It's not a program, its a index page, which is legal. Also if you where to use real codes it doesn't class as FAKE.

It's a generator, you add the codes your self, i don't supply the codes. Like i said you can use real codes or fake, either way you're going to earn cash if using surveys, cpalead, etc..

You just made me facepalm, he's trying to sell the web based site of it, not literally the codes.
