Hello people

this is my first post, so i will try to make it simple.

I found his website [ProperFX Invest](#). It is a hyip, but they look very serious. they also have a forum and a live chat.

I got money from them (see payment proof below)

Basically you have to register and invest in any of the plans using AlertPay, LibertyReserve and Perfect money ! and wait... then get money !! :D

I hope this helped ! Enjoy your earnings :D

Be careful with HYIPs, many legit ones have been known to take your money and run after a while.

My advice: go for HYIP's with low rates but instant payout. Delomare.com is a great one.
