Thread: [KeyScrambler Premium 2.8.0.1- LATEST FULLY WORKING](#)

Phanes - May 21, 2011, 12:20 pm

KeyScrambler Premium 2.8.0.1

Current thread is old and links were dead so updated with latest version and crack as my first contribution and post to the site!

1) Install KeyScrambler Premium 2.8.0.1

2) Copy the original KeyscramblerIE.dll from the install folder (c:\Program Files\KeyScrambler) to another backup folder of your choice. You'll need it later.

3) Copy KeyscramblerIE.dll version 2.8.0.1 from the Crack folder overwriting the original one (v.2.8.0.1) in the c:\Program Files\KeyScrambler folder

3) Don't Restart! RUN KeyScrambler! Close the program and exit the program from the System Tray by right clicking the K icon and press Exit. If the icon is not visible run Task Manager and kill the process manually! (CTRL+ALT+DEL)

4)Overwrite the KeyscramblerIE.dll v.2.8.0.1 back with the ORIGINAL KeyscramblerIE.dll v.2.8.0.1 !!! If you're not allowed, log off! DON'T FORGET !!

5) Run KeyScrambler Premium 2.8.0.1 and ENJOY !!!:)

DOWNLOAD: <http://www.filesonic.com/file/1051065324/KeyScrambler.Premium.v2.8.0.1.rar>

+Say Thanks it only takes a min!

Virus Total:

JackSparr0w - May 25, 2011, 8:14 am

LOL I can't close the program. When I right-click on the K icon I get 4 options "keyscrambler ON" "Keyscrambler OFF" "Check for updates" and "Options..." So how do I close it?

Phanes - May 25, 2011, 4:51 pm

ctrl+alt+delete

Lucoza - May 30, 2011, 2:39 am

Works fine for me thank you for your work

JackSparr0w - May 31, 2011, 5:04 am

Just one more question :) What does the premium version do that the free version can't do? :)

inpure - July 17, 2011, 7:02 pm

Great tut, hate keyloggers...

sorjiro - September 5, 2011, 8:18 pm

do you know exactly which one is this one? 2.8.0 or 2.8.1? cuz i checked the website they don't have 2.8.0.1 unless this one is 2.8.0?

SpiritBob - September 17, 2011, 11:53 pm

What does Distinguish unencrypted keys mean?

J-[ack3r - September 19, 2011, 2:55 pm

thanks bro ive been looking for this :), will put it to use ;)

SIM-1676753 - September 18, 2013, 3:59 pm

Anyone mind reuploading the file to another file hosting site? Thanks

bb1ox1bb - September 26, 2013, 1:52 pm

link is broken any mirrors?

i need it

.vemla - January 27, 2014, 12:45 pm

Like the user said above, link is broken.

Would you mind to fix the link for us, please?

Thanks for the tutorial, just a bit sad that the link was broken.

Cheers! ?

Sexy Devil - January 31, 2014, 10:19 am

I don't think this will be updated. Its a pretty old thread

You can download KeyScrambler Premium 3.2.0.3 here:

Code <http://billionuploads.com/7q5nfd2qjdjdz> I've tested, and it works.

Spoiler ([Click to View](#)) I did not upload it. All credit goes to the uploader. I obeyed him and did not change the links ?

this is the updated version

Vicky420 - May 11, 2015, 4:11 am

Q. How keyscrambler works?

It says it encrypts keystrokes at kernel level so if any keylogger exist it only gets the encrypted keystrokes. & much more things about this software...
but I didn't got any exact answer from anybody.

Fact is, I'm making my own keystroke encryption software!!

I have use Regshot tool to find what all things he do at what level but when I compared registries list IT WAS BIG MESS!!!

Can anybody help me making that tool or any other reference
