Thread: [\[TUT\] e-Whoring without Cam \[/EASY\] \[With Picture Pack\]](#)

Ohya - May 21, 2011, 10:50 am

INTRO

Hello everyone.

This is Oldskool with his very first tutorial in the e-Whoring section.

I've seen so many people having trouble with manycam lately that I decided to make this very small and easy tutorial for you guys.

WHAT YOU NEED

Picture Pack

A brain

Paypal

Balls.

A 'female' email adress.

QnAQ: Why do we need a picture pack?

A: Because we're going to convince our target that we don't have a cam.

Q: Why do we need a brain?

A: You'd be dead without one.

Q: Why do we need Paypal?

A: GTFO.

Q: Why do we need balls?

A: So you don't run away and sob in a little corner out of fear getting caught.

Q: Why do we need a 'female' email adress?

A: Just in case our target would ask for it.

THE PROCESS

Finding our target: Just go to a random chat site. I'm pretty sure every chat site has his own 40 year old local virgin hangin' around.

Heck, even Omegle should do it.

The crazy, horny slut: Alright. So we've found our target and we started talking to him. Next thing we're going to do is convince that person that we're really into crazy stuff. This is a basic and common step for every e-Whore, so I'm pretty sure that this doesn't need any further explanation. Even when you're totally new to e-Whoring.

What's a Computer? Our target will probably start wanking now. If that's the case, he'll ask for an email or any other way to contact you. Simply play dumb and ask if your 'msn' is good enough. This will give our target a chuckle and he'll think we're really easy-to-get.

Webcam? Not every target will ask for an email adress. Some will go for a totally different approach and will directly ask for a webcam session. THIS is where we're going to start making profit. Either on msn or in the chat, we're going to convince our target that we have a really old computer without a built-in webcam. Or simply tell him that you don't have a webcam. Don't forget that we're still a crazy, horny slut after all.

Suspicious? Our target might definitely grow suspicious now, but don't worry. You'll clearly see our target's mood change. Either way he'll quit and we'll have to look for a new target, or he'll get desperate and ask if there's any other way for him to see your face. That's exactly what we want.

Mad Boyfriend: Feel free to come up with any cheap excuse here in order to tell our target that we DO have pictures on our computer. I mostly say that I want to take revenge on my 'mad boyfriend' because he left me or something. Our target's interest will grow and he'll ask if he may see them.

Straight to the Point: Alright. No more bullshitting around. Just get straight to the point and tell our target that the pictures aren't free. We may be horny, we may be sluts, BUT we aren't cheap! By this time, our target won't even care about prices anymore because his juices are probably already burstin' out of his shaft. Remember to stay polite at all costs! You might even want to make a joke and tell him that you'll use the money to buy a webcam.

The final step: Just stay polite and don't overstress things. You don't want to ruin things right before we're going to get paid. Just give him your (female) paypal adress and make up a fair price for a couple of pictures. When the trade is done, you might want to leave the chat (unless he asks for more) or block him from your msn. On to our next target!

I really hope you all learned something thanks to my thread.

Below my username on the bottom of this thread, you'll find a download to a 'MILF' picture pack. Feel free to download it and use it.

All credits for the pack go to '[By The Way Kids](#)', because it's his pack.

Thanks for the helpfull tut.

But im looking to infect victims - 4 Stars.

Also i would recomend getting a msn webcam player and getting a fake vid

hernlind - May 21, 2011, 11:08 am

Thanx alot for this nice tutorial. As this will be my first attempt to get money for pics. A BIG thanx

again

You're welcome.

But I'd advice you to L2Read.

This is an e-Whoring tut for the people who don't want to get through all the trouble of setting up a fake cam with a fake vid.

I'm sorry. Thanks for noticing!
The password is: Hackforums.

I'll edit it in the OP as well.

Ofcourse, I'll add you.

And you do need paypal, but there are some ways around that.

Use your own adress and simply tell them it's your brother's or w/e.

thiloforster92 - May 21, 2011, 3:00 pm

use VCC socks and that's that
but e-whoring... wtf
