Thread: [\[First Theme\] ?Blood Theme?](#)

Perplexity - May 31, 2011, 9:20 am

Firstly, this is my first theme I have made, I know it's not the best, but I intend to improve so I can make my own themes for my own programs.

Secondly, yes I did base this off of AeonHack's video tutorial so don't bitch and complain at me.

Also, check out my other theme I made: <https://hackforums.net/showthread.php?tid=1339419>

If you can't read anything then I suggest you go the opticians.

No need to get mad, I can read it, but it's requires effort because of the shitty overlay on it.

reGi - May 31, 2011, 9:24 am

Hmmm maybe change the text color to a light grey? that way it would be more readable :p

I apologize, and I'll fix up the ForeColors.

EDIT: Changed the ForeColors.

Just because I feel like it's worth mentioning, my very first theme was this:

[img]http://elitevs.net/aeonhack/modern.png[/img]

That was after having quite a bit of experience writing other controls for months beforehand. For him to pick this up in just a few hours at most is truly amazing. Good job, keep it up.
