Thread: [E-Whore Questions \(Need Answers\)](#)

▣ Nick™ ▣ - May 22, 2011, 7:20 am

Hello everyone. I've decided to start going into e-whoring, and before any of you say "Read the other threads and stuff", yes, I've already done that and I somewhat don't understand. So if you can please answer, I would appreciate it.

What is a good price to start off with for pictures?

Should I use my own paypal or use a different one? (And if use a different one, how would I send the money to my actual one?)

Why does paypal limit accounts? (Like, how do they know you are e-whoring? Do the guys say that when they send the money or something?)

I've heard about creating a "girl" e-mail, so should I create a "girl" paypal with girl information?

Thanks,
~Nick.

P.S. Mods/Staff, if any of the questions are against the rules, please let me know. This is my first time in this section and I don't really know anything.

I never sold pics but \$1 for two seems reasonable.

Use a girls paypal with the same girls email that you set up

Paypal limit accounts as you cant verify that it is legit - stops money laundering

Last questions was answered in my first answer - girl email - girl paypal

Thank both of you for the answers. But another question:

You guys said I can send from the fake paypal to my original paypal. Will paypal limit my original one if they see I am receiving money from the fake one?

EatSleepCode - May 22, 2011, 7:47 am

I doubt they would. Just make sure they are on two different IP addresses. You never want to login to both PPs on one IP.

No as long as your main PayPal is verified they won't.

▣ Nick™ ▣ - May 22, 2011, 7:56 am

Thank you very much EatSleepCode. Would you recommend that I use hotspot shield to login to the

fake paypal? Or would [censored] do the job?

onewhosighs - May 22, 2011, 7:58 am

Proxpn will work, i use blackshades vpn though

Anything to hide your ip will work though

EatSleepCode - May 22, 2011, 7:59 am

Either one would work pretty well. Make sure you get a Canadian PayPal so that you don't have to verify it with a CC or anything. Also, I suggest using fakenamgenerator.com to create some false logistics.

Well, my paypal isn't verified, but I did add a CC to it. I haven't linked a bank account at all or order the paypal mastercard. Is that still ok?

NoQuarter - May 22, 2011, 9:34 am

Not sure about that - would be better to verify it.

Also remember to delete paypal flash cookies everytime .

Plus i use separate browser for one legit paypal with my own IP-

And other browser for whores paypal with private proxie.

You can always buy your stuff from ebay using e whore account instead of sending it to your legit one. (kudos to a member here - cant remember your name :P)

Sorry I cant verify it. So youre saying use like chrome for my legit Paypal, and firefox for my whores paypal? And do i just go to tools settings and clear cookies on firefox to get rid of paypal cookies?

NoQuarter - May 22, 2011, 10:17 am

Yeah well that just what i do for extra safety.

And no firefox cant delete flash cookies. I thought i was clean as well!

You need a ff addon "BetterPrivacy" to remove flash cookies.

You guys said I can send from the fake paypal to my original paypal. Will paypal limit my original one if they see I am receiving money from the fake one?

No, they won't. I only give out my fake paypal addresses when I sell things online and then forward all payments to my real paypal. My real paypal has never been limited, but my fake ones get limited at times if I forward the payment the second I get it at full amount.

Street Fighter - May 22, 2011, 11:22 am

Try 1\$ a picture and try to tempt them by saying "1\$ for each nude ;) I got a couple naughty surprises in them also :)"

It works ALOT for me

WEEKEND - May 22, 2011, 11:24 am

Quote:What is a good price to start off with for pictures? It's really up to you. You can charge whatever you want. Honestly, I would suggest selling cam shows(you can find a lot of fake videos in this forum) because you get higher success with those. Usually when selling pictures, tell them to offer you a price. If you feel It's too low, try to bargain with them. For webcam shows, I usually take \$15-20\$ for 10 minutes.

Quote:Should I use my own paypal or use a different one? (And if use a different one, how would I send the money to my actual one?) Make a Canadian paypal account with your females information. When creating a Canadian paypal, you do not have to type in bank information to accept/send/spend the money. Once you get the money onto that account, use the "Send Money" option to send the money to your real account.

Quote:Why does paypal limit accounts? (Like, how do they know you are e-whoring? Do the guys say that when they send the money or something?) They don't actually "know" your e-whoring. Usually your account gets limited if you make a lot of payments to the same account within a short time period. Or if your logging into the account from different IP addresses. I would recommend using your real IP when going onto your paypal accounts.

Quote:I've heard about creating a "girl" e-mail, so should I create a "girl" paypal with girl information? Yes, create yourself a HOTMAIL account, and use that same information to create your Canadian paypal account with.

Thanks Xypher. Is your real one verified? And if I do get paid, I'd wait a day then send it all to my real one, that's what I was thinking to do. And I'm thinking that the ebay method is also safer?

WEEKEND - May 22, 2011, 11:34 am

Nick, that's what I've been doing. I leave the money on my e-whore paypal for 2 days, just incase someone does a charge back. If no one charges back, I go ahead and send it to my real one.

LaurenP78 - May 22, 2011, 1:45 pm

15-20 is good for 70 pictures

Liefje - May 22, 2011, 2:42 pm

I charge my customers 30 bucks for 100 pictures. It works most of the time but some of them don't respond back. But I never sell less than 30.

Paypal doesn't limit my account because I do other things with it also. I sell things on ebay and also buy things off of ebay which makes paypal money. So if they see that you are doing OTHER things with your paypal account then they won't get suspicious. Also, it would help tons if you are verified. I've collected \$390 so far and they haven't said anything to me.

I also use my real paypal account because I am a girl and have a girl name so that's not a problem to me.

However, if you are a guy and send the customer your real paypal and they see that you're name is "John Doe" then they will get suspicious and call you out on it and most likely try to get their money back.

I never heard of this before but you never know! I do recommend a girl paypal because it will make it a lot less suspicious. But that's just my opinion!

Maine. - May 22, 2011, 2:50 pm

Yeah create a new paypal using a girl email.
