Rendering hair and fur tutorial

I would have made an edit to my last post with this embedded but I'm not an upgraded member, sorry. ^^"

Anyway, here is the video version of this tutorial that quite a few people requested..

<https://hackforums.net/showthread.php?tid=1301180>

This is my first video and I was pretty nervous so sorry if I repeat myself 2323421 times >,> (I made a small error as the red channel contrasted much better than the green, was just nervous and rushing. lol)

Hope this helps you guys.

Dr.BrokenGod - May 21, 2011, 8:47 am

Nice tutorial! It will help allot of noobs like me in Photoshop! thanks!

there is another method for that, I just haven't got around to making a tutorial yet though. It's a very
long methods though, not sure if many people would follow it.

This method will work for other backgrounds just as long as the contrast between render and
background is very high. =]

Well if you have the time and will to do it or know another tutorial on that you let me know please.

Though it's not urgent since I'm on vacation without Photoshop...

Sure ok, I'm not 100% sure how to use skype though, I can just type right? or does it have to be voice?

add my skype kyoutu-
I wont be able to come on until a little later tonight. =]

Yeah, rendering hair can be very frustrating without a decent method.
I used to always avoid it. =]
