Thread: [\[VB.NET\]\[TUT\] Crypter/Decrypter :Txt,Images,Songs,web Page,Exel,Word,Adobe reader!](#)

RiperFish - May 23, 2011, 11:08 am

Tutorial By ThePrinCe

Crypter/Decrypter : .Txt,Images,Songs,web Page,Exel,Word,Adobe reader ..Ect

- 1.Create a New Project
- 2.Create A TextBox (1), And Three (3) Buttons
 - 2.1Name First Button (Browse)
 - 2.2Name The Second Button (Cypt)
 - 2.3Name THe Third Button (Decrypt)

3.Now We Go To The Codes :

3.1. Import This :

Code Imports System.IO

Imports System.Security

Imports System.Security.Cryptography

Imports System.Text

3.2. Add This Codes :

Code Sub change()

Dim sr As StreamReader = New StreamReader(TextBox1.Text, System.Text.Encoding.Default)

Dim line As String

line = sr.ReadToEnd.TrimEnd()

sr.Close()

Dim sw As New StreamWriter("d:\tmp.tmp", False, System.Text.Encoding.UTF8)

sw.Write(line)

sw.Close()

My.Computer.FileSystem.DeleteFile(TextBox1.Text) '

My.Computer.FileSystem.CopyFile("d:\tmp.tmp", TextBox1.Text)

My.Computer.FileSystem.DeleteFile("d:\tmp.tmp")

End Sub

This Code IS To change From ANSI TO UTF8

3.2.1.

Code Sub change_ansi()

Dim sr As StreamReader = New StreamReader(TextBox1.Text, System.Text.Encoding.UTF8)

Dim line As String

line = sr.ReadToEnd.TrimEnd()

sr.Close()

Dim sw As New StreamWriter("d:\tmp.tmp", False, System.Text.Encoding.Default)

sw.Write(line)

sw.Close()

My.Computer.FileSystem.DeleteFile(TextBox1.Text) '

My.Computer.FileSystem.CopyFile("d:\tmp.tmp", TextBox1.Text)

My.Computer.FileSystem.DeleteFile("d:\tmp.tmp")

End Sub

This Code Is To 'Change From UTF8 To ANSI

3.2.2.

```
Code Sub krypt() 'krypte les fichiers en DES
change()
Dim MyFile As String = "d:\tmp.tmp"
Dim Key As New DESCryptoServiceProvider
Key.Key() = Encoding.UTF8.GetBytes("Password")
Key.IV() = Encoding.UTF8.GetBytes("Password")
Dim sr As StreamReader = New StreamReader(TextBox1.Text)
Dim line As String
line = sr.ReadToEnd.TrimEnd()
sr.Close()
EncryptMyFile(line, MyFile, Key.Key, Key.IV)
My.Computer.FileSystem.DeleteFile(TextBox1.Text) '
My.Computer.FileSystem.CopyFile(MyFile, TextBox1.Text)
My.Computer.FileSystem.DeleteFile(MyFile)

End Sub
```

3.2.3.

```
Code Sub dekrypt()
Dim MyFile = TextBox1.Text
Dim FileDecry As String = "d:\tmp.tmp"
Dim Key As New DESCryptoServiceProvider()
Key.Key() = Encoding.UTF8.GetBytes("motpasse")
Key.IV() = Encoding.UTF8.GetBytes("motpasse")
Dim Final As String = DecryptMyFile(MyFile, Key.Key, Key.IV)
Dim sw = New StreamWriter(FileDecry)
sw.WriteLine(Final)
sw.Flush()
sw.Close()
My.Computer.FileSystem.DeleteFile(MyFile) '
My.Computer.FileSystem.CopyFile(FileDecry, TextBox1.Text)
My.Computer.FileSystem.DeleteFile(FileDecry)
change_ansi()
End Sub[code]
```

3.2.4.

```
[code] Function EncryptMyFile(ByVal data As String, ByVal MyFile As String, ByVal Key() As Byte,
ByVal IV() As Byte) As Byte
Dim fStream As FileStream = File.Open(MyFile, FileMode.OpenOrCreate)
Dim cStream As New CryptoStream(fStream, New
DESCryptoServiceProvider().CreateEncryptor(Key, IV), CryptoStreamMode.Write)
Dim write As New StreamWriter(cStream)
write.WriteLine(data)
write.Close()
cStream.Close()
fStream.Close()

End Function
Function DecryptMyFile(ByVal MyFile As String, ByVal Key() As Byte, ByVal IV() As Byte) As
String
On Error Resume Next
Dim fStream As FileStream = File.Open(MyFile, FileMode.OpenOrCreate)
```

```

Dim cStream As New CryptoStream(fStream, New
DESCryptoServiceProvider().CreateDecryptor(Key, IV), CryptoStreamMode.Read)
Dim sReader As New StreamReader(cStream)
Dim Value As String = sReader.ReadToEnd.TrimEnd()
sReader.Close()
cStream.Close()
fStream.Close()
Return Value
End Function

```

3.3.Double Click On Crypt and Decrypt And Button1 And Add Those Codes :

```

Code Private Sub crypte_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)
Handles crypte.Click
    krypt()
End Sub

```

```

Private Sub decrypte_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)
Handles decrypte.Click
    dekrypt()
End Sub

```

```

Private Sub Button1_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)
Handles Button1.Click
    Using o As New OpenFileDialog
        o.Filter = ""
        o.FileName = TextBox1.Text.Trim
        If o.ShowDialog(Me) = Windows.Forms.DialogResult.OK Then
            TextBox1.Text = o.FileName
        End If
    End Using
End Sub

```

Makaveli The Don - May 23, 2011, 11:13 am

Very nice and good tutorial, Well done and good job !!! :)

jerry2121 - May 23, 2011, 12:42 pm

i have a lot of errors in the code :(

Uncol Dolan - May 23, 2011, 1:00 pm

(May 23, 2011 12:42 PM)jerry2121 Wrote: [\[CITE\]](#) i have a lot of errors in the code :(Cause you are not reading code, you are just C/P

Psomas - May 24, 2011, 3:49 am

I got the same error

(i read and write , not c/p)

hacphongthan - May 24, 2011, 5:05 am

useful source

big thanks

RiperFish - May 24, 2011, 10:09 am

Change This Dim clef As New DESCryptoServiceProvider()

To : Dim Key As New DESCryptoServiceProvider()

Fixed Now :).

RAF97 - May 24, 2011, 10:33 am

Bon boulot mec ! Ca fonctionne impecc' ! ;)

Good job bro, dat works great! ;)

Good job bro, dat works great! ;)

Thank's, YOu Can Change it Bro, and make a better One That use many Encryption Like CRypo xD :).

RAF97 - May 24, 2011, 10:53 am

I will use it to crypt my spy screenshot taker's files ;)

RKYDA - June 19, 2011, 10:54 pm

Hello,

Does someone could help me, me it does not work,

I post my project: <http://www.sendspace.com/file/lbhovd> HELP-ME PLEAS !

RAF97 - June 20, 2011, 9:31 am

I tried with a pdf file and T cant decrypt it...

Are you sure that's possible ?!

Yellow Hooded Coder - June 21, 2011, 3:19 pm

Nice screenshots, very well done

Glitchezz - June 21, 2011, 5:31 pm

Can you please explain what each bit of code does?

Meerkat.? - December 14, 2011, 8:14 am

It doesn't work. It crypts the file, but after I decrypt it shows even more fucked up characters...

I'm just C/P'ing and editing the code a little. I'll rewrite the whole thing, maybe it'll work like that :D

Edit: Nevermind. Stupid me!
