Thread: [Morph3s chat server/Client source included WITH GUI](#)

Morph3s - May 17, 2011, 6:40 am

Hello HF

I've coded this chatting server + client,

It uses sockets to send and recieve connections

So far it doesnt support mutiple connections, but i will do that in some time ;)

I've coded this in 2 days

The gui modules it uses, is Wx.Python

Please any feedback on improving my code will be Appreciated

Screenshots of the Server Edition:

[IMG][http://i55.\[censored\].com/sxdvfq.png](http://i55.[censored].com/sxdvfq.png)[/IMG]

Screenshots of the Client Edition:

[IMG][http://i53.\[censored\].com/2cq05x.png](http://i53.[censored].com/2cq05x.png)[/IMG]

Client source code:

<http://pastebin.com/JWQZwqE1>

Server source code:

<http://pastebin.com/Ru8DQe14>

Known bugs:

1. Problem closing the windows(Haven't looked into the reason why it does that yet)
2. When u close the program, some time after (Untill reboot) It will say that the port you used is still in use(Therefore if you're using the program twice, use different ports!)

Howto use:

Pretty straight forwarded, but heres a little tut

1. Open the server version
2. specify a username
3. Press options
4. Enter your LOCAL! ip address, and a port number you wanna use
5. Press open server
6. Wait for someone to connect
7. Open Client version
8. Press options
9. Specify Ip and port of the server
10. Specify username
11. Press connect!
12. Done?!

Looks nice, the only thing im not fond of is the Gui.

None the less, props! This is looks very cool.

There will be Theme properties, when i get further with this project.

GUI is a bitch to do well when i'm just started :D

Thanks alot for the feedback ;)

Good job man, keep up the nice work.

neegerniki - *September 2, 2016, 11:38 pm*

That is a really well done chat client :D

justallen - *September 5, 2016, 9:46 pm*

this is good ill use this for future reference
