COD3ING HAS RETURNED

Dear, Hackforums.Net

It is Cod3ing , i was a member of this lovely forum back in the early 2009 - 2010 Period, when scammers didnt exist or at least there where not many, i lived through 2 periods during my stay here at hackforums, one of them was The Microsoft Codes Era, and the other one was the Client Shell Booters, and PHP Shell Booters Era.

This forum, was my home, this forum was where and what i visited daily, every single day of my life. this was where i relaxed, this was where i could chill with members, and people who where into the same genre as me, this forum bought me together with other people, friends and some people who lived close to me, which of whom i never knew where hackers, this forum taught me hacking, and thats one profession i will never loose, I can thank some user's who have helped me in the past, these are Crow,iBruteforce and ofcourse the administrator and head-boss of this website Omniscient.

I know, you ub3r's will probably -rep me, do it, go for it! i have nothing to loose, this account will soon be banned, all i am asking for is that omniscient responds directly to this message, i dont want a l33t,Ub3r,Modertator or even staff to respond, i want omniscient to respond.

Back onto hackforums now, i've started a fresh-start with this account "xSkid", i've helped user's, members and even some staff members, of which i will not mention here,

I wrote a message to omniscient, but never never responded, that message was..

Spoiler ([Click to View](#))

Dear Omniscient,

It is Cod3ing here, and i wish to make one last appeal regarding my ban, I was banned for attempting to attack Hackforums with a User's Booter, (Called TwBooter), It was only meant for a test, and of-course i knew that hackforums could not be taken down with such a small shell based system booter, but it is only in the nature of humans (Such as me) to test out what tools they have obtained, afterall i payed for it.

Onto my appeal,

I joined hackforums roughly 2 years ago, and have since then learnt alot, Tools such as Rats,Keyloggers,Botnets,Crypter's and more, one of the main things i have obtained from hackforums is my new knowledge of coding the language Visual Basic 2008 and Visual basic 2010, Hackforums.net has been a 2nd home to me, and always will. not a day goes-by that i dont think about hackforums,

Since my ban, i have broken a few rules, and i am very sorry, one of those main rules are Ban-Evading, I ban evaded with new accounts, one of those recent accounts was "P.r.o.g.r.a.m" , which i had attempted to make a fresh start with, if you take a look, all of my posts where Extremely High Quality, not one of those posts was under 25 Characters, i had 10+ Reputation as i had helped many user(s) setup tools for there booters,botnets and rats. i offered to sell youtube views, and even gave it for free to l33t's and ub3rs, but again was caught out by A Staff,Member or Administrator.

Omniscient, i know it is not in the nature of you to grant such a appeal, but please.. please look into your heart and spare this one user. Please, if you take me back into the community, i will purchase Leet (l33t) and start again making High Quality Threads/Posts and topics, i will stay on my best Behaviour at all times and will NEVER break another rule again,

If i wanted to come back to the community , i would have just asked you "Please unban me..." , Instead i have written a highly professional statement regarding my appeal.

If you dont want to unban me, Could you please reduce the ban sentence? I have a few more months to go, so could you at least reduce that?

Please look into the matter for me,

Regards,

Cod3ing.

CONTACT EMAIL: --BLANKED OUT--

A Message to Omniscient,

You've run these forums, everybody was after you, and yet you've managed to keep running it, even at a point when you where going to sell it, you didnt. you can take attacks, and user's hacking you, but omniscient, you know what will destory these forums and the community? the community will destory itself, the members will destory themselves, they will scam,hack,infect do anything to gain a higher level of superiority on this forum, pay more attention to the community itself, i understand you, you have a life, you have kids and you have a wife, and i know it can be hard at times to do both of these things at once, but if you want this forum to keep running, you need to pay more attention to the members themselves, Rules... rules.. they mearly are only there for members to read, most sellers on this forum have never even read them.

Thank You.

-Cod3ing.

Omniscient, i have Private Messaged you my email address for you to respond privately if you do not wish to respond to me in public on this forum.

If you grant this appeal, it would mean the world to me, please understand my poision omni.

Yeah, part of change is things don't always work out in your favor. Sorry your HF experience wasn't what you expected it to be upon your return.

**Revoke** - May 27, 2011, 3:15 am

I know you don't want us to respond, but I strongly agree with what you said here:

" you know what will destroy these forums and the community? the community will destroy itself, the members will destroy themselves, they will scam,hack,infect do anything to gain a higher level of superiority on this forum, pay more attention to the community itself"

It happened to another forum I was a member on.  
Well said sir!

**Poppins** - May 27, 2011, 3:16 am

You've been here since may..

**xViper** - May 27, 2011, 3:17 am

You tried to boot HF?

:O

I am going to be honest with you, i have been here for longer than you, i've met MYBB Administrators, i know administrators from other forums, and i hack myself, i've attempted to run a forum, and its hard, and i can also understand,

I've been here since 2009-2010(ish). My Real username is cod3ing  
of which is banned.

**SIM-38442** - May 27, 2011, 3:18 am

I agree. HF use to be better back then.

**xSkid** - May 27, 2011, 3:19 am

(May 27, 2011 03:17 AM)xViper Wrote: [\[CITE\]](#) You tried to boot HF?

:O

That is 100% True, and it is only in the nature of humans to test out what we see,what we find and to use the tools and equipment we have, i purchased one of hackforums best booters at the time, which was twbooter, and tried to ddos Hackforums, ofcourse i knew it would not do it, but i wanted to TEST.

it is only in the nature for humans to test with the resources the have at the time.

Please DO NOT flame this.

(May 27, 2011 03:19 AM)Poppins Wrote: [\[CITE\]](#) If you don't like it then why are you here?

Trying to get your attention of the serious problems and the "Evolution" that is happening here.

Hackforums has changed, not for the better but for the worse,

I want to be part of the community and do my bit, that is all i want, i am also raising the major issues with hackforums.

(May 27, 2011 03:18 AM)Perro Wrote: [\[CITE\]](#) I agree. HF use to be better back then.  
That is correct sir!

We all know it was.

**chimpy** - May 27, 2011, 3:27 am

Wait out your 2 months ban....All the begging in the world won't take the fact away you tried to boot HF..

Your fault...

lol @ booting HF, making 2 more accounts and annoying that admin guy. Only 2 months ban...Lucky..

Also bringing very serious issues, that will cause concern's in the long-run of this forum,

Thanks.

**Lith** - May 27, 2011, 3:29 am

If you're going to test it out test it out on another site, you're obviously going to get banned for doing it on HF.

**Crypt32.dll** - May 27, 2011, 3:34 am

wow man trying to boot HF... and all you got was 2 months? you was lucky it wasnt permanent ban for trying to boot hf which is now his only way of living. dont think he will unban you for that.

**Airex** - May 27, 2011, 3:35 am

HF should add a huge and visible Rated-PG icon somewhere. Some members of HF are always making dramas and taking it seriously.

There's staffs who can manage problem in HF and keep this clean but I know it's now enough to fight everyone who're breaking rules, but nothing is perfect.

**xSkid** - May 27, 2011, 3:44 am

Thank you, thank you and thank you.

This is highly News-Worthy, and has been posted for the 2nd time, as being it,

thanks for all the replys, waiting for the Administrator to respond.

GL on your extended ban.

**BaussHacker** - May 27, 2011, 3:53 am

The reason there is scammers, is because the forum is growing. Sooner or later any forum will obtain scammers. You just needs to deal with it and do your best to avoid them.

Remember our group "Red Lions" is here to protect the forum against such things.  
The best way to avoid scam is always looking if the person is having earlier scam reports on them.

You can view the scammer database here:

<http://redlion-hf.com/?id=2>

Also take a look in the Deals and disputes and see if they have:

I agree with some of your points, but your ban was fair. If you wanted to test it or anything, then you should have contacted Omni and asked in the first place. It's against the rules to attack the site.

?

I grew mad with power, i had customer with a booter, when booters where the trend, once i had some many customers, i just decided to take the people's money, not refund it and go.

I've changed, scamming is gone, i dont sell products anymore, i only help user's now. i'm done with the marketplace & making money on the internet.

We've seen alot of highly trusted people scam..

Prodigy is one to name.

**ormond32176** - May 27, 2011, 4:08 am

Well, I took a break on here and came back to -16 rep. That was always fun, and on top of that, these forums suck now. There are just a whole bunch of skids camping the lounge. No one really hacks on here. The Ub3rs are the people who dick around in the lounge and not the elite hackers, as they used to be.

I think it is getting ridiculous how big the lounge is getting.

This is no longer a hacking forums with a lounge, but a lounge with a hacking subsection. It sickens me.

I can see how sorry you are from reading your post buddy, but to be fair Cod3ing 2 months is really not that bad, I expected this to be based on a permanent ban. Just ride out the ban and come back and be HQ.

Correct, you have a valid point,

But..

Things can change for the good, and for the worse, the way this forum is getting is the worse.

ALSO FOR ALL THE PEOPLE SAYING I GOT A 2 MONTH BAN, IT WAS A 7 MONTH BAN FFS, I HAVE 2 MONTHS LEFT.

Well, he tried it.

Close this thread please, thanks.

**Psychotic Overlord** - May 27, 2011, 4:20 am

I say do not trust this user he tried to infect my partner when we were working on a program. The account has already been closed and I would love if he never comes back. He said he wanted the source so as to make some changes and when we told him we couldn't he said we had to download some files and what it turned out to be was a backdoored program. Caution this user is dodgy and won't help hackforums become any better.
