Thread: [\[Tutorial\]How to make your Server.exe FuD \[NO Crypter Needed!\]](#)

xSkid - May 15, 2011, 7:08 pm

How to Crypt your Server

[It will Help, only a little!]

PART ONE

- 1) Click on your Server.exe
- 2) Right Click the Server.exe
- 3) Click "Properties"
- 4) Near the Bottom Click "Advanced"
- 5) Click "Encrypt Contents to Secure Data" .
- 6) Click "ok"
- 7) Done!

PART TWO

DOWNLOAD: <http://goo.gl/o7YPS>

- 1) Download a Assembly Changer.
- 2) Change The Name,Description and Everything to "Hijack This"
- 3) In the Copyright put "Trend Micro 2011 ©"
- 4) Click "Save" or "ok"
- 5) Done!

PART THREE

DOWNLOAD: <http://goo.gl/5ispz>

- 1) Download our String Scrambler.
- 2) Select your "Server.exe"
- 3) Click "Encrypt Strings"
- 4) Done!

You've just helped crypt your server ;) Enjoy!

How Do these programs work?

The Assembly Changer is preety basic, it changes the assembly of the program/server.exe to look like another program, and can distract anti-virus's.

The String Scrambler Works like this,

Example: You have a startup Code.
Code Start.form1

It will make that "start" and ".form1" seem like its scrambled.
Code SDFA.AXS1
But , the catch is, the program can still read it [ie: windows]

If you need any support, or have any questions, please contact me your friendly xSkid!

vapourx7 - May 16, 2011, 1:10 am

Can anyone confirm this? Kinda dodgy

xSkid - May 16, 2011, 1:14 am

Whats "kinda dodgy"

This wont make it FULLY FuD, it will only make it 1/6 or 2/6

ie: 10/33 or 6/33 detection.

its better than 6/6 or 33/33

satz3satz - May 16, 2011, 1:21 am

Wow its grt idea..

i have fud source i can put that & check it out..

thnx buddy..

The Enforcer - May 16, 2011, 1:57 am

hope it works might try this out...

Adonis - May 16, 2011, 2:03 am

I really hope this works. Seems too good to be true. Ill test now.

d3d0h - May 16, 2011, 2:50 am

Anyone that tested??? Confirm it works then plz...

vapourx7 - May 16, 2011, 3:08 am

Yes, please do confirm whether its working or not. Can someone upload a virscan aswell?

sWEeTBoY - May 16, 2011, 3:11 am

i like it very nice TUT

thx

xSkid - May 16, 2011, 3:53 am

Thank You for the great response's ;)

Its very easy to get this to work, ;) its really what crypter's do, but you just download free-ware tools and you can get your own FuD crypter without any stubs!

Thanks once again.

If anybody is having any issues, please do PM me.

d3d0h - May 16, 2011, 4:13 am

How long will it stay FUD? Can you post a Scan of your FUDDED server?

ComX - May 16, 2011, 4:16 am

(May 16, 2011 01:14 AM)xSkid Wrote: [\[CITE\]](#) Whats "kinda dodgy"

This wont make it FULLY FuD, it will only make it 1/6 or 2/6

ie: 10/33 or 6/33 detection.

its better than 6/6 or 33/33

Then it is UD not FUD

FUD= Fully Undetectable

UD=Undetectable

There is depends mate :D i hoped i helped :)

Thx for TUT ?

poision-v1p3R - May 16, 2011, 4:42 am

i checked the Part 1 not working... see my result..

File Nmae: server.exe

Submission date:

2011-05-16

Current status:

queued queued analysing finished

Result:

43/ 43 (100.0%)

xSkid - May 16, 2011, 4:50 am

(May 16, 2011 04:42 AM)poision-v1p3R Wrote: [\[CITE\]](#) i checked the Part 1 not working... see my result..

File Nmae: server.exe

Submission date:

Result:

43/ 43 (100.0%)

Please use the assembly changer too.

alekovo - May 16, 2011, 5:26 am

Can you explain why the "Hijack This" and "Trend Micro 2011 ©" are the magic words ?

If there is anything else instead of them, will it work in the same way ?

Just want to know :D

Freddy Kru?ger - May 16, 2011, 5:34 am

THIS doesnt make it completely FUD but its better than nothing oh and does this work with a cybergate server or does it corrupt it ?

Skittles- - May 16, 2011, 5:50 am

(May 16, 2011 05:34 AM)the_damned_one Wrote: [\[CITE\]](#) THIS doesnt make it completely FUD but its better than nothing oh and does this work with a cybergate server or does it corrupt it ? try it and see if it corrupts it or not...

xSkid - May 16, 2011, 2:27 pm

(May 16, 2011 05:34 AM)the_damned_one Wrote: [\[CITE\]](#) THIS doesnt make it completely FUD but its better than nothing oh and does this work with a cybergate server or does it corrupt it ? Most likely will not corrupt.

Chance's are very low.

popop - May 16, 2011, 4:28 pm

I tried it but the 2nd step, using the assembly changer, gives me this error "The specified resource type cannot be found in the image file" (CG server)

Unfortunaly, doing only 1st and 3rd steps doesnt change nothing, it gives same number of detections.

Jeteater13 - May 16, 2011, 5:22 pm

(May 16, 2011 04:28 PM)popop Wrote: [\[CITE\]](#) I tried it but the 2nd step, using the assembly changer, gives me this error "The specified resource type cannot be found in the image file" (CG server)

Unfortunaly, doing only 1st and 3rd steps doesnt change nothing, it gives same number of detections.

me too. i tried using my own .ico file, but it didn't work. any help?

xSkid - May 16, 2011, 10:57 pm

(May 16, 2011 05:22 PM)jeteater13 Wrote: [\[CITE\]](#) me too. i tried using my own .ico file, but it didn't work. any help?

Follow this...

- 1) First Just do the normal 1st Step.
- 2) Then use the Assembly Changer.
- 3) THEN< use the String Scrambler.

screenbuster - May 16, 2011, 11:38 pm

i like it very nice TUT
thx

d3d0h - May 17, 2011, 1:49 am

How much Fud is it???? Post virusscan plz =]

xSkid - May 17, 2011, 4:08 pm

(May 17, 2011 01:49 AM)d3d0h Wrote: [\[CITE\]](#) How much Fud is it???? Post virusscan plz =]
Well your looking at a small difference,
{Its better than nothing!}

NON-FUD: 6/6
MY METHOD: 1/6 - 4/6

Unkown_law - May 18, 2011, 5:58 am

Hi I have downloaded the toolkit un detection and fill out everything as it should but then I press save info and he says this:

"The specified resource type can not find the image file"

Unkown_law - May 18, 2011, 5:58 am

Hey mate! ;)

Sorry for not answering your last question, a tad busy.

Please download a icon or a icon pack and make sure to select one of the .ico files.

You need to have a icon ready. ;)

Sorry for not mentioning that.

Arya Stark™ - May 18, 2011, 8:05 am

Hey mate!

To get rid of Avira, your stub needs a bigger sized icon
[350KB - 500KB HD ICON] and it will remove the Avira. ;)

Hope that helped, also consider adding some junk code to the stub.

Rukkas - May 18, 2011, 5:21 pm

(May 18, 2011 05:17 PM)xSkid Wrote: [\[CITE\]](#) Hey mate!

I Will definitely try this. Ill post back in a few minutes. Again with before and after effects.

xSkid - May 18, 2011, 5:28 pm

(May 18, 2011 05:21 PM)Rukkas Wrote: [\[CITE\]](#) I Will definitely try this. Ill post back in a few minutes.
Again with before and after effects.

Alright ;)

Also if you need a junk-code generator,

On my first Post, there is a tool called "Assembly Changer" , download that & it will have a junk-code generator. ;)

Also, the basic stuff..

1) Try to change some strings on your Stub.
[I have another thread on this...]
[Strings Normally Start with DIM Crypt As etc...]

2) Change the Icon to a HD Icon

3) Use a cracked tool to Obfuscate the program.

Rukkas - May 18, 2011, 5:33 pm

I cant find any Icons that are bigger then 93kb. My stub is fine. Ive scanned it. it doesn't get detected. When i crypt my server, is when the detection arises. I'm still looking for icons to use, and

see if it bypasses avira.

xSkid - May 18, 2011, 5:47 pm

(May 18, 2011 05:33 PM)Rukkas Wrote: [\[CITE\]](#) I cant find any Icons that are bigger then 93kb. My stub is fine. Ive scanned it. it doesn't get detected. When i crypt my server, is when the detection arises. I'm still looking for icons to use, and see if it bypasses avira.

Ok, lol. i will need to write-up a smaller Tutorial right here on the stop for you.. so let me start.. ;)

NOTE: Please get a fresh stub, that has not been obfuscated or anything, no extra-additions, no assembly change, nothing a clean stub that is detected, we are going to be RE-FUDING it.

And yes.. i just made this for you.. right now...

Step 1

1) Download The Following

<http://www.mediafire.com/?6jqgzronzgw55oa>

2) Extract the Program and start it, when the program starts you will see 3 tabs on the top, select "Assembly Changer", You are now into a new form.

3) Now on the top click "open" and select your Stub that is NOT FuD.

4) Put "Hijack This 2007" into ALL of the forms/textbox's, when you get down to "product version" tap on the Yellow Thing next to the Textbox a few times, do the same for the next one, "file version"

5) Now Download THIS icon, and select the "open" at the last textbox.

SIZE ICON: 361KB

DOWNLOAD: <http://www.mediafire.com/?3jk883synuxdzdl>

6) Find where you saved the Icon, and select it.

7) Click "Save Info"

DONE..

Step 2

1) Download This Cracked Tool.

DOWNLOAD: <http://www.mediafire.com/?ixcnvod586dxt6s>

2) Open the tool, in the top tab, select "Application"

3) Click "Add"

4) And select your Stub that we have just added a icon too and

changed the assembly.

5) In the Dropbox Below, where it says "Preset" , select "Null" , PLEASE DO NOT SELECT ANYTHING ELSE.

6) Then Click "Xenocode Application".

Done. ;)

Enjoy...

Rukkas - May 18, 2011, 6:38 pm

Okay so I've followed everything completely. Tried it numerous times, with different files. still getting this output.

(May 15, 2011 07:08 PM)Cod3ing Wrote: [\[CITE\]](#) How to Crypt your Server
[It will Help, only a little!]

PART ONE

- 1) Click on your Server.exe
- 2) Right Click the Server.exe
- 3) Click "Properties"
- 4) Near the Bottom Click "Advanced"
- 5) Click "Encrypt Contents to Secure Data" .
- 6) Click "ok"
- 7) Done!

PART TWO

DOWNLOAD: <http://goo.gl/o7YPS>

- 1) Download a Assembly Changer.
- 2) Change The Name,Description and Everything to "Hijack This"
- 3) In the Copyright put "Trend Micro 2011 ©"
- 4) Click "Save" or "ok"
- 5) Done!

PART THREE

DOWNLOAD: <http://goo.gl/5ispz>

- 1) Download our String Scrambler.
- 2) Select your "Server.exe"
- 3) Click "Encrypt Strings"
- 4) Done!

You've just helped crypt your server ;) Enjoy!

How Do these programs work?

The Assembly Changer is preety basic, it changes the assembly of the program/server.exe to look like another program, and can distract anti-virus's.

The String Scrambler Works like this,

Example: You have a startup Code.

Code Start.form1

It will make that "start" and ".form1" seem like its scrambled.

Code SDFA.AXS1

But , the catch is, the program can still read it [ie: windows]

If you need any support, or have any questions, please contact me your friendly xSkid!j'ai un petit probleme avec l'image , je mes une image et il ne veux pas il marque , le type de ressource ne peux pas être trouver aider moi svp :(merci a tous

SIM-947411 - January 17, 2012, 4:35 am

Can anyone confirm this? Kinda dodgy

tezz - January 17, 2012, 5:47 am

Guyz on Windows Xp there is only General,Version,Compatibility,Summary

There is no "Advanced"

Edit:i got it sorry for posting this and it works nice
still better than 32/32
scanned on virus total 24/41 here is the scan

TheNeutron - January 17, 2012, 6:29 am

Some nice tools you're using there mate..

Very nice share! Great job...!!! :D

snipzor78901 - January 17, 2012, 6:38 am

Tested, on Virus Total, Detection before was 43/43 after I did this it was 14/43, good job.

hackernewbieNL - February 10, 2012, 7:43 am

I have a problem :(

When I want to change something in properties in the server, he says that I have to be admin to perform that, but I am ?

Using cybergate btw.

Somebody knows what I have to do?

EDIT

Srry people I already solved it, AVG was doing annoying?

erypmav - February 10, 2012, 7:54 am

guys just look at the rep and dont download his files

bobbyprince89 - February 10, 2012, 3:23 pm

hmm... very low rep. highly suspicious.. shame because in theory this sounded great

(May 15, 2011 07:08 PM)Cod3ing Wrote: [\[CITE\]](#) How to Crypt your Server
[It will Help, only a little!]

PART ONE

- 1) Click on your Server.exe
- 2) Right Click the Server.exe
- 3) Click "Properties"

4) Near the Bottom Click "Advanced"

5) Click "Encrypt Contents to Secure Data" .

6) Click "ok"

7) Done! This is standard windows aka M\$'s EFS. You can encrypt the files/server with this method but to decrypt it you will have to in same windows machine where you have encrypted it. The encryption is done by using certificate which resides in your machine not in your victim machine. Logically your server should not work at your victim machine.

SchoolHacker97 - February 16, 2012, 5:08 am

Awesome thanks for the share, ill check it out later.

franzzz - June 22, 2012, 2:36 am

I dont know if that worked before but now the detection rate is same than before doing those things lol. And I don't think that part one will work on slave's comp :/

EpicLee - June 22, 2012, 4:03 am

hope it works might try this out...

vagabund132 - July 30, 2015, 2:18 am

Has anyone got the string scrambler for a download?? Thanks

Armada - July 30, 2015, 7:41 am

Dont grave dig dumbos....

Also this method is ineffective the following post stated.
