Thread: [Delphi Basic Tutorial \[Basic Bat Maker\]](#)

Symbiotic - August 23, 2009, 12:57 pm

For all of my Delphi tutorials and snippets check out:

<https://hackforums.net/showthread.php?tid=702578>

1. What is delphi?
2. Why should I get it?
3. Where can I get it?
4. Making a simple BAT maker.
5. Compiling your project.

1. What is delphi?

Delphi is a powerful programming language. It uses easy to understand coding, that allows you to make graphical user interface applications with ease. Delphi is (as said on codegear.com) "is the RAD Visual development environment for software and database application developers who need to rapidly deliver high performance and easy-to-maintain software applications."

2. Why should I get it?

Have you ever wanted to make a keylogger, RAT, or anything for that matter that was powerful, looked professional, and didnt take you a long amount of time to code due to easily memorizable codes? If so delphi is for you. It has powerful codes, you can customize your form (add buttons, panels, radio buttons etc) and you can make an application in a day, less once you get better at it. (Dont expect to make a good rat/keylogger in under a day though.)

3. Where can I get it?

You can go to <http://www.codegear.com>, torrent it or find a free one like Turbo Delphi.

4. Making a simple BAT maker. (Pics)

Start up Delphi 2009, or any other delphi. Once your in create a new project and add a form.

Spoiler ([Click to View](#))

[IMG]http://i277.photobucket.com/albums/kk68/sadr_disturbed/delphitut1.jpg[/IMG]

Now create a memo and add about 9 buttons to the form. Spread them out, make it look nice. Now take button 1 and put it directly under the memo. Rename it to Copy Code.

Spoiler ([Click to View](#))

[IMG]http://i277.photobucket.com/albums/kk68/sadr_disturbed/delphitut2.jpg[/IMG]

Rename button2 @echo, button3 taskkill, button4 avg, button5 remove direc, button6 create .txt, button7 delete file, button8 shutdown, button 9 Firewall.

Spoiler ([Click to View](#))

[IMG]http://i277.photobucket.com/albums/kk68/sadr_disturbed/delphitut3.jpg[/IMG]

Add a tedit under taskkill, remove direc, create txt, add 2 tedit under delete file. Name them what ever you want.

Spoiler ([Click to View](#))

[IMG]http://i277.photobucket.com/albums/kk68/sadr_disturbed/delphitut4.jpg[/IMG]

(Even if your good with .bat, use the bat codes i use so you can follow along easier.)

Now for the coding double click on @echo and add this code:

```
Code memo1.Lines.Add('@echo ');
```

Double click on avg (we do ones with tedit last) and add this code:

```
Code memo1.Lines.Add('Taskkill /im avgtray.exe ');
```

Double click on shutdown and add this code:

```
Code memo1.Lines.Add('Shutdown -s ');
```

Ok now double click on firewall and add this code:

```
Code memo1.Lines.Add('netsh firewall set opmode mode = disable ');
```

As you probbly noticed the code is really self explanatory. What those did was add a new line to memo1, and added text. Now on to the ones with tedit under them.

Double click on taskkill an add this code:

```
Code memo1.Lines.Add('Taskkill /im '+edit1.Text);
```

Ok now lets do del direc, add this code:

```
Code memo1.Lines.Add('rd /s /q '+edit2.Text);
```

Lets do file, this one requires 2 lines of code:

```
Code memo1.Lines.Add('dir '+edit3.text);
```

```
memo1.Lines.Add('del '+edit4.text);
```

Ok create text now:

```
Code memo1.Lines.Add('notepad.exe '+edit5.text);
```

Now double click on copy code and add:

```
Code memo1.selectall;
```

```
memo1.copytoclipboard;
```

```
showmessage('Copied Code');
```

5. Compiling your project.

Go to Project (menu bar), scroll down to compile, when it finishes go back and hit build. Myn is save into Documents\Rad Studio\Projects, but its customizable. Now you have an .exe that you can use to make .bat files.

Now of course i hope you make a more advanced bat maker, i tried to keep it as simple as possible but still help you learn.

Note: I will NOT explain every peice of code does if you have questions please reply in the thread, don't pm me.

Thank You. Great tutorial. Much appreciated.

Symbiotic - August 23, 2009, 1:10 pm

Your welcome, if enough people like it i am going to start a delphi training series on youtube

valmar - August 23, 2009, 8:31 pm

make one :D I want a youtube tutorial series.

Back_track - August 23, 2009, 8:58 pm

Add a save feature... I mean there is a save file dialog lmao

I'll rep you if you figure out how to save it as a .bat and... @ echo off should be automatic

Romeo. - August 24, 2009, 12:56 am

This thread makes me to think about delphi ...

Look like a nice language, and it doesn't look so hard ...

Back_track - August 24, 2009, 12:57 am

...

Try doing .Dll injection & Memory Execution in Delphi ;p

CheGuevara? - December 30, 2009, 3:46 pm

This thread made me wanting to start learning Delphi! And I am about too, all I want to learn is to make small programs. Not RATs/Keyloggers! Thank you for this thread, really! Awesome guide.

Hope to see more of those guides!

Symbiotic - December 30, 2009, 4:08 pm

Thanks, i am actually taking a break from coding so it might be awhile before i make another.

newbie223 - December 30, 2009, 5:02 pm

guys delphi is nice to learn the one disadvantage is that there's not much tutorial on it or finding the cracked version xD

S?Nk - December 31, 2009, 3:06 pm

Yea Delphi seems like a great language. I just am already trying to full time my vb.net education before I do anything.

Leg4cy - April 7, 2010, 9:28 pm

Thank You. Great tutorial.

Symbiotic - August 28, 2010, 10:40 pm

The Delphi section is dying, so hopefully me bumping my basic tutorial will get users to consider trying it =/

Symbiotic - August 29, 2010, 7:56 pm

Almost 450 views and only like 7 comments from people other than me? Thanks for the feedback...

Mapex - August 29, 2010, 8:00 pm

FreePascal tutz pl0x.

//thismessageisnolongertobeposted.

Ace of Spades - October 12, 2010, 10:47 am

D4mn mate, beautiful TuT :D

Symbiotic - October 30, 2010, 2:22 pm

No problem glad everyone enjoyed it.

keezy619 - January 30, 2011, 12:19 pm

I appreciate this tutorial, I'm thinking of creating a Crypter in Delphi if that's possible

Fullmetal2 - February 4, 2011, 11:23 am

nice share.. i LOve your tutorials. i gona stick on Delphi =]

Level 85 Tauren Chieftain - February 20, 2011, 5:12 pm

Great tutorial, this has inspired me to put a hold on learning Perl and start on Delphi.

Symbiotic - February 20, 2011, 5:13 pm

My favorite part of your response :D has given me hope in the human race.

HappyMan - April 9, 2011, 1:25 am

When I try to run I get an error: [Fatal Error] Could not create output file 'C:\Program Files (x86)\Borland\Delphi7\Projects\Project2.exe'

help

DrSponge - April 9, 2011, 7:56 am

That might be die to you already have a Project2.exe running look in task manager and end the Project2 exe :)

gman88 - August 26, 2011, 12:13 am

wicked tutorial man, this is my 3rd program in delphi and already lovin it

craftier - September 9, 2011, 4:55 am

Export to .Bat

var

```
Form1: TForm1;  
myFile : TextFile;  
text   : string;
```

```
procedure TForm1.Button12Click(Sender: TObject);  
begin
```

```
AssignFile(myFile, edit7.text);  
ReWrite(myFile);  
Write(myFile, Memo1.text);  
CloseFile(myFile);
```

mark66 - January 7, 2012, 12:03 pm

Uhm, i've done everything u said, compiled and all. But when i try to run it, the cmd box pops up and away again quickly:S

What have i done wrong here?

se7Ro - April 25, 2012, 7:44 am

Works very good, I created a Button with this Code:

```
Code procedure TForm1.Button5Click(Sender: TObject);
begin
  saveDialog1.Title := 'Generate .BAT';
  saveDialog1.InitialDir := GetCurrentDir;
  saveDialog1.Filter := 'BAT File|*.bat';
  saveDialog1.DefaultExt := '.bat';
  // Display the open file dialog
  if saveDialog1.Execute
  then Memo1.Lines.SaveToFile(savedialog1.FileName);
end;
Filter: Batch File only | *.bat
```

Very easy :_)

Jakem4 - May 12, 2012, 8:04 am

Nice tut! but delphi looks a little weak to be my first "real" language from which i base my entire knowledge of Computer science, So C++ it is. but nice work! adds a little spunk and great for programmers who know other languages and are looking to branch out into RAD

GhabXPH - May 12, 2012, 8:48 am

I think i should learn this one.. This one is really great..

Merc35 - May 6, 2015, 5:00 pm

Hey, I'm loving this stuff, thanks for the great tutorial, I know I am digging up an old thread, but sometimes it happens !! ?

FOXPRO - May 19, 2015, 11:00 pm

Thanks, i am actually taking a break from coding so it might be awhile before i make another.

BETERZ - June 1, 2015, 2:58 pm

Thanks for sharing went pleases me very much

Zravel - September 5, 2015, 9:54 am

Can I earn money by Rating other people ?

SIM-2908357 - January 1, 2016, 2:13 am

Great resource buddy, thanks for sharing!

Securifier - August 19, 2016, 3:44 pm

Very nice tutorial HQ member
