Thread: [Tutorial:How to make money using your slaves \(legal\)](#)

Portland Timbers - June 1, 2011, 5:40 pm

Well this tutorial is very simple and is intended for people with big botnets because it will earn you money but not a lot if you have <100 slaves.

How to triple your \$ from this tutorial: After reading through do the process again 2 more times except use different links like yahoo.com or msn.com and send those links to your slaves. But be careful, ADF.LY watches your earnings and if it notices the same IP visiting your links over and over they will ban you.

First you want to head over to <http://ADF.LY> and create an account.

My referral link if you <3 this tutorial: <http://adf.ly/?id=137118>

After you have signed up you want to head over to the "Home" tab and click it.

Now you will see a page like this:

Spoiler [\(Click to View\)](#)

Click on the "Options" tab it will open this:

Spoiler [\(Click to View\)](#)

Now you are going to want to change the "Advertising Type" to "Framed Banner (\$\$\$)"

Yes you will earn a little less money but they don't have to click anything so you get the money automatically.

Finally, you want to enter a URL in here, I would prefer (google.com) because the slave wouldn't really be alarmed of anything:

Spoiler [\(Click to View\)](#)

Now click the "Shrink" tab and copy the link.

Take that link and open it on your RAT's computer and the \$\$ will be flowing in!

YAY! You are now on your way to making money from your slaves the legal way!

Things to add to this topic:

More pictures.

How to use the link on slaves.

How to make more money on it.

Color, uniqueness, and make it more organized.

Or you can use CPI's. Of course, a little more risky-but who gives a fuck?

Bok1ca - June 1, 2011, 5:58 pm

Yeah lol, I was making \$1.00 / day with adf.ly with this method. :D

Well I like using a safer way. But its your choice.

Thanks for posting at least, 30 views about and no posts? lol

This method is really kinda obvious (been doing this for some time) but can help some guys out to make a couple of dollars from their slaves.

cristipnd - June 1, 2011, 11:39 pm

Best way is to set it up so each server visits the link (hidden) on-connect, therefore maximizing profits.

Burnzy - June 2, 2011, 12:03 am

so you will have to go to each slave to open 1 link? o.o

o.o

Just select all your slaves and then open the link.

Blixx - June 2, 2011, 12:35 am

Old method, but it is still working for me:D

kabraxis314 - June 2, 2011, 12:49 am

o.o

No, almost all the RAT's around allow you to select all your slaves and send them to a webpage.

The art of hacking/ratting should be for fun not to get money out of it legal or not.

Lanky09 - June 2, 2011, 6:35 pm

how much do you make per view? i dont have many slaves so i dunno whether it is worth it..

Portland Timbers - June 2, 2011, 10:21 pm

(Jun 2, 2011 06:35 PM)Lanky09 Wrote: [\[CITE\]](#) how much do you make per view? i dont have many slaves so i dunno whether it is worth it..

You make about .0011 cents per slave. So if you have 5000 slaves then you can make \$5.50 per link. Times that by 3 different links and you make \$16.50

Idontknowwhatimdoing - June 2, 2011, 10:36 pm

Yeah this is a good method but your right you need 100+ slaves to actually benefit. My max was only like 20 :p

Status - June 2, 2011, 11:14 pm

I would have too say that this method isn't that original.

But nobody has made a tutorial on how to do it. I know its an obvious one but I want to help out everyone.

Well if you want a few bucks every day then this is a good method.

This method + job = more money.

Alext96 - June 5, 2011, 2:07 am

wow what if you have like 1000 slaves. That would be nice money there :P

Anyways thanks for the tutorial.

Portland Timbers - June 8, 2011, 4:07 pm

This method deserves a hard BUMP.

Shadow-twin - June 8, 2011, 4:51 pm

It's a decent methode, but isn't it a pain in the ass to keep switching inbetween your slaves, or did I miss something?

Sorry for this but I did NOT want to create another thread.

As for the reply, you select all your slaves "click the top slave hold the shift key and hit the bottom slave. then right click on any of them and click something along the lines of "open url" "navigate" something like that and post your adf.ly link."

alain57 - August 9, 2011, 3:08 am

i did not read this .. but making money the legal way after rating someone ... is kind of illegal ???

ok you'll not steal their credit card or do something more illegal, but using the computer of someone without their will, even to do somethin legal on it, will ALWAYS be illegal ?

BigG - August 9, 2011, 12:38 pm

Adf is the biggest bullshit ever.
