Thread: [Low Orbit Ion Cannon + Epic Fail Cannon \[DDoS Pack\]](#)

-Black- - August 28, 2009, 7:29 pm

These are two programs that a friend sent me that I have been thoroughly enjoying. Epic Fail Cannon is a slightly newer build than the other and therefore runs a bit faster. I searched around and couldn't find either of these already posted, but I apologize if they are floating around somewhere.

Basically, you enter the URL or the IP, 'lock target' and then 'fire your lazer'. You can adjust the number of threads, which is the number of users that LOIC or EFC will emulate while DDoSing. Naturally, the higher the count, the better the DoS, but the more your CPU and connection is going to tank.

Rainclouds - August 28, 2009, 7:34 pm

Im still a bit leary about d/l ing it can any 1 confirm it?

-Black- - August 28, 2009, 7:49 pm

Yeah, I can imagine, seeing as I'm fairly new around here. I tried downloading it myself from that link, and it didn't work. It would only run from My Received Files, where I got it to begin with. I would imagine that's because it doesn't seem to like having two copies of the .exe in two different places.

Foul - August 28, 2009, 7:56 pm

This doesn't work good...

Xch4ng3 - August 28, 2009, 7:59 pm

Yeah it's a popular tool on 4chan. I can confirm it's clean.

Zeon - June 19, 2010, 3:42 am

So is it backdored or not? Can someone confirm?

Graff1ti - June 19, 2010, 3:45 am

Wasn't the Cannon shit used by Boxxy to DDos 4Chan!? am i right?!

Xycon - June 19, 2010, 3:47 am

backdoooreed or not this is nothing mroe but simple dos

nothing to do with ddos as the title claims

there are alot dos tools out there ... but there kind of worthless these days, if you want to take down websites or anything ddos will be far more successfull

~Tom~ - June 19, 2010, 3:49 am

If you're worried about LOIC being infected then download it from Sourceforge

<http://sourceforge.net/projects/loic/>

Bonesaw - June 19, 2010, 10:41 am

kids an idiot, dont download, has a cheap ass keylogg in it and a few trojans, better luck nexttime.

EDit: No, it's fine actually. It worked for me, and I also scanned it with avast.

asianprido - September 19, 2010, 1:49 pm

sounds great for noobs like me! thanks

Enzyme - October 21, 2010, 1:31 pm

Very old, not very effective any more unless the server owner is a complete noob.

SwndI3 - October 21, 2010, 1:59 pm

dude, php. exploits are way better tahn that, they take it down qicker and on more secured websites.

The only really good thing about a LOIC is that it shows the IP address, i will post one ;)

TheGift73 - October 21, 2010, 4:21 pm

I have used LOIC in Hivemind only before, but one of the main questions that other people have asked me is how do they DDoS without getting caught? I know that DDoS'ing when hidden behind a VPN is a bit pointless as you are effectively DDoS'ing the VPN server, which has no effect on the intended target. I have heard of people using BNC software, but I believe this is for IRC and would have no benefit for the user when using LOIC which is being controlled in Hivemind.

CoNsEqUeNcE - October 21, 2010, 4:26 pm

I have been using LOIC for two years now, and it doesn't do crap. It lags your own connection to the internet, and infected, (says Norton).

TheGift73 - October 21, 2010, 4:36 pm

@CoNsEqUeNcE You can adjust the speed of it if it's lagging you internet connection too much. As for Norton....well it would. It's a false positive anyway so don't worry about it. LOIC is very clean.

Snarr - October 21, 2010, 6:16 pm

I don't use LOIC, too many backdoors.

Lazy-kun - October 25, 2010, 12:12 am

Nice and it's clean all the way adding rep.

nice its goodd but man tell me about ddos exploit

The500poundman - November 21, 2010, 9:18 am

This is such an old tool! (to short)

Zeon - November 21, 2010, 9:35 am

EFC is backdoored, and you can download LOIC from sourceforge. /thread.

jezebel - November 21, 2010, 9:42 am

Thnx for the share this will be useful

azag - November 21, 2010, 1:56 pm

Nice but this is soo old thought XD

Black Cock IRL - November 24, 2010, 10:03 am

Sorry but every copy of low oribt ion cannon is infected no exceptions.

hyperonion - November 24, 2010, 1:28 pm

I can vouch for this, it works perfectly.

.Astro - November 24, 2010, 1:32 pm

I'm not sure how to use these, but you just put the URL or IP of the site in the first text box, and then

lock on to it, and then click the button next to it?

hacking - December 10, 2010, 2:26 pm

thank you man for this tool??

i wasnt able to download it off that link... if anyone has another link for download i would appreciate it.

Autorun.inf - March 1, 2011, 11:25 am

Is this requires anything? Or Just straiht ddosing?

DarkWereWolf69 - March 1, 2011, 11:30 am

First off, why grave dig(digging up an old thread)? Second it's a DOS attack as in it uses your upload speed to hit. So if your upload speed is 2mb and there download is 5, they wont go.

wimpie2001 - March 11, 2011, 4:10 pm

Ok dl now il be posting soon when i tested it thx!

CaliforniaGirly - April 16, 2011, 9:10 am

Can someone tell me why whenever i try to hit someone offline, it lags me out instead of the other person?

Rdogg112 - April 16, 2011, 9:14 am

Or <http://sourceforge.net/projects/loic/>

(didnt read thread didnt see if posted)

Encrypterss - April 16, 2011, 9:24 am

it works ok you can get it from CNET hits ok best part is when you click IMA CHARGEN MY LAZERRR!!1

Digifais - April 16, 2011, 10:14 am

My Avast picked it up as malware. I'm not sure if you guys want to download this.

GI?ryallowed - April 16, 2011, 10:24 am

There are newer version of LOIC that support a "Hivemind" mode, but not useful since Operation Avenge Assange is over.

malandry - April 16, 2011, 5:02 pm

Those things are fakers because the programs Ddos you that you cant acces this site. i did it on a site who was very very small and i ddosed it, i check out doenst load, what does downorjustforme says Nope its just you...

?Screamo - May 2, 2011, 3:20 pm

Even tho I don't like DDoSer's thanks for sharing I guess.

Cornelisjuh - May 5, 2011, 1:34 am

Dont use LOIC or something similar. It is like sniping with a portable nightclub on your back.

gmmha - May 5, 2011, 10:52 am

whats the chance of getting caught?

2311 - May 5, 2011, 11:07 am

It's a DoS tool, not a DDoS one... get it straight.

(May 5, 2011 10:52 AM)gmmha Wrote: [\[CITE\]](#) whats the chance of getting caught?
You can answer that yourself, since using LOIC means DoSing from your own IP...

TomFruity - May 6, 2011, 9:56 pm

Two nice tools. Thanks for sharing :)

221boy221 - May 12, 2011, 11:39 am

Both viruses.
My Avast! detected them.

mushdoomx - June 5, 2011, 7:27 pm

I love it so much my av norton the av on meth does not detect it hoic does get detected therefor i dont use it this thing is amazeing i love it i personally dont trust what anyone says but this is shear awesome in the 1st degree if your looking for a nice little dos tool this is for you. =]

I suggest downloading it from the official download page:

<http://sourceforge.net/projects/loic/>

This doesn't usually work unless more than one person is hitting the same IP with LOIC at the same time.

<http://en.wikipedia.org/wiki/LOIC>

coffeemug - June 14, 2011, 3:10 pm

epicfailcannon what? LOL.

Kepitz - June 14, 2011, 3:26 pm

Just a few cautions...

The original LOIC (Low Orbit Ion Cannon) is detected, like 37/43 or so, so this being FUD means he have crypted it, and therefor could have binded any viruses along with it. Just warning you guys.

eyebrowstoenail - June 14, 2011, 3:32 pm

this look really good...haha

P???? - June 14, 2011, 6:48 pm

I heard Epic Fail Cannon was infected with a keylogger or something, but Loic is a very fun tool ;P

Dual_Sho0k - June 15, 2011, 1:17 am

The version 1.0 is older :P

But thanks

Ganja420 - June 15, 2011, 2:11 am

Eh, i used this back in the day.

If any l33ts or ub3rs need a free shell booter.

PM me.

everyone that is online try to get down <http://www.kriminals.nl/>

thedeadwalkk - June 24, 2011, 1:14 pm

Ok I'm having problems, not just with this, but with every DDOS and Booter I have.

But what the fuck am i doing wrong? I follow every step, I've retraced my steps. Gone over steps, checked to see if I missed a step, and nada.

All it seems to do is knock me off the internet which is probably why it isn't working??? but its only knocked me off once or twice. Rest of the time it doesn't work.

Phriendly - June 25, 2011, 3:49 am

Interesting i dont know if its worth downloading thou

azizokz - June 25, 2011, 9:20 am

It is not clean Male ware detected.

Loquax - June 25, 2011, 11:31 am

Since when i need to encrypt a DDoS program?Im not sending it to my victim,so why ?

7key - June 25, 2011, 11:51 am

Grrr. I'm really unsure if it's clean or not. People keep saying different.

have just wrote similar to this on another post but a DoSer will draw up all the bandwith from the internet connection to spam data packets to the target-this is why are being knocked off the internet.

read up on the differences between DoS and DDoS,all the info is available on HF,as well as programs.

LOIC is officially available from here:

<https://github.com/NewEraCracker/LOIC/downloads>

but remember,are not going to do much damage with one persons connection,get as many mates as possible doing it at the same time.

wow guys why don't you get it.

don't download any LOIC posted on forums.

google for LOIC and download it on official website with a serious download ...

Anyway LOIC is old

Foundation - July 12, 2011, 10:20 am

Why would you re-upload to # instead of giving them the original links? I'd be suspicious about this. LOIC can be downloaded at sourceforge.net, although I've never heard of Epic Fail Cannons and so don't know where to find it.

opx1230 - July 12, 2011, 10:25 am

Thanks very nice keep it up

I thought this is a DoS not a DDoS?

sriram786 - August 6, 2011, 6:47 am

no it isn't clean... AVG gets detection

2buckz - August 14, 2011, 9:38 am

Be aware that some version of the Low Orbit Ion Cannon sends the IP address of attempted users to a law agency.

Also remember that this won't work unless you have a mass of people hitting the same location!

tracker1098 - August 14, 2011, 9:44 am

you need a lot of people to use this, trust me I've tried, it only works with a lot of people.

evilboy666 - August 14, 2011, 11:18 am

LOIC has 1 shell dude I'm a lol trollface fuck this 50 character rule

Pisces - August 14, 2011, 1:09 pm

Low Orbit Ion Cannon was developed by Anonymous, correct?

rand0 - August 18, 2011, 12:13 am

Thanks for the share, man. I didn't want to trust a dl off the web, so I decided to search HF, and here I found what I wanted. sweet!

Foggy - August 27, 2011, 11:35 am

AVG says that LOIC and EFC is an Adware/spyware, I think it is normal is it clean ?

70k - August 27, 2011, 4:11 pm

Foggy AVG detects all Ddosers that's normal, and for this post, Nice sharing but I don't think that's the original LOIC, however, I got HOIC (High orbit canon) if you need just pm me :)

Magical_X - August 27, 2011, 4:22 pm

I got an avast warning stating "Win32:Malware-Gen".

Is it a false positive or not?

h4kr! - August 27, 2011, 5:43 pm

Lol I remeber I had this during the old anon ops. But that was a few months ago... oh such good times.

bobbyroylee - September 2, 2011, 5:56 pm

I downloaded this awhile back, seen the thread just now, just coming back to say thank you.

JustinH - September 3, 2011, 10:05 am

Could you sent me link of ddos program

paxio5922 - September 3, 2011, 10:07 am

The LOIC Is good to take down some kids network :P tho you will suffer of lack of internet as you DDoS because its so good! :D

Dyme - March 3, 2012, 5:39 am

I advise that nobody here use this tool. It's outdated, and insecure. If you really need a good DoSer, google HOIC.

lalalox4 - March 6, 2012, 3:33 pm

avast detected w32 malware gen, maybe its me being a little bit too safe. maybe its a hacktool but it said malware so i wouldnt download.

DiscoRabbit - March 6, 2012, 3:40 pm

Closed his account. Its pointless posting on here. Just let the thread die, LOIC is old tech anyways. With hardly any posts and closed acc, probably a virus too.

Yes this program is safe.

It will be detected as a virus but its not a virus.

you can goto prison or get a high fine if you use this program in a illegal way :) unless you are good at hiding.

I have used this program on my school website and YES it worked.

ion cannon isnt a really good ddos tool , you'd probably have to use it with 4-5 people to knock someone offline lol

Vouch, Works fine.

NOTE: You need a strong network though or it will end up crashing yours.

DesuDesu - April 9, 2013, 4:14 am

This tool is horrible.

There are better alternatives out there.

Also note that LOIC doesn't let you use a proxy unlike Slowloris.

Slowloris is better but I believe it's for Apache servers only, not sure. Everyone thinking about using this should really look this stuff up first.

Or use it, whatever works for you.

DarkAngel86 - April 9, 2013, 10:47 pm
