Thread: [Hacking, and its risks.](#)

T-rom - May 30, 2011, 6:33 am

Hello, I hear a lot of people asking about the "risks of hacking".

I decided I might as well pop in and give my Two-cents.

Before I start id like to state, ALL COUNTRIES HAVE DIFFERENT LAWS.
CHECK YOUR LOCAL LAWS

First off, "Am I at risk of getting in trouble, even if I don't do anything that bad*".

Spoiler ([Click to View](#))Why yes, yes you are.

Although most cop's won't bother with "small time" hackers. There still is a risk. So always use protection(I will get into this later on).

Second, "If I am under 18, they wont really do anything..right?"

Spoiler ([Click to View](#))WRONG.

They can,and will, prosecute you to the max they of their ability. There are many many teen's who get in a lot of trouble just because they believe that the law will go easy on them for being "under age".

Below I have a "link" section, there will be "under 18" section where I shall post a few cybercrime cases with people under the age of 18.

Third, "Now I am scared..what will they do to me if im caught??"

Spoiler ([Click to View](#))

well, it all depends.

Here is a link to a PDF I found (all credits too iHale and the CEH course.)

[LAW pdf.](#)

///***link to his post will be at bottom***\\

If you are inside of the US military, there are no laws that pertain directly under "cyber crime" But you will be charged with the fallowing.

A. with misuse of government equipment you can be charged under article 92.

B. 134 can apply to other things (including child pornography and such as illegal materials).
and

C. 133- "Conduct unbecoming an officer and gentleman".

You can also be charged with Computer fraud, depending on what you do Obstruction of justice or lying to investigators.

Fourth," CRUD, THATS SCARY :O what now?!??? how do i stop this ?"

Spoiler ([Click to View](#))

Well use protection.

Whenever doing anything try to use a VPN + Proxy.

I personally suggest paying for one of the VPN's here on HF, if not then there are SOME free ones.

NEVER and i mean *NEVER attempt to hack a government server. Including (all governments) but especially .Gov .Edu and a few others I can't remember at the moment ;P

Never try to hack a school, it will end badly.

Also, always investigate a target before hacking. If they seem to have the time and resources to track a hacker of your level (you may be a beginner or a professional) I would highly suggest not attempting anything.

Now those were mostly for web/internet server attacks, if attacking machines (computers) again, NEVER attack government computers(To put simply, you will be seen as a terrorist, a traitor and unfortunately for you, the government does NOT care if it was for fun or just a low "unclassified" computer. You will be arrested on high charges.

Now some tips for staying anonymous....try to make sure you don't do anything dumb to get caught (example would be using your "real" email for anything hack related ;)). Try to never put anything that could link itself to you (examples, using a username that you normally use for other things. InCLUDING for hackforums).

It is highly suggested to be ready to destroy the evidence of all/any type of hacking..I agree..except you may be charged with obstruction of justice.

Oh and a rule of thumb, NEVER brag about what you have done, and don't brag to friends about being a "l33t hAx0R". THIS will end in some problem's :P

This is a edited version of a previous post of mine , but due to me being unable to edit it because its past "1440" minutes (or 24 hours).

I am trying to give back to the community now :)

Stay out of jail mates ;P

All comments are welcome, let me know what you think !!
If I missed anything let me know ?

Quick Edit ::

Thanks too somehaxor for saying this , I don't think I really mentioned it above ^^ but here is what he said.

Quote:In terms of destroying evidence of hacking, this does not mean move it to the recycling bin and empty recycling bin. The hard data of what ever it is you empty still exists and it can be retrieved using a system recovery program. This is because emptying something out of the recycling bin just removes the reference of the file. In order to actually delete it, you will need to overwrite the binary data. I recommend using Eraser or CCleaner. That is actually very true, when deleting something from your computer, you never REALLY delete it. It can still be analyzed while its in "grey space". So make sure you write over it .

EXAMPLE:

I have a txt file called "bob" .

Lets say bob is 5mb.

I erase "bob" and make a new file named "bob.txt" the same as the last and put it in the exact same place BUT this "bob.txt" is only 3mb.

It will only overwrite 3 mb, meaning 2 are still left.

understand ?

Dr.BrokenGod - May 30, 2011, 6:44 am

Hey thanks for the cybercrime.gov link.

T-rom - May 30, 2011, 6:46 am

(May 30, 2011 06:44 AM)brokengod Wrote: [\[CITE\]](#) Hey thanks for the cybercrime.gov link.thanks for the reply :)

I found it was one of the vary few sites that actually updates with cases like that.

I know there is one more out there but I can't seem to remember it :P hopefully I shall find it and update with it.

Doctor Shadow - May 30, 2011, 6:48 am

Thanks for posting this ;), I'm going to Encrypt my HDD O.O

T-rom - May 30, 2011, 6:58 am

(May 30, 2011 06:48 AM)Aceaa Wrote: [\[CITE\]](#) Thanks for posting this ;), I'm going to Encrypt my HDD O.O

Haha, precautions of this sort are something I missed -.- oops :P well Good luck andddd Hopefully you don't get caught :)

NICHOLASR - May 30, 2011, 7:08 am

I am almost certain that Proxpn keeps logs. Look at the official video on YouTube and read the comments.

T-rom - May 30, 2011, 7:14 am

(May 30, 2011 07:08 AM)NICHOLASR Wrote: [\[CITE\]](#) I am almost certain that Proxpn keeps logs. Look at the official video on YouTube and read the comments.

Well looking through their Privacy policy and FAQ's they have a "no tolerance" yet never say they shall report to the police.

Plus they have been suggested many many times.

I believe they don't keep logs but if they do, I am sorry :P

I have used them for a while and never had a problem

somerandomhacker21 - June 4, 2011, 9:15 am

Hey thanks for this thread it is keeping me in line to not do any thing "black hat" for hacking. I just want to learn more about coding and other hacking techniques so that I can test the security of some websites. 8)

Phuziion - June 4, 2011, 9:26 am

This is a really really really good thread! Enjoy your +3 mate!

Golliath808 - June 4, 2011, 9:34 am

Wow I just enjoyed your thread.Good work !

But how about posting some not very legal thread stuff here on HF ??

T-rom - June 5, 2011, 9:28 pm

(Jun 4, 2011 09:26 AM)Trickshot Wrote: [\[CITE\]](#) This is a really really really good thread! Enjoy your +3 mate!

Thanks so much :D Just trying to contribute what little I can :] (Jun 4, 2011 09:34 AM)Golliath808 Wrote: [\[CITE\]](#) Wow I just enjoyed your thread.Good work !

But how about posting some not very legal thread stuff here on HF ??

I post what I can to contribute :P

I personally believe that posting one "unique" (ok not so unique but not totally saturated ;P) thread is a lot better than posting a thread on a subject that has already been posted a thousand times :)

I will admit I am still a beginner , yet I do my best to learn. Once I have something "not very legal" to contribute I will :)

SidiOu5 - June 6, 2011, 12:18 am

Good read dude! Gonna have a look at the VPNs

abd - June 6, 2011, 1:25 am

any one can hack HF user Password

:d

(Jun 6, 2011 01:25 AM)abd Wrote: [\[CITE\]](#) any one can hack HF user Password

:d

I am sorry, I am not sure I totally fallow your thinking here ;P

hacker_jake - June 8, 2011, 6:37 pm

Actually black hatting is more fun though(;

The danger keeps you Lulzy:P

T-rom - June 8, 2011, 6:42 pm

[quote='hacker_jake' pid='12517065' dateline='1307583454']

Actually black hatting is more fun though(;

The danger keeps you Lulzy:P

[\quote]

;) so true.

I prefer to say im gray hat.

Mostly due to the nature of mine(helping people...im a person arent i?)

XxprokillahxX - June 9, 2011, 6:51 am

Geez i haven't taken hacking serious enough, i am going to start covering my tracks before i get caught, or arrested.

AngekBuster - June 9, 2011, 7:16 am

great thread mate , gud really gud

Basics. - June 9, 2011, 8:11 am

Nice work on the thread, but most hackers are hard ass, they don't give a shit lol.

zenawenliang - June 9, 2011, 10:43 pm

Delluzion, you made me lul, but I have a problem I can't conenct to internet when I am on my wifi using ProXPN, any tips?

T-rom - June 13, 2011, 3:55 am

Ahh hmm I am not sure :P I have never had that problem myself nor heard of it o.o

dagaul101 - June 13, 2011, 5:41 am

Hacking could land you in serious trouble if you tamper with government resources, as they have the reach to find you

T-rom - June 13, 2011, 5:54 am

(Jun 13, 2011 05:41 AM)dagaul101 Wrote: [\[CITE\]](#) Hacking could land you in serious trouble if you tamper with government resources, as they have the reach to find youExactly, so do most major corporations.

Sony would be the exception..

MaGiK - June 18, 2011, 7:12 pm

I really enjoyed reading this, thanks for explaining! ?

T-rom - June 18, 2011, 7:20 pm

(Jun 18, 2011 07:12 PM)MaGiK Wrote: [\[CITE\]](#) I really enjoyed reading this, thanks for explaining! ?
Glad you enjoyed it)

I read a lot of incomplete rumors about what will happen if your caught spreading around so I decided to make this...

Im glad som any people have read it :]

drewdaniels - June 18, 2011, 10:01 pm

thanks for finally clearing this up

Zovers - June 18, 2011, 10:11 pm

Thanks for the explanations and links, very helpful!

Master Coder Keith - June 18, 2011, 10:27 pm

Say I only use rats and I use Porxpn only when I use rats and I infected a couple dozen people, and I'm underage in the states, what are the chances I will be caught/get in trouble :/

T-rom - June 18, 2011, 10:30 pm

Honestly, they almost NEVER go after people like you (for rats).

1. under a few hundred and you wont even rais a flag.
2. As long as you dont do anything dumb like steal CC's your fine ;P.

but just keep safe and use that proxy ;)

Master Coder Keith - June 18, 2011, 10:33 pm

Thanks mate! Hope I don't accidentally infect some gov' computer

T-rom - June 18, 2011, 10:36 pm

you wont :P don't worry haha

barbim - June 18, 2011, 11:30 pm

well that pretty much depends on what you do, for example im messing with Brazilians that are in war on a game, so I drop theyr coneccions and they don't even know who it was lol :D

T-rom - June 19, 2011, 5:16 am

Bahahaha that would really piss me off ;) Just be careful they never find ya

Eruditus - June 19, 2011, 6:23 am

Everything in life you do is a risk, atleast that's how I live my life.
Only get one life so do as much as you can :D

But yea pretty good info :) thanks 4 sharing.

LuNiZ - June 19, 2011, 10:31 am

Great post really interesting. Thanks for taking time out to do it

boogiebrice - July 6, 2011, 5:18 pm

holy shit side ways, i just did my first web hack today on a .gov site with just a VPN no proxy D: oh shit me out. the risk of me getting caught on this shit!?

SaNe - July 6, 2011, 5:43 pm

Good info. Thanks for sharing.

T-rom - July 6, 2011, 7:40 pm

(Jul 6, 2011 05:18 PM)boogiebrice Wrote: [\[CITE\]](#) holy shit side ways, i just did my first web hack today on a .gov site with just a VPN no proxy D: oh shit me out. the risk of me getting caught on this shit!?

Id just highly suggest never doing a .gov site... They can go to the proxy service and ask them for the real IP and then trace back to you.

(Jul 6, 2011 05:43 PM)J0hnnny Wrote: [\[CITE\]](#) Good info. Thanks for sharing.

Thanks :)

VIRUZ™ - July 24, 2011, 11:48 am

Encrypting your hard drive so someone told me in the uk if you refuse to give the key they will arrest you for upto 5 years.

bckc - July 24, 2011, 12:32 pm

I've defaced .gov and .edu sites before. Most people who get caught are just DDoS skids.

'Major - July 24, 2011, 12:40 pm

Some nice information. Knew it all except the cybercrime.gov link, I'll have to check that out later.

Fortunately here in the UK they go easy on < 18 Cybercriminals because they take the view they don't get enough attention, are depressed etc and they need help rather than punishment.

Although it's still better not to get caught in the first place ;)

Offtopic: HF blocks a lot of vpns/proxies. What do you do/use?

Sokyoku - July 24, 2011, 1:08 pm

This is a great read! Keeps people cautious at all times :D

morpheus_11 - July 24, 2011, 1:12 pm

great info thank you, definately comes in handy for a beginner like me

T-rom - July 24, 2011, 2:39 pm

(Jul 24, 2011 11:48 AM)VIRUZ™ Wrote: [\[CITE\]](#) Encrypting your hard drive so someone told me in the uk if you refuse to give the key they will arrest you for upto 5 years.This is true, but it wills till slow down the process. But you will end up having to provide the key.

Which is why you wipe it ;)

(Jul 24, 2011 12:32 PM)bckc Wrote: [\[CITE\]](#) I've defaced .gov and .edu sites before. Most people who get caught are just DDoS skids.

Thats awesome, you should have gotten that on rankmyhack.com ;P

And well, this "guide" is mostly for those new to hacking and new to protecting themselves. (Jul 24, 2011 12:40 PM)Major Wrote: [\[CITE\]](#) Some nice information. Knew it all except the cybercrime.gov link, I'll have to check that out later.

Although it's still better not to get caught in the first place ;)

Offtopic: HF blocks a lot of vpns/proxies. What do you do/use?

I do not use anything for Hackforums, due to the fact I don't feel the need to hide on here.

I refrain from posting anything that links me and my real self (err...sortah). And I don't post anything of blackhat activities.

I will not post how to get on with a proxy/vpn publicly due to the fact that scammers/people infecting other members could use it too jump right back on.

bckc - July 24, 2011, 3:21 pm

Quote:Thats awesome, you should have gotten that on rankmyhack.com ;P

And well, this "guide" is mostly for those new to hacking and new to protecting themselves. I signed up for rankmyhack only 15 mins ago so I only have 1 site hacked on there.

I'll hack a few more tommorow though.

EDIT: Oh btw if anyone wants to risk getting caught hacking a .gov site I just uploaded a shell here:

<http://cautreo.gov.vn/Portals%5C5%5Cshell.asp;me.jpg#>

I'm not responsible for whatever anyone does with this shell. ?

Miki989 - July 24, 2011, 8:16 pm

DONT HACK BIG COMPANIES, GOVERMENT SITES AND PROFILES AND DONT PRESENT YOUR SELF LIKE SOMEONE WHO EXIST, AND EVERYTHING WILL BE OK.

bckc - July 25, 2011, 12:22 am

(Jul 24, 2011 08:16 PM)Miki989 Wrote: [\[CITE\]](#) DONT HACK BIG COMPANIES, GOVERMENT SITES AND PROFILES AND DONT PRESENT YOUR SELF LIKE SOMEONE WHO EXIST, AND EVERYTHING WILL BE OK.

1. Turn off caps lock.
2. Learn how to protect yourself whilst hacking.
3. Learn that everything in life is a risk, live for the moment.

Inso - July 25, 2011, 12:27 am

I've hacked a few .edu and .gov sites. Just check my rankmyhack (can be found in signature). I'm gonna have a go with that shell you uploaded, thanks for the share :P

amandawantstohack - July 25, 2011, 10:00 am

Thanks for sharing!!! ?

Basics. - July 25, 2011, 10:23 am

This is probably one of the most important guides a beginner must follow.

hak123 - July 25, 2011, 2:43 pm

Thanks for the post, and I agree there are lots of risks associated with hacking

jamalsaghar - July 25, 2011, 10:11 pm

Good work, thanks for information :)

TH3 M45T3R - July 26, 2011, 4:52 am

thanks for the knowledge it will keep people away from going right into trouble

Slingdad - July 28, 2011, 4:47 am

Thanks, just downloaded proXPN. If I could give you rep I would ;)

Fingz - July 28, 2011, 4:54 am

Lovely stuff :) good work!

MegaHackerOne - July 28, 2011, 5:04 am

well, after reading this, I decided to create a new anonymous name and be 100% or 99% anonymous, well thanks much man

"bread stealer arrested" lol just kidding

incomunity - August 15, 2011, 6:36 am

Very nice tut and kinda awesome explained!

(May 30, 2011 06:33 AM)T-Rom Wrote: [\[CITE\]](#) Proxpn- No logs = Great.

I just want to tell you something, although I'm not sure if it is 100% right or wrong. If it's wrong please correct me.

ProXPN is not a good VPN, it keeps logs and everything..

Inso - August 15, 2011, 8:49 am

ProXPN in fact DOES keep logs. They don't allow the use of its proxy service for any illegal or unwanted thing, including DDoS, spam, hacking, etc. They have an email for violation against their terms of service, and if you violate them and someone contacts them with packet logs, they will report to the authorities and give your real IP to the victim if they request it.

kez7680 - August 15, 2011, 9:29 am

Im sorry I am not a technical person with computers. Say I purchased a fb password. How do I log in to that person's account without them knowing it was me, they would know it's me if fb told them it was accessed from my island. I only know how to use a program called hide ip speed, but I usually only use that to watch movies and programs that you have to be in America to watch.

How can I cover myself pls?

thanks

HobbilyPlunt - August 15, 2011, 9:49 am

can someone track you if your using things like aircrack-ng ?
sorry if its a bad question, I am a noob

Thanks,

(pretend this is a wicked signature, ok? thanks)

T-rom - August 16, 2011, 5:40 am

(Aug 15, 2011 09:29 AM)kez7680 Wrote: [\[CITE\]](#) Im sorry I am not a technical person with computers. Say I purchased a fb password. please read through their TOS and FAQ'S.
They do not keep logs, but they will terminate any service they find being used for illegal activities (if you run into a honey pot or you are reported, they really aren't monitoring unless your doing something massive throwing a lot of red flags up).
They keep no logs for one reason, so there are no logs to be asked for.
the cops can not take what is not there.

Fiddl - August 16, 2011, 5:54 am

(pretend this is a wicked signature, ok? thanks)
Using the program itself not, but if you use a cracked WLAN for illegal things, it's pretty easy to get

caught as long as you don't spoof your MAC, use a VPN and so on.

DarkDanut96 - August 16, 2011, 7:07 am

I'am infect a PC with a RAT 4 years and i sky there webcam , =)) , XXX !

kez7680 - August 16, 2011, 7:57 am

Thank you T Rom. What is a VPN though? How do I use it, like with hide ip speed just download and turn it on? Is it free? I paid for hide ip speed

manu.mbm - August 16, 2011, 8:05 am

hey..nice thread bro..i;m also a beginner and will mind all the precautions..thanks

T-rom - August 16, 2011, 2:13 pm

Well a VPN = Virtual private network *im tired, correct me if wrong*.
It takes your packets/data transfer, and pretty much hides it using the VPN'S identity.
Diagram

[your computer]&-->[VPN company]---->[website]

kez7680 - August 16, 2011, 2:18 pm

Isn't that the same as hide ip? Are these VPNs free?

T-rom - August 16, 2011, 3:35 pm

(Aug 16, 2011 02:18 PM)kez7680 Wrote: [\[CITE\]](#) Isn't that the same as hide ip? Are these VPNs free?
I personally don't know much about hide ip, but it sounds like a vpn.
Some are free (proxpn. For example). But paid are normally best

Rick maahea - August 17, 2011, 2:47 am

great article OP, and even better signature. the only hackers that don't get caught are the ones no one knew exist. and pardon my ignorance but someone please tell me what the hell l33t means. @ golliath808, your signature is pretty gnarly except that i didn't read the numbers, but you did succeed in confusing me.

Inso - August 17, 2011, 1:39 pm

l33t means leet which means elite. :P It's a "l33tspeak" term.

adidasf50soccer - August 17, 2011, 9:35 pm

ProXpn charges a monthly fee now apparently? No more free accounts :(Just when i watched the Tut, installed their stuff, I went to connect and they want a monthly fee. Is there a better, secure, free VPN that I could use, or should I suck it up and pay for proXPN?

T-rom - August 17, 2011, 9:40 pm

(Aug 17, 2011 09:35 PM)adidasf50soccer Wrote: [\[CITE\]](#) ProXpn charges a monthly fee now apparently? You said Proxpn doesn't take logs?

Quote from PROXPN.COM

"Refers to your ISP, corporations, consortiums, governments, hackers, sex offenders, identity thieves, and more. proXPN may not be used for criminal purposes."

;))

Yes, but this does not say they keep logs. This says they dont want this activity.

Ill show you another quote later. (Aug 17, 2011 09:46 PM)adidasf50soccer Wrote: [\[CITE\]](#) almost 100% sure that they charge you now, but okay. thanks. If there's anything free and similar to Proxpn, i'll just use that. Thanks for your guide though! Very informative.Look up hotspotshield. I dont enjoy it, but it gets the job done

Insidious. - August 17, 2011, 11:06 pm

Lol, They take logs.. a PAID vpn doesn't take logs. Because you paid for it. Yea, show me another quote, anyone will agree with me, that they DO infact take logs.

T-rom - August 17, 2011, 11:13 pm

(Aug 17, 2011 11:06 PM)Suggestion Wrote: [\[CITE\]](#) Lol, They take logs.. a PAID vpn doesn't take logs. Because you paid for it. Yea, show me another quote, anyone will agree with me, that they DO infact take logs.

Give me 2-3 hours as of im at work.

Also, paid vpns may also keep logs. Your payig for bandwith.

ShadowCloud - August 17, 2011, 11:18 pm

Regardless even in the event that your VPN provider doesn't keep logs, your ISP still does (They are required to by law). I've had this debate countless times, if the data packets can find your

computer from the target, it can be traced.

Your only way of making sure your traces are eliminated completely is by removing them yourself. Unless you are running your own ISP, it's tricky to accomplish and you'll be racking up a couple of felonies to ensure you can't be traced, which I don't need to explain is extremely high risk.

VPNs and Proxies only make it harder, it's like electric fence around your house, it won't keep the pro's out, but it increases the effort involved in getting to you, making it more likely that they'll pass and move on to the next house.

T-rom - August 17, 2011, 11:27 pm

Very true, and good point.

Spoofing your mac is also a good idea for anonymity.

Also as for my quote for no logs

"Q:how does proxpn work"

"A: proXPN works by creating a secure, highly encrypted connection between your computer and the Internet. This protects your identity and activity online.> No records of your activity are kept (unlike a normal internet connection). <" Very true, and good point.

DeathandTaxes - September 29, 2011, 6:31 am

(May 30, 2011 06:33 AM)T-rom Wrote: [\[CITE\]](#) If you are inside of the US military, there are no laws that pertain directly under "cyber crime" But you will be charged with the following.

A. with misuse of government equipment you can be charged under article 92.

B. 134 can apply to other things (including child pornography and such as illegal materials).
and

C. 133- "Conduct unbecoming an officer and gentleman".

You can also be charged with Computer fraud, depending on what you do Obstruction of justice or lying to investigators.

I worked Law Enforcement in the military. You can only be charged with Article 92, UCMJ - Misuse of Government Equipment if you use a government computer or internet to to the hacking. Article 134 covers pretty much anything and everything. The exact elements are:

1. Detrimental to good order and discipline. or,
2. Brings discredit upon the armed forces.

And for Conduct unbecoming an officer and gentleman, you have to be a commissioned officer....

Also, you will only be charged under the UCMJ if you only hack into military computers from a military post. The second you either go off base/post or hack into something not military related it becomes a Federal Law violation and they have jurisdiction...

T-rom - September 29, 2011, 6:33 am

ClickBankMonster - October 5, 2011, 3:50 pm

I have to point something out about VPNs that most seem not to realize. Most of the VPNs people (especially here on HF) use are not at all anonymous. Sure, they may prevent traffic from being read by third parties at one point. But, the traffic will eventually be seen by an ISP. So, strike 1

Next, most law enforcement don't waste their time going through VPN providers. They start by asking the data center that hosts the server for info. Most VPN providers just rent servers anyway. Most of the time, the data center will hand it over easily. Strike 2

Finally, even if your provider has an offshore HQ, rents servers in offshore data centers that care less about abuse, and try to protect customer data. Most people make a simple mistake (Like paying for a VPN with an account that has your real info on it). Strike 3

All in all, no amount of proxies, anonymity, or encryption will protect against stupidity. Be safe Be smart and you will stay away from Bubba.

Grind - October 5, 2011, 4:30 pm

I will be offering a service like this real soon, i will contact you bro.

T-rom - October 5, 2011, 7:04 pm

All in all, no amount of proxies, anonymity, or encryption will protect against stupidity. Be safe Be smart and you will stay away from Bubba. That is very true, and the point of this wasn't really how to stay anonymous.

The point was there is a high risk to hacking which most people don't realize (okay most beginners).

Proxies and VPN's are just there too help, mostly due to lazy management of servers who don't bother reporting. And if they do lazy police investigations who don't go very far into it (mostly due to having higher prioritized cases to handle).

(Oct 5, 2011 04:30 PM)Grind Wrote: [\[CITE\]](#) I will be offering a service like this real soon, i will contact you bro.
do not spam on my thread.

What service will you be offering.

I have seen you post this in a few other places, and I believe it is not legit and is a scam.

-Nix- - October 7, 2011, 10:14 am

So does proXPN block ALL traffic to and from your computer? Even applications like DC, CG, and all that good stuff? Unlike proxies that only block your browser traffic?

nmEheh - October 7, 2011, 11:05 am

What about Hide my ass? It's a better proxxy IMO

keener - October 8, 2011, 3:46 am

How about TCPcrypt, is it secure? How can we prevent eavesdropping whilst using TCPcrypt?

aliko100 - October 8, 2011, 3:48 am

Wow I just enjoyed your thread.Good work !

But how about posting some not very legal thread stuff here on HF ??

raX0r - October 8, 2011, 4:28 am

(Oct 7, 2011 11:05 AM)nmEheh Wrote: [\[CITE\]](#) What about Hide my ass? It's a better proxxy IMO

Yes you can use it if you are not doing any illegal stuffs..

One reason not to use, hidemyass.com for illegal doing. ?

According to HideMyAss.com, "...services such as ours do not exist to hide people from illegal activity. We will cooperate with law enforcement agencies if it has become evident that your account has been used for illegal activities." The service stores logs for 30-days when it comes to Website proxy services, and they store the connecting IP address, as well as time stamps for those using the VPN offerings. Emails seeking comment on HideMyAss.com's level of cooperation with the FBI, as well as to confirm what information was made available, were not returned.

Appl3op - October 8, 2011, 4:34 am

Nice thread op

i really like it but was not you scarring people a lot ?

lesecure31 - October 8, 2011, 4:40 am

Very good Threads : for those who think that it's easy to be hackers

Two many people think that they can be easily gods-of-rat and spying everyone.

Even if you spy a girl or a men, pay attention that this person isn't a gouvernement or a military employee : they frequently use corporate laptops that are daily or weekly security checked.

?

The Invader - October 8, 2011, 4:54 am

You claim here ProxPN does not save logs but i heard the do. Which one is true ?

T-rom - October 8, 2011, 6:44 am

(Oct 8, 2011 04:54 AM)The Invader Wrote: [\[CITE\]](#) You claim here ProxPN does not save logs but i heard the do. Which one is true ?

I am not 100% sure at this time.

They have changed their privacy policies and it is bothering me some bit.

I do trust them too an extent (I have used them all the time i have been hacking).

But if your going to get into any REAL hacking, go to the marketplace and buy a good one from our members. (Oct 7, 2011 10:14 AM)-Nix- Wrote: [\[CITE\]](#) So does proXPN block ALL traffic to and from your computer? Even applications like DC, CG, and all that good stuff? Unlike proxies that only block your browser traffic?

Traffic ? err...it doesn't block traffic, it encrypts it..

But yes a VPN normally covers ALL of the traffic coming in and out of your computer, versus a proxy. which only does a Browser (Oct 8, 2011 03:48 AM)aliko100 Wrote: [\[CITE\]](#) Wow I just enjoyed your thread.Good work !

JeanFawkes - October 10, 2011, 1:01 pm

And I was about hacking to hack NATO?

pasarea - October 10, 2011, 2:30 pm

very impresive ...good job...1000 tnx for the advise

somehaxor - October 10, 2011, 2:40 pm

In terms of destroying evidence of hacking, this does not mean move it to the recycling bin and empty recycling bin. The hard data of what ever it is you empty still exists and it can be retrieved using a system recovery program. This is because emptying something out of the recycling bin just removes the reference of the file. In order to actually delete it, you will need to overwrite the binary data. I recommend using Eraser or CCleaner.

TheRageWay - October 10, 2011, 4:11 pm

Thank you a lot ! I try my best :)

super3 - December 17, 2011, 4:35 am

thanks you very mush for this nice thread

moralthief - December 18, 2011, 11:21 pm

Good thread T-Rom, but I'm still a risk taker :)

tokzikate - December 19, 2011, 1:18 am

Thanks heaps for this thread man :)

zaki19 - December 22, 2011, 6:23 am

i am happy because in algeria there is no risks

BaMBuS - December 22, 2011, 8:54 am

Ty for this tutorial!!!! I enjoyed while reading this :) Good JOB !!

Silent Shadow - December 22, 2011, 9:03 am

Great thread man!! thanks heap's!!

~Silent Shadow ?

rubydacherry - December 22, 2011, 9:11 am

For using your real email, I reccomend downloading the Trashmail add-on for Firefox. If you're using any other browser, you can still use <https://ssl.trashmail.net/> to create a quick email.

T-rom - December 22, 2011, 9:55 am

I am really glad you guys have enjoyed this ^.^

As for emails: I actually know people who make a email and log into via VPS+VPN/PROXY.

It seems to work for them, yet i prefer trash emails.

TannerGuy - December 22, 2011, 9:35 pm

this is amazing, i read the whole thing and the story's after, thanks very intertaining.

T-rom - December 23, 2011, 8:54 am

(Dec 22, 2011 10:35 PM)TannerGuy Wrote: [\[CITE\]](#) this is amazing, i read the whole thing and the story's after, thanks very intertaining.

Glad it was amazing and entertaining :)

I hope to soon be posting a thing on :: what hacking used too be, what hackers were, and what they mean too today's people. ::

No promises ;P But its already started.

HeyGuise - December 26, 2011, 7:36 pm

Interesting thread...

Just wanted to note that everyone in your "Links under 18" section was doing something considerably dangerous. I mean come on - Hacking the police? Hacking a school? DDoS'ing a server run by a tech/game company? Yeah...

SkipTheDishes - December 27, 2011, 8:53 am

I always thought they couldn't do shit if you were under 18.

Nice guide matey ?

Puissant - December 27, 2011, 10:30 am

I'm uh ing this because it doesn't deserve to be on second page (:

Very nice guide.

FuhrerWulf - December 27, 2011, 8:04 pm

I did research on proxpn. They said on a youtube video, they will not tolerate any sort of hacking and will turn your ip into them. They do have logs of the ip you connect with and what ip you connected to.

T-rom - December 27, 2011, 8:10 pm

(Dec 27, 2011 11:30 AM)Puissant Wrote: [\[CITE\]](#) I'm uh ing this because it doesn't deserve to be on second page (:

Very nice guide.

Haha :) thanks

(Dec 27, 2011 09:04 PM)PhantomHF Wrote: [\[CITE\]](#) I did research on proxpn. They said on a youtube video, they will not tolerate any sort of hacking and will turn your ip into them. They do have logs of the ip you connect with and what ip you connected to.well when this was first posted they had stated they kept no logs.

Hydra_ - December 28, 2011, 1:22 pm

nice and cool thread brother, keep it up ;)

T-rom - December 28, 2011, 1:52 pm

Thank you Hydra :)

I have seen you around (other than the help you just gave me <3) And I really love your posts :)

filoune - January 4, 2012, 10:20 am

nice thread , Thank you for this thread !!!

Ultimatum™ - January 7, 2012, 9:00 pm

Yes, well written article. If anybody took the time to read this they would definitely learn something.

n0de - January 7, 2012, 11:49 pm

Well you could get a lawyer to say that you were going to alert the site owner of the security hole once you were done and that sometimes works most of the time as that's how mine have been :P

torque - January 8, 2012, 2:03 am

This is a really really really good thread!

dome321 - January 8, 2012, 4:57 am

Thanks for the tips, how to stay anonymous it helps me very well.

dome321

lulzripper - January 17, 2012, 8:39 pm

I am curious about the English laws on encrypted archives/volumes/drives such as those used with Truecrypt. Are you obligated to provide the passwords when asked or are you within your rights to decline? Or, as i would guess, does this depend upon the authorities suspicions relating to you? Some answers would be much appreciated :)

Puissant - January 17, 2012, 8:43 pm

(Jan 17, 2012 09:39 PM)lulzripper Wrote: [\[CITE\]](#) I am curious about the English laws on encrypted archives/volumes/drives such as those used with Truecrypt. Some answers would be much appreciated :)

You have the right to privacy unless they provide a warrant you are not required to provide a password. Even at that point you can simply hand them your computer and say i forgot the password.

tigerz09 - January 30, 2012, 4:08 am

thanks for the info.. helps out alot :)

T-rom - January 30, 2012, 4:27 am

I shall hopefully be updating this guide very soon with new information about how to A. stay anonymous, and B. crypt drives and such.

Not sure if ill actaully get around to it, but I have started

KingKratom - January 30, 2012, 5:17 am

Thanks alot this will help in the near futer ?

ncoder - January 30, 2012, 6:30 am

Great info, learned stuff I didn't know
Thank you

Dik_In_D_Ai - January 30, 2012, 11:19 am

Thanks so much for this cleared some serious questions for me
so i use hotspot vpn how do i erase logs??

Dik_In_D_Ai

bozzman - January 30, 2012, 6:18 pm

there is always gonna be some risk involved.. nice post thanks

emizty - February 13, 2012, 4:01 pm

Very good thread!
Thanks for posting, i enjoyed reading it:D

Rtap - February 22, 2012, 4:40 am

What about aurora? Does that work as protection?

Shizune - March 3, 2012, 1:40 pm

So glad I found this before doing anything, made sure I got a decent vpn paired with no-ip before I did anything =p

Blad?s - March 3, 2012, 3:06 pm

Very good post! I'm really glad you posted this, good job, and I hope to see more of you later on! :D

Simons3n - March 5, 2012, 10:29 am

Thanks for the good thread i'll remember this.

blackhatboy - March 7, 2012, 9:01 am

good to know about risk of hacking....thanks

deinocheirus - March 7, 2012, 9:10 am

great, really useful. Thanks for your thread :)

infineous - March 8, 2012, 6:26 am

Hey thanks was actually scared to start hacking and sending RAT but now have some courage as i was thinking this would get me in deepshit trouble.

EpicDancer12 - March 8, 2012, 1:37 pm

im new here someone please pm me ive got no knowlehde

Crusher - March 8, 2012, 1:50 pm

It mostly depends where you live. Here in Bosnia law for hacker is not strick. Somewhere (Netherlands i think) you get 16000\$ for hacking here is bosnia i doubt they give shit if its not .gov. And vpn + proxy is not keeping you anonymous and its not removing logs it will just make harder work for police (but not imposible) so if they really want to catch you they will do it!

T-rom - March 9, 2012, 7:55 am

(Mar 8, 2012 02:50 PM)Crusher Wrote: [\[CITE\]](#) It mostly depends where you live. Here in Bosnia law for hacker is not strick. Well thats exactly the point here. You need to know your local laws, and know that your never 100% anonymous. YOu CAN get caught and chances are you WILL just don't be stupid and you have better chances of not getting caught.

Also thanks for your post :) I can see you think your posts through

Flepz - March 9, 2012, 8:00 am

Wow I just enjoyed your thread.Good work !

zdog685 - May 11, 2012, 3:06 am

That makes you not want to do even small hacks=P

King of the South - May 11, 2012, 3:41 am

Thanks a lot mate for the sharing.

It's really good and i value the importance of the message.

Keep it up. Wish you success in the upcoming guide as well.

Regards.

Braykedown - May 13, 2012, 10:51 pm

AkBeastin - May 24, 2012, 7:50 pm

This cleared up a lot of stuff for me. I noticed a trend that in all the arrests for hacking the majority were from Europe. I know that doesn't mean that im safe here in the US but is it because the US is more lenient on this subject or its just not in the news. Also i was wondering if i can still RAT if i have a VPN. Thanks!

T-rom - May 24, 2012, 8:04 pm

(May 24, 2012 07:50 PM)AkBeastin Wrote: [\[CITE\]](#) This cleared up a lot of stuff for me. I noticed a trend that in all the arrests for hacking the majority were from Europe. Thanks!

1. It is not ANY more safer. They aren't "more lenient" but rather they have a lot of different things going on at once.

2. They are not in the news as often.

3. Yes a VPN should be fine if your ratt'ing. Just make sure not too use a honeypot (Trap).

Reficul.v64 - May 30, 2012, 9:55 am

Nice thread, thank you for this informations...

DrKIRd - June 3, 2012, 9:55 pm

guys, if i hack banks and steal their money will i get caught even if i am in Bangladesh ?

super666atheist - June 10, 2012, 7:53 am

man thanks a lot this really helped me.

have a aim - June 17, 2012, 9:50 am

Can you tell how to hack this site.??

www.resoweb.resonance.ac.in

Thanks for reading. :)

Noyr - June 17, 2012, 10:30 am

Thanx for da post.. really helpful for beginners like me

beastmode16 - June 30, 2012, 10:48 am

it's so very informative dude.. and actually I'm using HotSpotShield but it's still vague for me.. thanks a lot bro for this thread of yours.. I'm gonna subscribe to this. hehe

domien - June 30, 2012, 11:03 am

Thanks for posting this, answered all my questions! :)

VERY VERY easily. so YES

You should hard wipe it, then encrypt, then wipe again.

also went over earlier

(Aug 15, 2012 02:51 PM)Xex-LivelsDown Wrote: [\[CITE\]](#) can they still get the data if you reset your computer back to factory setting from having it full with hacking programs back to were you have to install every think again? to make it seem as if you just put the hard drive in.

I slightly touched on this but thanks for the advice, ill try to add some parts going more in depth about that ^.^

oCake - December 29, 2012, 7:21 am

Thank you for this, helpful in every keystroke.

jredz747 - December 29, 2012, 2:18 pm

Anyone remember the kid that got caught? big hacker. can't say the name, but if your not that big and you don't try and hack the CIA you should really be fine.

prime0321 - January 31, 2013, 9:57 am

Wow. This really was helpful to know. Thanks for the links.

kepa50 - January 31, 2013, 12:05 pm

Only a fool can get caught hacking. You should always do your crime as a smart criminal. The

inteligents can always track back your shit to you. All hacking should be done wireless no matter what. You can do your reserch at home then go to a caffe and use a wireless to break the law. You should change caffe often and never go inside, stay in a car. If you are a hacker you should have a computer for that only. You can't get cought overnight. They would have to set a trap for you.

nemsis09 - January 31, 2013, 1:19 pm

hi , thank you very much good threads

-Tebiozz- - February 12, 2013, 12:23 am

I'd believe the cybercrime link you provided is the one that got updated some time ago, and is now <http://www.fbi.gov/about-us/investigate/cyber> <---- just correct me if I am wrong, but this is the one I've known for a while now

T-rom - February 12, 2013, 2:04 pm

but yes the money is always good ;)

WhiteLionz - April 14, 2013, 3:11 am

Thanks for making this. I'm brand new to this world and I'm just reading, reading and reading about all aspects :)

OnlineSpartan - May 4, 2013, 7:28 pm

Seems slightly skiddish/ "brand flippin new" member info.

Heres what I do to "up" my security.

1. Ipredator (based in Sweden, no logs held apart from connection time. Interpol must be involved to release logs.)
2. CCLEANER to remove ALL cookies/history when disconnecting from VPN.
3. Don't use any services running that are still available when disconnected from VPN (ex. Dropbox, No-IP, etc)
4. VM for any serious stuff. If things go downhill, terminate VM and start over.
5. Peridically use program 'Eraser' to wipe empty space to delete files that I deleted to make things unrecoverable.
6. If possible, avoid using OWN ISP. [Hack your neighbors WEP/WPA/Open connection :)]

Eminent - May 4, 2013, 11:46 pm

Only Fags And Aush0k Get arrested

#LongLiveTheSh0k

Mad76e - September 6, 2013, 12:00 pm

Theres always a risk. Sooner or later everyone makes an small mistake, how skilled you claim to be. thats a fact. It is possible to minimize the risk, but not to remove it completely.

In some cases VPN/TOR No-IP-DNS is not enough..

Do not think that you are safe because you using TOR or some other anonymous services

Laksida - September 6, 2013, 12:03 pm

thank you for this man!n ?

Blax - September 6, 2013, 12:05 pm

Nice sharing. I don't really need to be scared at all though, I'm using a dynamic IP router. Also, I have always been strict to the VPN whenever I attempt to hack.

T-rom - October 16, 2013, 2:53 pm

(May 5, 2013 10:18 AM)OnlineSpartan Wrote: [\[CITE\]](#) Ahh touché good sir, the date appears to be off quite some time...

Ill say, yes you are correct with the original statement of "brand new member" info.

But ya know, most people just don't think about this stuff.

They don't consider what can happen until its too late.

And you take some pretty good precautions

Blackout08 - October 16, 2013, 5:00 pm

Thanks for this info, as a new member, I'm glad i saw this. It looks like I'll be doing more research on staying protected. Thanks!

PatSec - October 16, 2013, 6:30 pm

Very nice quick tut, Newbies need to understand the risks they are taking.

Tirus - October 17, 2013, 4:38 am

Hacking has its risk, and if you do any sorts of hacking, and you are a actual "Hacker" you would know this.

It is also something to do to grow your intelligence, some people can use hacking into good things, and make livings off of them,

Some use there intelligence badly, and do something called "Black Hat" hacking, which is very illegal, and can get you into trouble.

So, if you think you are a hacker, I suggest you be protected if you want to do "Black Hat" hacking, also if you WANT to be come one, please.. Take all the advice you were given, and think twice about becoming a "Hacker".

T-rom - October 17, 2013, 1:35 pm

But I think if those who wish to become black hats, or even gray hats, they should realize the risks and truly think it over

sunq - October 17, 2013, 5:13 pm

Take this to heart: NEVER USE LOIC/HOIC Not only does it not work/very weak it's just not worth it.. think before you download it.

ExtazZ64 - December 18, 2013, 6:56 am

Thank you I have learned lot of things here :)

0x87 - December 18, 2013, 7:05 am

Thanks for all the information in this thread
Bookmarked

aceb - December 18, 2013, 7:54 pm

very good info, should probably be a sticky so people really know the risk.

TheRelativeSingularity - December 19, 2013, 7:20 am

Yes definitely be very careful, it may feel like a game to you but no so much to others.

T-rom - January 8, 2014, 3:18 pm

I hope it helps out

Also check out
[My Log Thread](#) If you would like more information on logs

(Dec 18, 2013 08:54 PM)aceb Wrote: [\[CITE\]](#) very good info, should probably be a sticky so people really know the risk.

Sticky or not people will hopefully be smart enough to atleast search.

I mean I did make the name pretty obvious.

(Dec 19, 2013 08:20 AM)TheRelativeSingularity Wrote: [\[CITE\]](#) Yes definitely be very careful, it may feel like a game to you but no so much to others.

Exactly.

You are thinking "hey its fun, ima rat this girl an be 1337 h@x0r then dd0s the school lol"

and then be brought up and Federal offenses

MadeByGM - March 4, 2014, 3:00 am

Really nice thread !
I'll watch out :s haha

kqb893 - March 30, 2014, 5:17 am

Thanks mate for share nice tutorials,.. Thanks again and keep it up..

Skylar™ - March 30, 2014, 5:37 am

This does seem a little bit.. intimidating.. However, the ones who get caught are the one's who don't cover up their tracks. They brought it upon themselves.

https - March 30, 2014, 5:43 am

Too much color in this thread, sorry, you've lost my attention.

Ignoble - April 1, 2014, 3:44 am

You have to remember this, rich/wealthy people did not get to where they are in life by not taking risks.

yasje - April 1, 2014, 3:56 am

This must be a sticky, for everyone !

T-rom - May 27, 2014, 11:21 am

FearTheLimit - June 24, 2014, 1:10 am

This is a very useful post! Thank you very much sir! :)

brot - June 24, 2014, 5:38 pm

Thanks very good tut, I have learn something today :)

Repentant - June 24, 2014, 6:47 pm

Is nvpn still good for black hat activities? Are you sure its no logs?

pyrotheseus - June 24, 2014, 9:24 pm

Thanks for this, it's made me have some second thoughts about this kind of stuff. Its easy money that I need, but there's the chance of fucking up and having my future be ruined. Bleh.

Buller - June 25, 2014, 10:18 am

Thanks for the sharing, good thread OP!

Rubin - June 25, 2014, 1:47 pm

If you're a minor, you won't go to jail unless you're a repeat offender.

T-rom - June 29, 2014, 3:38 pm

(Jun 24, 2014 06:47 PM)Motivational Wrote: [\[CITE\]](#) Is nvpn still good for black hat activities? Are you sure its no logs?

Its average. Id suggest it over most

(Jun 25, 2014 01:47 PM)Rubin Wrote: [\[CITE\]](#) If you're a minor, you won't go to jail unless you're a repeat offender.

UNTRUE.

Depending on the seriousness of the crime you can and will be prosecuted. ESPECIALLY if they want to make you an example

SaiyanCunt - August 11, 2014, 8:29 am

Thanks for the informative post. I'm really interested in "ethical" hacking ;) and was looking to find all of the necessary precautions so this was definitely a step in the right direction.

Matt Bomer ?? - August 11, 2014, 1:30 pm

Wow, 3 years on and this thread is still active, great job on this op.

DsntExist - August 11, 2014, 2:16 pm

(Aug 11, 2014 02:16 PM)DsntExist Wrote: [\[CITE\]](#) This was definitely a unique and useful article. ? Props.

I hope it helps clarify things for people, thanks for the feedback

john12 - September 21, 2014, 10:12 am

Great thread,but I dont think cops will bother go after you for some ddos ar ratting,you musu have done something very illegal,like carding,encrypting ransomware or be a blackshades user to be in big trouble...

xRobinV2x - September 21, 2014, 11:55 am

I honestly do doubt anyone from hackforums will be able to work there way into us military computers/network.

DPR™ - September 21, 2014, 1:07 pm

This thread is so old and I never saw it arround.

Great one OP.

T-rom - September 21, 2014, 8:28 pm

(Sep 21, 2014 10:12 AM)john12 Wrote: [\[CITE\]](#) Great thread,but I dont think cops will bother go after you for some ddos ar ratting,you musu have done something very illegal,like carding,encrypting ransomware or be a blackshades user to be in big trouble...

This is the exact OPPOSITE of the reason I posted the thread, they WILL go after you and they WILL press charges

(Sep 21, 2014 01:07 PM)1Byte Wrote: [\[CITE\]](#) This thread is so old and I never saw it arround.

Great one OP.

Thank you :) Well you've seen it now ! it gets buried sometimes then randomly pops back up.

(Sep 21, 2014 11:55 AM)xRobinV2x Wrote: [\[CITE\]](#) I honestly do doubt anyone from hackforums will be able to work there way into us military computers/network.

Basic military un-classified systems use McAfee antivirus as well as other firewalls.

They use a lot of registry editing to disallow any type of tampering as well as to block USB's.

Everything is localized to each user so that changes or infections wont spread to another account, and if there is a change that is unauthorized the whole computer locks itself down until an admin unlocks it or resets it.

SO, I highly doubt MANY people from hackforums could do it, but I wouldn't be surprised if they did.

john12 - September 22, 2014, 5:42 am

It would be stupid to hack us military,unless you work for russian or chinese gov,so you have some protection against NSA

T-rom - September 23, 2014, 9:29 pm

(Sep 22, 2014 05:42 AM)john12 Wrote: [\[CITE\]](#) It would be stupid to hack us military,unless you work for russian or chinese gov,so you have some protection against NSA

While I agree, that really wasn't the focus of the thread :P

Luciferum - September 25, 2014, 4:43 pm

Thanks for posting this i like this post, i don't even think of doing any black hat stuff, none.

poxchukka - September 26, 2014, 5:02 am

Thanks for a very helpful post. The USDFOJ's Computer Crime .. section promises to be an interesting and educational read!

T-rom - October 23, 2014, 1:34 pm

(Sep 25, 2014 04:43 PM)LulzLegion Wrote: [\[CITE\]](#) Thanks for posting this i like this post, i don't even think of doing any black hat stuff, none.

Thats good. Again it all depends on what you wan't to do versus the risks you must take

(Sep 26, 2014 05:02 AM)poxchukka Wrote: [\[CITE\]](#) Thanks for a very helpful post. The USDFOJ's Computer Crime .. section promises to be an interesting and educational read!

I am planning on revising this whole thread and adding more up-to-date links and information.

If any of the current links don't work or have changed let me know, or if anyone has any country specific questions feel free to ask.

farokh - November 2, 2014, 4:42 pm

You do realize this thread is from 2011, right?

T-rom - June 4, 2015, 12:01 am

(May 30, 2015 09:51 AM)blu3 Wrote: [\[CITE\]](#) You do realize this thread is from 2011, right?
You do realize that this information is still quite relative, right?

I'll do an update sometime soon, especially with America having such an interesting time with its internet legislature.

Also I know some of the links are deprecated, I'll try to fix that as soon as possible.

megashoeb82 - November 7, 2015, 8:11 pm

wow Nice Thread I just enjoyed reading your thread :D

Nomad.Null - November 7, 2015, 11:23 pm

I'm surprised to see such an old thread coming back to life, but this is one of those exceptions where I'm glad to see it. A rare, golden grave-dig.

Zunder - November 8, 2015, 12:44 am

(May 30, 2011 06:33 AM)T-rom Wrote: [\[CITE\]](#) Second, "If I am under 18, they won't really do anything..right?"

Spoiler ([Click to View](#))WRONG.

They can, and will, prosecute you to the max of their ability. There are many many teens who get in a lot of trouble just because they believe that the law will go easy on them for being "under age".

Below I have a "link" section, there will be "under 18" section where I shall post a few cybercrime cases with people under the age of 18.

If you need an example for an ongoing case, do some research into the recent TalkTalk ISP hacking. (uk) So far the two that have been arrested are both 17 and 15 (I think)

T-rom - November 23, 2015, 11:43 pm

(Nov 8, 2015 01:44 AM)Zunder Wrote: [\[CITE\]](#) If you need an example for an ongoing case, do some research into the recent TalkTalk ISP hacking. (uk) So far the two that have been arrested are both 17 and 15 (I think)

Thanks for the tip, I'll look into it and may add it to the main post.
