Pretty simple to use. Just enter your account information and click build. Send your server to your victims and it will send the logs to you via mail every 30 minutes. The source is in the download liink. Feel free to mod it, modify as you wish. Server is FUD.

Ripping someone elses work.

And if it's the source then it doesn't need scanning.

And it's not a fake report it's just an out of date copy-paste.
