'm loving the guide that you wrote, it covered a few bases I learned once upon a time when I was more active. I stepped down to avoid a terrible conflict, and now must relearn the ropes, and I feel this is a great guide for both beginners and those attempting to catch back up. I will continue soaking up all of the information I can, but this guide I'm certain to bookmark. Thank you. =^_ ^=

deadman29 - January 20, 2012, 12:35 pm

The ability to communicate and be socially understanding may be another aspect of being a hacker. One must understand how the average person operates. This can mean understanding how a person might attempt to secure a box or file or how one would naturally think of how someone else would attempt to break into the box. Thinking about the next step, I believe, is a crucial part in being a hacker. Theorizing what your victim is going to do, to prepare before he finishes his next security adjustment.

baconbob - January 20, 2012, 7:49 pm

Wow, this is actually pretty amazing, thank you.

Gh0st haly - January 20, 2012, 8:15 pm

I need help with this 2

32charrfgrgfrhtjtjtrjgegesgrsg

RWH-PF-GBS - January 21, 2012, 7:57 pm

Sorry for the ignorance but what did you mean by

"Security (PC & Network)" ?

army scunny - January 22, 2012, 12:12 am

thanks for the information for beginners was truly inspiring and very helpful or useful as you say :) and it really broadened my mind to new ideas thanks again

MK999 - January 30, 2012, 5:36 pm

Hack Manifesto !! i liked that part :D ...
nice guide and keep it up TEACHER :)

notagoodsn - January 31, 2012, 12:37 am

Very helpful and useful info, much needed and appreciated, thank you. You've already started me on the right path.

Am I mistaken in my understanding that SE is almost an in depth, sub conscience understanding of human behavior? So one must learn to navigate the human mind as proficiently as they do coding, or some other logical process?

Nocturnis1 - February 4, 2012, 7:22 am

Excellent guide. I really enjoy the fact that you went beyond just computer stuff. If everyone just mastered the use of grammar the world would be a better place.

ulti - February 5, 2012, 12:46 pm

im not a nerd so ill not become elite hacker but ill manage with script-kiddies or intermediate hacker so that i be an all rounder and the hacking field doesnt get missed from me!

LactiC - February 10, 2012, 9:03 am

Thanks for this guide, you really brought me in the right direction, haha ^^

Heirre - February 11, 2012, 8:20 am

This is a very good guide! Thank you for writing it :)

MouseOnMars - February 12, 2012, 12:41 pm

Awesome read - new to all this business, and with this guide and the resources provided I'm sure I'm getting on the right path. Cheers :)

tommehtoo - February 12, 2012, 1:39 pm

nice tut, helped me out alot:) make another?

Slimstony - February 12, 2012, 2:47 pm

Thanx for the help!! Tut is awesome

ShadowX69 - February 12, 2012, 2:52 pm

awesome thanks for the help man I will defiantly take into account everything thats here.

Avenger6666 - February 12, 2012, 4:04 pm

Thanks sir.

I Love this Guide :)

Greets from Germany ;D

asdfghjkl - February 12, 2012, 4:14 pm

Nice guide, Im new to hacking, hope to learn a lot.

mausie94 - February 14, 2012, 1:10 am

thanks a lot it really get me started

manu.mbm - February 14, 2012, 1:55 am

there is a separate forum for tht thing bro..

Kira_UsA - February 14, 2012, 1:56 am

Thanx for the help buddy ...!!

nice :- >

NeverHauntMe - February 14, 2012, 6:25 am

its really nice guide

keep guiding us like this please!

i am impressed by this guide and am searching for your other ones, you are really a teacher Hats off

yahyai-0 - February 14, 2012, 7:53 am

wow very good and intresting article

thank you

derekkk - February 14, 2012, 8:25 am

lol mediate to become a good hacker :P haha

(May 11, 2011 05:21 PM)Eminent Wrote: [\[CITE\]](#) Thanks a lot man, if anyone has anything that they think I should add, feel free to suggest it

Please message me back, i've read so many guides it's not even funny anymore. I've read over 11 i'm not coming anywhere i keep looking everywhere. All i find is outdated programs and stuff like that :(. IT's really annoying but i will keep going i spent over one year looking for help of others. "try before ask" main rule as a hacker. learnt that from a guide. I've tried pm me back if you feel like im worthy

Koerperkarle - March 18, 2012, 1:15 pm

I like the guide very much!

Cheers!

PlzHelp - March 18, 2012, 2:00 pm

@Eminent: since I just signed up I cant write you a pm-is there any other way to talk to you 1:1? plz its urgend!

ietsGoArmy - March 18, 2012, 2:35 pm

Good guide man! This is one of the few tutorials that is actually DIFFERENT then all the other ones out there. Also, every time I read the Hacker's Manifesto my body feels different, like sometimes I have a rush in the back of my head. Kinda cool.

mypizza - March 19, 2012, 10:16 am

thanks for your help dude keep it up :)

r3dh4wk - March 22, 2012, 6:10 pm

great thread ! really one of the best ... noobs are always stepped on , here feels different

Butters! - March 22, 2012, 6:18 pm

thanks buddy this was really helpful =] i guess im a step below script kiddie right now

Baysick - March 22, 2012, 6:46 pm

The Further Resources section is a must read. I read it and it had helped me. Thanks to you for making this awesome guide.

poyda - March 22, 2012, 7:18 pm

Very Good Now I Can Start Thank You So Much

Sulky - March 22, 2012, 8:53 pm

Oh boy! Thank you so much for this awesome guide!!!

fox0wnage - March 22, 2012, 9:18 pm

By far one of the greatest tutorials ever made on HackForums

Sp00nerism - March 22, 2012, 9:41 pm

I was just about to dismiss this as one of those childish "How to Hack" guides created by a noob, but it looks really good, and when i get a chance, ill take a look at it. Keep up the good work :)

Cyan1de - March 22, 2012, 10:22 pm

Thanks bro! You are awesome for taking the time to make this guide! I know nothing about any of this stuff so I know you are helping others with even less knowledge about the subject! Keep it up!

Resilience - March 22, 2012, 10:39 pm

Thanks man I'll see if it's a good guide :P

Fluxity - March 22, 2012, 10:59 pm

i need a wank

dfsklhdsikjhfkjsdfkjhsdkjfhjkdsfhkjhsdkjfhkjsdfjkhdsjkhfkjsdhfkjshdjkhksdjfhkjsdhfkjhsdkjfhdkjsjhfkjsdhfkjhsdkjfhkjdshf

Michale - March 22, 2012, 10:59 pm

Thanks for the great information. Before i thought hacking is possible only by group of people. Now got to know even individuals can hack.

b2k - March 23, 2012, 10:36 am

Excellent guide. :) perfect for the first step in hachkig world

zer0 t1me - March 23, 2012, 10:49 am

Really good guide ! Somewhere I read that hackers useally code their programs using Perl (= Programming language).

phat guy - March 23, 2012, 10:59 am

im a young hacker and that actually motivated me to become elite one day..thanks

ZectorZa - March 23, 2012, 2:32 pm

?Thanks for the help!

It was an interesting read. I feel eager to learn more about Hacking and programming...

DeonAB - April 9, 2012, 12:22 pm

nice man thanks for putting this together.

ven0m - April 9, 2012, 12:36 pm

Thanks a lot for the detailed thread.
This is really helpful.

~ven0m

most_uniQue™ - April 9, 2012, 12:42 pm

Nlce thread helped ^^ I mastered the PRO rat and poison ivy rat aned the Dark comet rat come at me ?

Cybahh - April 16, 2012, 7:22 am

Very good written. i enjoyed it alot, thanks alot OP :)

Cydp3 - April 16, 2012, 8:44 am

I am completely new to hacking and this article has pointed me in the right direction.
Very well written and very informative, thank you.

alignment - April 16, 2012, 9:27 am

In my opinion, one of the best guides on HF!
I love you, all my mates in school are Hackers.
Finally made it to RAT him and make an sqli injection to his site. thanks for this guide!

cloudcloud11 - April 16, 2012, 9:32 am

Really great guide.
It helped me out!

MetaAsy - April 16, 2012, 1:26 pm

Thank you for the guide :)
Really appreciate it.
I love how the hacking community is so noble to each other lol.

Huntxr - April 16, 2012, 1:46 pm

Can't think of one major thing that you failed to cover.

Great Topic!

Blad?s - April 16, 2012, 2:18 pm

Very nice guide you have here! I'm surprised I haven't seen it before. Good job regardless!

Catnip - April 16, 2012, 3:22 pm

Thanks a whole lot for this.
I've been a member of this site for awhile now, but I want to learn a lot more, and this will help me out a lot, thanks. c:

pdevil - June 17, 2012, 1:25 pm

thank you for guiding..i will try all these..

Froggy - June 17, 2012, 3:50 pm

Very well-written guide! I'm sure it will prove helpful to several people.

Rexus - June 17, 2012, 4:58 pm

I have just begun and this is very helpful much obliged.

Chrisr21 - June 18, 2012, 1:28 am

How about all the great Guides of HF are all made into one big book of HF

Blitzernator123 - June 18, 2012, 1:41 am

Wow this is super helpful! thanks very much mate!

"Rainy. - June 18, 2012, 2:46 am

Bookmarked, thanks alot mate..nice topic :D

King of the South - June 18, 2012, 4:15 am

A nice tut from another HQ Legit member.

What an absolute perfect job. It will definitely help a lot of people,
especially the newbies on what steps must be taken to become a true Hacker.
Keep it up Dude and i wish you more success like this in your upcoming tutorials.
Warm Regards.

Noyr - June 18, 2012, 8:36 am

thanks for the post.... really help in showing direction when entering for the first time in this field

karlo2580 - June 24, 2012, 10:14 am

This is a great place to start. Thank you for all your time and effort you put into this. :D

banush - June 24, 2012, 10:15 am

Nice Guide! i think that will help many people!

kloklo3 - June 24, 2012, 10:55 am

thanks u that helps me alot ! and i want a long text

zSpas20 - June 24, 2012, 11:32 am

Very nice tutorial, I got into someone's paypal doing a little bit of social engeneering myself.

qtpievg - June 24, 2012, 12:19 pm

A great introduction... I honestly thought I would get disintested and lose focus. Nope! Intrigued I am

panda911 - June 24, 2012, 5:51 pm

Thanx for the help buddy!
I'll definitely try all this!

karlo2580 - July 4, 2012, 1:07 pm

Best tutorial on the behavior of hackers

Sky - July 4, 2012, 4:52 pm

Cant imagine the ammount of work you put into this !!

Kudos !!?

~Arcane

susanwilson13 - July 6, 2012, 8:53 am

that script kiddies paragraph is hilarious but true

marioLuvnoneups - July 6, 2012, 10:01 am

<http://www.catb.org/jargon> is where I got started as well, but this was before I started using Linux. Oh and I loved the tutorial as well. :D Great job !

Usbandit - July 17, 2012, 3:35 pm

Thanks alot for putting in the time to write this :) It helps noobs like me :P

rockalee - July 17, 2012, 10:25 pm

thanks a lot ...i will go thru this as m a beginner

Ox3r - July 25, 2012, 11:22 am

You helped me very, thanks for this good job, thanks :)

Cydp3 - July 31, 2012, 6:54 pm

Just read this tutorial again and it's still as amazing as when I first read it.
Excellent tutorial OP.

Wulf3 - July 31, 2012, 9:36 pm

This was honestly pretty helpful. I like the general layout, but could use some graphics in there.

rongsay - August 5, 2012, 4:25 am

I like the general layout. Great!!! But could use some graphics in there.

Avolution - August 5, 2012, 5:51 am

Hey , "We exist without skin color, without nationality, without religious bias" , what can i say , thanks dear , really very gud and useful .

Bigbawsz - August 5, 2012, 6:27 am

Very very very nice guide man!
Keep it up!

shad01ite - August 6, 2012, 4:21 pm

@ Eminent

You stated...

"The great thing about social engineering is that you can use it in everyday life, wherever you go. Out of all the skills that you could learn to be a great hacker, this may be one of the most important."

You know thank you so much for this. I've been putting off learning about Social Engineering. Dont really know why, just figured I'd learn the Technical stuff first.

But I found this book on Amazon, called, "Social Engineering, the Art of Human Hacking."

I am soo getting that book, it will be the next thing I buy. Im really glad I read your post. This might have just changed the direction of my life. I now understand the importance of Social Engineering. Thanks! ?

Im a total noob, not even a script kiddie yet.

I've found alot of posts in the "Beginner Hacking" forum on this site, that really try and help newcomers to move forward.

I'm very impressed with the hacking community.

I really appreciate your effort, and "Your Patience" helping out noobs like us.

This is my beginning, and also my return (Long story). People like you give me inspiration, and a sense of community. Thanks.

Wow I have a tendency to type alot...

t?rtuga - August 6, 2012, 6:44 pm

thanks for the awesome guide dude;D

Eminent - August 7, 2012, 1:17 pm

I actually read that book a year or so ago. It is definitely worth reading ? Thanks for sharing, too. I love long responses, and I'm glad to hear how my guides affect people.

Ellakid - August 7, 2012, 1:26 pm

Dude, this is the greatest guide ever! We want more!

Eminent - August 7, 2012, 1:35 pm

(Aug 7, 2012 01:26 PM)Ellakid Wrote: [\[CITE\]](#) Dude, this is the greatest guide ever! We want more! There actually is more. This was the first of my hacking tutorials, and has long needed a facelift.

You can see an updated version [here](#)

And the most recent version [here](#)

I'm very proud of the most recent one ?

RRecovery - August 7, 2012, 1:48 pm

This was very useful and thanks for the help.

xBeroppie - August 7, 2012, 2:43 pm

thanks a lot man! you gave me a nice overview about what hacking is about ;)

learning_just - August 7, 2012, 2:47 pm

Dear Eminent!

I really dont know how to say thanks something morethan great,exellent and perefect i really apreciate it it is great.

thnx

Hasnt - August 7, 2012, 2:56 pm

Nice post man!!!!

I skimmed through a bit and it looked good!

DestinationSer - August 7, 2012, 3:37 pm

This thread was very useful to me. Thanks alot.

I have also noticed that you are right because every 'hacker' has a almost good grammar or spelling. So far every member on this forum (as ive seen) Have a great grammar/spelling..

Thanks again for posting this thread.. :)

J3sse labroccca - August 7, 2012, 3:42 pm

Thank you!

This will help my dream of becoming a computer hacker!

boss211 - August 15, 2012, 12:49 am

A good Start for starters :) Ty for the Effort bro :)

imunch - October 1, 2012, 5:09 pm

Gave it a read and it is really helpful

freekdekker - October 11, 2012, 10:56 am

Thanks for opening my eye's. You will hear from me in the future!!

wolfbyte - October 11, 2012, 11:18 am

Thanks for the guide. Any kind of help is appreciated.

killnokoh - October 11, 2012, 12:36 pm

Thank you for your guideline sir, it is a good start for a noob like me, i hope someday i will try to reach a star with out handful of dirt

hacko7 - October 11, 2012, 12:39 pm

woww i like this bro..thnxx take care

ReinePragmatique - October 11, 2012, 12:55 pm

This really motivated me and gave me some good information. A clear path for a self-starter. Awesome

crazyycast13 - October 26, 2012, 11:44 am

Great introduction, and I agree on the points you made. I consider myself as an intermediate hacker (i can program c++, java, and python) and 2 sites that i would add to your list would be <http://www.youtube.com> and <http://www.hackthissite.org>. The first one is great for tutorials, the second for all the people who just use code, but dont know how to write their own code.

germania - October 26, 2012, 12:35 pm

thanks for that awesome guide, thanks !

hacksaw24 - November 15, 2012, 2:26 am

could you send me the link for the hack?? :) ill be happy if you will teach me.

SPARTAN-117 - November 15, 2012, 5:35 am

Such inspiring words, this guide will light up my way through the world of hacking.

kokio - November 15, 2012, 5:48 am

Nice contribution ^.^ very well set out. Thank you

StroppyRhyme - December 5, 2012, 6:43 pm

This was a amazing tutorial which started me on programming and 1 thing leads to another.... Thank you... Honestly

~Stroppy

scorpionwally8 - December 5, 2012, 8:24 pm

Very nice write up mate should be a good read for all us new peeps

Cragle - December 5, 2012, 8:28 pm

Just going to reiterate what everybody else has already said, great tutorial, mate. Should really help a few beginners get their ground work in hacking down.

awesumninja123 - December 5, 2012, 9:33 pm

Thanks for enlightening me on the arts of h4(k5 :). This will surely help me expand my curiosity even further!

Th0m - December 6, 2012, 11:09 am

Nice. Thanks for your great post.

I'll try anything to learn!

Have read a lot last days..

jake27 - December 6, 2012, 11:35 am

omg you helped me out very much thanks!!!

ratboy13 - December 30, 2012, 3:21 am

thanks for the help. im learning alot about all of this its really fun!! :)

iPerfeciionz - December 30, 2012, 3:28 am

awesome thanks for the help, this is a great guide

casque12 - December 30, 2012, 3:46 pm

Good job bro :)

Nerver found something like this before :)

Bugs Bunny - December 31, 2012, 8:59 pm

Wow thanks bro this really helped i'm new to this so yeah

SparcMac516 - December 31, 2012, 9:40 pm

i wan to bi a hackar ples i veri gud

bitter.venom - January 19, 2013, 5:45 pm

thank you man thanx again you are really helpful

D2jsp - January 19, 2013, 6:53 pm

Good thread, read it and learnt quite a bit :)

togozzer - January 19, 2013, 7:45 pm

This Thread is a good laugh and a great guide for them skiddies.

adz1 - January 19, 2013, 9:43 pm

Gonna read everything you posted, was really interesting thanks!

Sefyer - March 19, 2013, 10:57 pm

Good information, good tutorial. This really helps me a lots as a beginner.

Thanks

?ICE? - April 5, 2013, 5:36 pm

Great thread...but how about the people who code programs but use skiddy programs to have fun every now and then? XD

gulfwolf - June 15, 2013, 10:53 pm

Thanks for the guide its very helpful

KNOWLEDGE - June 15, 2013, 10:58 pm

I recommend this for any starter, sounds really reliable in depth.

DaxterHCK - June 16, 2013, 8:27 am

Hi you all, in my first post :)
Very nice work dude, thanks.

Anonn - June 16, 2013, 8:36 am

Thanks
)??
????????????????????????????

Zetix - June 16, 2013, 8:43 am

"How To Be A Hacker" Nice guide mate, thanks for posting :)

Wumbo - June 18, 2013, 4:22 pm

Just learning and your guides are very helpful thanks

hsuchister - August 12, 2013, 10:39 pm

Good job. Please keep it up nice guy.

Nino_XxX - August 13, 2013, 1:06 am

Thanks! I did it all in a few weeks. Really Thanks!

aptukoe - August 17, 2013, 6:34 am

Thanks for spending your time to make this

CX007-KHS - August 17, 2013, 4:00 pm

lol i am a hacker :p hahahah thanks for this :D

Basic85 - August 18, 2013, 12:47 am

Great guide. It's a great way to start out.

Blax - August 18, 2013, 12:49 am

Great Guide. Keep up the good work.

King Xerxes - August 24, 2013, 1:13 pm

Thanks a lot man, its a good read and I'll definitely try

L?renzo - August 24, 2013, 1:14 pm

Thanks for making this. Sure a lot of people will find it useful!

sam1006 - September 5, 2013, 10:45 pm

Very good write up ...

This is help in a lots of way...

Thanks ..

COOL_KILLER - September 7, 2013, 3:55 am

Thank you sir! Your tutorial really good for any newbie. Its well explained.

T0ucaNSaM - September 7, 2013, 5:09 am

This is good!! Especially for someone completly new. I like how you included the slang and different specific reas one should be researching in of interest such as S.E. , WiFi hacks .

Maybe next time might as wel for the n00b some {{HOT}} LINKS of threads from the HF. Sometimes n00bs read and dont bother exploring for the first couple of weeks.

Kyte - September 7, 2013, 5:15 am

I liked it, made good reading. Thanks for posting this, also made me consider meditation!

NoobieAF - October 8, 2013, 4:26 pm

Thanks! This helped a lot. I'll try this out soon :)

unenergizer - October 8, 2013, 5:35 pm

This is a very interesting read. Thank you for this. /bow

Blackout08 - October 16, 2013, 4:54 pm

This is a very good tutorial. I've been going through alot of these recently and i really like this one. Thanks for sharing it!

Skrap - October 16, 2013, 7:34 pm

Great Post ! ?

it taught me what i needed to know

xtrememachine101 - October 16, 2013, 10:46 pm

Great post i learnt a lot into how the system works thanks

ttejas - October 25, 2013, 9:21 am

Thanks for the help sir that really is very helpful

telogrng - October 25, 2013, 9:51 am

I'm a noob.. a long way to go up there.. thanks, for the guide..!

zer0two - October 25, 2013, 4:02 pm

Would add rep to you if I could. Great tutorial and loved the small website known as google part.

JW1337 - October 25, 2013, 4:30 pm

sick guide man, especially the respect part

Christmas Eve - October 25, 2013, 7:27 pm

This is one of the best tutorials I've seen yet.

Thanks for sharing this OP.

I'm sure it will help me and many others in the future.

Guardian™ - November 29, 2013, 11:34 am

thank alot for the guide. Really good guide!

christerloveless33 - December 7, 2013, 10:00 pm

Awesome, Next on my to-do list is learn batch coding.

zixpersona - December 8, 2013, 12:30 am

Nice post thanks for the help ill definitely try this

Zabuza? - December 8, 2013, 12:53 am

Thanks man, very HQ. Trying to decide if I'm intermediate or script kiddy. What do you guys think? I use others programs a lot, as well as online booters... though I understand how they work. I am learning code and all, and I'm learning how to use many programs, and I usually/sometimes understand what I'm doing.

matramlee - December 8, 2013, 12:54 am

hi...i am a new member from malaysia....your thread inspire me to learn more about networking, programming and HACKING..thank you very much...next month i will get a job of networking...i just only got basic networking knowledge..but they say nevermind, they will teach me...so i hope y'all pray me for success....i dont want to get fired....haha....ok

p/s: i think i'm in a category of between the script kiddy and intermediate....

Vets - December 8, 2013, 2:04 am

Thanks for this awesome guide buddy ! :)

wowsuchpro - January 5, 2014, 1:48 pm

I love you dude, raised my morale, good guide!

jiks - January 5, 2014, 2:40 pm

Thanks for your article. its cognitive

reaand - January 5, 2014, 2:41 pm

Nice guide bro, keep it up, For start is good. :P

557badboy - January 5, 2014, 2:58 pm

Very nice, well-sorted and organised thread.

Leland22 - January 5, 2014, 3:39 pm

Excellent guide! Thanks for your hard work!

MR. BOYKA - April 14, 2014, 6:41 am

thankxxx eminent
it's appreciates me

illum - April 14, 2014, 1:44 pm

This is a great guide, very good grammar and punctuation. Perfectly written, and easy to read.
Thanks!

Greyhat99 - April 14, 2014, 2:01 pm

This looks like a great guide. Another thing I would like to point out for style is that people should try ARG's. They make you think, and they develop your skills to observe different aspects of a website, solve puzzles, and really get you to think outside of the box like you should do when trying to find a vulnerability for a server or website.

ThunderBit - April 14, 2014, 2:11 pm

Thanks for this. I think it's a good guide.

Ninth - April 14, 2014, 2:35 pm

This will definitely help some people learn a lot more! Good post :D

MR. BOYKA - April 19, 2014, 10:08 am

hey bro

i have read many hacking tutorials so that i'am confused to start from where...

can u help me

i hope u would

xXxAlphaxXx - June 9, 2014, 2:32 pm

Thanks for awesome thread. Helps me a lot :D

corkcity2011 - June 9, 2014, 4:29 pm

I am brand new to this forum and I found this an excellent read and place for people like me to start out.

Thanks very much for giving me all these resources

Freddy K. - June 9, 2014, 5:01 pm

I feel ike a script-kiddie. I Am a noob at hacking, but i am slowly getting better..

Goodies - June 9, 2014, 5:02 pm

If you're looking for an actual introduction to legitimate hacking, check out my sig!

Mxments - June 9, 2014, 6:23 pm

Great Job helped me a lot I will definitely keep using this in my hacking journey

Lord Helios - June 9, 2014, 8:09 pm

How to be a hacker:

Step 1 - Open your start menu.

Step 2 - Type run.

Step 3 - Type cmd.

Step 4 - Click cmd.

Step 5 - Type ipconfig.

Step 6 - Press enter.

Step 7 - Go back to step 5.

Step 8 - After one year of doing this, you will be a hacker.

Newbie.NuNu - August 18, 2014, 3:26 pm

Did you get my post or my letter that the board took down btw?

I dont know how else to get to you but can you just pm me instead,Ima bit lazy and I have no idea what I can go around posting up to 25 times.Love your avi btw,I too am I anime lover .tc I hope I hear from you because I was hoping I could download this file instead of reading this board. I would like to have this as a rar file,so I can print this out. Anyhow get back to me thank you.

keesvvaal - August 18, 2014, 3:43 pm

Very nice and a detailed guide. Thanks alot for Eminent, this will help alot of people.

Spider86 - August 18, 2014, 5:03 pm

Nice thread. Definitely gonna try this.

aidinpearce - August 18, 2014, 7:33 pm

Great read bookmarked thanks alot :)

Keith Ape - August 18, 2014, 8:08 pm

Awesome thread!

Love the design and layout too.
This should help a lot of people!
10/10 Chipotle Chicken Burritos!

NinjAmovesPr0 - October 19, 2014, 12:14 am

Its great motivation for a wannabe hacker to get into it. Keep up :D

farokh - November 2, 2014, 4:37 pm

Thanx for the help buddy!!!
I'll definitely try all this!!!

unrealirc - June 8, 2016, 4:07 am

Thanx for the help buddy!!!
I'll definitely try all this!!!

ticorwin - June 8, 2016, 5:29 pm

Great guide, thank you for posting it!

super_admin - October 6, 2020, 11:45 pm

Thanks a lot ! This is very helpful !

Daemon1337 - November 16, 2020, 12:40 am

this post helped me a lot, thanks :)

CyberMan.EXE - November 17, 2020, 9:43 am

i want to know how to hack please. Teach ME!!!

highboy - July 1, 2023, 11:39 am

Thank you so much for taking the time to share this tutorial! It's incredibly helpful, and I appreciate your effort in explaining everything so clearly.
