Thread: [\[Tutorial\]Formatting Phone Memory](#)

Sikandar - August 23, 2009, 3:07 am

there are some tricks how to reformat the phone memory

#1

1. Turn your phone off
2. Press --- power * call 3 --- all at the same time
- 3 Hold it until the phone will turn on and its should have something that says "formatting"

----> this method is usually hard because some phone's certain keys are far from each other...
practice practice and practice

#2

when your phone is on..

just dial *#7370#

-i tried this to some phones but it doesnt work

but it works on other phones

#3

go to settings...

full factory reset....

there you go guys.....

tested on nokia only.....goodluck

muumifani - August 23, 2009, 8:28 am

You mean like press power,call,* and 3?

Sikandar - August 23, 2009, 8:33 am

yeah....too short.....

ZEROF - August 23, 2009, 3:53 pm

I can't use this method with MOTOROLA phones,some idea ?

Sikandar - August 23, 2009, 9:36 pm

ow....i think it would be better if you'll go to a cellshop dude....

Ihha - September 17, 2009, 12:21 am

Can i use in China Mobile Phone

MrBarca10Messi - September 17, 2009, 2:17 am

omg.... i use a total different way LMAO!

TheBlackMarket - September 17, 2009, 2:34 am

Nice, i will try that.

Sikandar - September 17, 2009, 3:11 am

if these some of these methods doesnt work....im sure restore factory settings will do the job...

alt0160 - September 17, 2009, 6:38 pm

#1 & 2 are for Nokia phones only.

#3 is pretty much universal.

#1, if you search the net.. they've coined this term as "Three Finger Salute".

This is a hard reset for S60 phones.. this method will also vary if your phone does not have physical keypad (Nokia 5800).

In this case it would be the [SEND + END + CAMERA] keys.

I'll add one while I'm at it.

To do a complete reset (erase all personal info) on a BlackBerry:

Options > Security Options > General Settings > MENU button > Wipe Handheld

You'll be prompt to type the word "Blackberry" to continue.

Do this will remove all the settings/info that you've configured on your BlackBerry.

Sikandar - September 17, 2009, 9:00 pm

thankz for the extra info...
