Thread: [\[MYSQL\]\[JAVA\] RAT \[PC/MAC/Linux\]\[Soon?\]](#)

**Mefjus** - May 20, 2011, 4:39 am

Hey Guys :D

In the last Days i wanted to Code a RAT in java (: (PC/MAC/Linux)

Because i cant portforward @ home i have created a MYSQL Rat!

This RAT is VERY fast! For example i create a fake message box and 0.2 sec. later after clicking a frame is opening !

There are only few functions now. But i will add more soon!

http://img339.imageshack.us/img339/1091/unbenanntlkk.png[/img]

This is a pre pre pre pre alpha :D so i will add more features and create a new design if all is working

What do you think about it? Should i continue it?

Also need someone who want to code some functions for me (: (desktop capture with ftp or something)

Greetz

You don't want to do that in full java.

It would take the Robot library to take screenshots.

If you take a lot of screenshots in a small amount of time, it's going to use a lot of CPU usage.

Best option is to use JNI.

**Mefjus** - May 22, 2011, 2:19 am

i have done a desktop view with robot .... it takes a lot of cpu but it is working (: not lame! i dont know how to use jni

**shmt** - May 28, 2011, 8:41 am

DEFINITELY continue to do it.

You are great, you will be doing something the world (and me running bt4) desperately needs.

I would help you, if I could code in Java.

But you should continue. Definitely.

**Leg?nd** - May 28, 2011, 9:06 am

I know basic java, I could help a bit if you wanted, but I couldn't do too many advanced functions

**amn3sys** - May 28, 2011, 5:46 pm

wow nice :) goodluck with this project!

**Superman<sup>2</sup>** - June 4, 2011, 11:26 am

NEED IT :D

hope you can finish that project

**nealkc** - June 4, 2011, 5:25 pm

Well, i am intending to do the minor project in RAT and of course LEGAL one. That means no trojan and no need to bypass antivirus. So i would appreciate it if you can share some ideas from the beginning you started. Because its really difficult to find the exact information.

**SeizeCTRL** - June 4, 2011, 9:52 pm

without JNI, you cant keylog

**Mefjus** - June 5, 2011, 4:24 am

i have to do something in school but in one week i will go on!
