Thread: [\[4/5\] Trillian Information Leakage and Buffer Overflow Vulnerabilities](#)

Omniscient - May 2, 2007, 12:12 am

Some vulnerabilities have been reported in Trillian, which can be exploited by malicious users to gain knowledge of sensitive information or compromise another user's system.

Be sure to check if your system is missing security updates or have insecure applications installed:
http://secunia.com/software_inspector/

Feature Overview - The Secunia Software Inspector:

- Detects insecure versions of applications installed

- Verifies that all Microsoft patches are applied

- Assists you in updating your system and applications

- Runs through your browser. No installation or download is required.

3 year . ^ _ ^

Well I suppose that this has been fixed already. ^ _ ^

haxced - December 28, 2010, 12:16 pm

thanks for the share OMNI, might this be useful for me

-mothered- - December 28, 2010, 12:16 pm

Irrespective of the thread's date, for myself, It's good for Informative purposes.

Although, I'm at a loss as to how this came to hand, after more than 3 years.

Eminent - December 29, 2010, 12:13 am

@mothered same thing here. I am also curious how one of omni's threads has gone three years with not a single post on it until now. Usually his threads have like 1 million replies in a couples of seconds.

Yeah true, and also considering there's been over 230 views and a 5 star thread rating.

You're a such good owner omni hope you fix this problem.

Duk. - January 28, 2016, 7:17 am

Not sure while all the other posts we're closed considering some of the exploits still work. Anyways, good work omni.

Well, I mean honestly within the next 500 threads above this that Omni posted like 50%-80% still work.
