Just a little update.

I will be selling this pack until I have \$25, so I can purchase a domain, and a VPS, and then I will be uploading all these fonts for everyone to enjoy.

I will be buying a domain as well.

I am currently finishing the archive, there are nearly 10,000 fonts starting with A alone.

I would love to buy this font pack from you, PM'ing now.

A word of warning: Don't install ALL 100k fonts and try to open something like Photoshop. It will take AGES for it to load them all.

I used to have around 100k, and even with only 50k installed it took 2-3 mins for Photoshop to execute.

Good luck with sales, fonts are always useful.

Thanks,

I anticipate the users will browse and install the fonts they like, and leave the others out.

Once I create this font site, you will be able to browse through them all and download single fonts!

I suggest you use the preview feature in windows, to view the fonts without installing them, then just install a few you like.

If you have a project, you can browse through and pick one thats good for that specific project ?
