Thread: [\[REQ\] Digital Signature \(John Hancock\)](#)

Hellz0wnzJ00 - May 25, 2011, 9:44 am

I was wondering if someone could make me a digital signature of the name "Carol Mendelsohn" I'm willing to pay. Thanks!

Focnr - May 25, 2011, 10:08 am

What features do you want?

Transparent? Renders? Color background? Color of text?

Hellz0wnzJ00 - May 25, 2011, 10:11 am

Transparent and black text. what ever u think would work best. i just need to to resemble a signature.

Focnr - May 25, 2011, 10:14 am

Water-marks can be removed after payment. :)

Hellz0wnzJ00 - May 25, 2011, 10:16 am

Thank you so much bro.

hey man a little misunderstanding lol i actually need a signature which is why i put (john hancock) i need the name to literally be in cursive as a signature would be. sorry for the misunderstanding. would that be possible? im sure that is a little more tricky so im willing pay well. also if you can ill pay for both due to the misunderstanding and if u want a little more cash im in need of a signature(as you made above; for forums lol) for my account here.

Details are posted here

I'm still in need of help. I understand if users don't have time for this request as it may be a little more difficult than most requests. On that note, could anyone give me any advice or point me in a direction that may help with what I need.

Thanks!

You need this name in somehow handwritten version?

Hellz0wnzJ00 - May 26, 2011, 9:56 pm

Yes exactly, please. If you could help I would be very thankful!
