Thread: [\[C#\C++\] Silent-Cryption LITE \[SRC\]](#)

xSilent - May 23, 2011, 12:42 pm

Since the source has been leaked, I'll just post it here.

The source contains:

Builder (C#)

Stub (C# for Managed)

Stub (C++ for Native)

And other stuff

SS:

Spoiler [\(Click to View\)](#)

Download: <http://www.mediafire.com/file/ki4p9ybmm44ygpx/Silent-Cryption%20LITE.zip>

For the builder use: [Visual C# 2010](#)

For compiling the C++ stub, I suggest the [Code::Blocks](#) IDE and the [MiniGW](#) Compiler.

Great release man, downloading now!

Apple - May 23, 2011, 12:55 pm

Cool, more crypter sources for people to copy and paste into their own crypter

Gook - May 23, 2011, 12:57 pm

Wow, Nice Release! Downloading Now bro :3

Banks? - May 23, 2011, 2:10 pm

I feel bad for the people who bought this. Fuck leakers.

Deceptive - May 23, 2011, 2:31 pm

Great release xSilent, sorry for the people that leaked it.

Grieve™ - May 23, 2011, 2:36 pm

very nice release xsilent. shame about the leechers and leakers though :(

KingCobraXD - May 23, 2011, 3:08 pm

Ouch..leakers. Well, does that mean the leaker wasted his money just to leak it? Or was it an accident?

BTW, awesome release. =)

versx - May 23, 2011, 9:59 pm

Great release xSilent, I'll definitely have a look at the stub because I'm learning C++. Thanks a bunch.

RebornX - May 24, 2011, 1:00 am

Thanks man. Awesome share.

I am sorry to hear you are doing this. You do amazing work and it is crap that people leaked this.

P.S. I am tempted to rate this 5 star not towards you but as a way to show my dislike that it came to this...

hacphongthan - May 24, 2011, 5:06 am

thanks man
does it runtime ?

TheBlackMarket - May 24, 2011, 5:43 am

Thanks, really good share.

deeprybka2020 - May 24, 2011, 11:27 pm

thank you brother for sharing this.its bad to hear the kids leaked this :(

TLF-KoBE - May 24, 2011, 11:44 pm

Really nice work, as with everything I see from you. Sucks you got it leaked..

I really don't care anymore.

I'm about to stop posting sources. I might come back every now and then, but I'm focusing on game developing at the moment.

I have had some truble geting my finished crypted file to run.
Anyone else having truble whit the finished file (RAT).

Silicon - January 4, 2012, 12:52 pm

You should probably use the native stub for all uses, that would stop people being able to decompile it so easily.
Also, it's MinGW, not MiniGW.
