Thread: [\[Release\] Spotify Account Generator Leecher Edition \[Source\]](#)

irenicus09 - May 29, 2011, 12:52 am

Hi guys, a lot of you have obviously seen a script that I wrote earlier (Spotify Account Generator). This is an improved version and it features a decent looking GUI. The main catch here is obviously the GUI that sets it apart from the console edition, I wrote this to test my GUI coding skills with wxPython.

[img]<http://i.min.us/ic4Ebw.png>[/img]

I know that the source would be quite useful for people learning wxPython, thus I chose to release it. Kindly remember that you will need python2.7 or earlier along with the appropriate version of modules like BeautifulSoup, Mechanize and WxPython installed.

Known bugs: The about box in Windows doesn't resize properly which could have been fixed but I didn't really bother with it as it works fine. No other bugs at the moment that I know of.

If you want a build/binary for your platform, take a look at this thread: [Click Here](#)

If this is useful to you, I would appreciate it if you can provide some feedback, etc.

Enjoy!
