Thread: [\[3/5\] Gentoo update for lighttpd](#)

Omniscient - May 8, 2007, 1:10 am

Gentoo has issued an update for lighttpd. This fixes some vulnerabilities, which can be exploited by malicious users and malicious people to cause a DoS (Denial of Service).

Be sure to check if your system is missing security updates or have insecure applications installed:
http://secunia.com/software_inspector/

Feature Overview - The Secunia Software Inspector:

- Detects insecure versions of applications installed

- Verifies that all Microsoft patches are applied

- Assists you in updating your system and applications

- Runs through your browser. No installation or download is required.

Thanks for the update, do you have a more detailed changelog?

Da Loser - May 21, 2011, 6:00 am

Malicious users and malicious people you say? I didn't know Gentoo had any non human users.

wait a second just saw the fucking date. Why did the moron above me a topic this old -_-

Ride My Yak - May 21, 2011, 6:01 am

Anyone know why this won't work for me?

Camouflaged - May 21, 2011, 6:02 am

HAHA! Kind of a old thread buddy...

Da Loser - May 21, 2011, 6:02 am

(May 21, 2011 06:01 AM)Ride My Yak Wrote: [\[CITE\]](#) Anyone know why this won't work for me? Because if you're still installing security updates from 2007 you may as well give up using it altogether.

I honestly don't care about rep, I stated the truth that the user above was an idiot. It's not my problem that he got mad and decided to leave a butthurt mark. Seriously who bumps a topic from 2007 to asskiss omni.
