Thread: [FaceNiff, sniff cookies with your Android device!](#)

BlueYoshi - June 2, 2011, 4:05 pm

Quote:FaceNiff Android is a tool that allows you to sniff and intercept of the web session profiles that use the WiFi and with which phone is connected. E 'can hijack sessions only when not using WiFi EAP , but should work on all private networks (Open/WEP/WPA-PSK/WPA2-PSK). From the name of the application, it is clear that it is marketed as a specific Facebook application for Android. Unlike Firesheep , you can divert only 3 profiles. If you wanted to hijack multiple profiles, the application becomes a fee.

Quote:The application also requires a device with root privileges, but it seems compatible with a lot of mobile devices

Video demonstration:

[Video: http://www.youtube.com/watch?v=3bgwVM7t_s4]

The program has been testen on: Facebook

Twitter

YouTube

and Amazon

Tested on these devices:HTC Desire [CM7]

Original Droid / Milestone [CM7]

Xperia X10

Samsung Galaxy S

Nexus 1 [CM7]

HD2

LG Swift 2X

LG Optimus Black

LG Optimus 3D

and Samsung Infused

Download [Faceniff-1.9.2.apk](#)!

SIM-747559 - June 5, 2011, 5:51 pm

just found out about this today and it seems pretty cool! my local network is very secure but it still works! Once i am done testing im going to remove the vulnerability but would work awesome at coffee shops. btw if you kno firesheep it is basically the same thing. :)

Haters Ganna Hate - June 6, 2011, 6:45 pm

8 posts? I think its a trap tbh but ill see from the reviews

AndroidFan420 - July 6, 2011, 11:29 am

i use faceniff but the other day i logged on it into my neighbors facebook or so i thought an im lookin at mine s.o.b aint that some shit?

could that be some sort of mistake or are they now getn me?

and it works on the huawei ascend m860

AndroidFan420 - July 6, 2011, 11:29 am

sry dbl post now i need 25 charicters whoo hoo

sexysam - July 13, 2011, 8:37 am

Works fine on LG Optimus One too.

Depending sometimes need to be passive sometimes stealth. Probably due to WPA/WEP/No security.

asad1912 - July 17, 2011, 1:37 pm

@mastermrz

naw...its not a trap...

although im a newb too

but i actually have this...

down side

requires Root :'(

cromwell600 - July 26, 2011, 10:46 am

After I had noticed this program, I went to McDonalds, and tried it. :D I was wondering how many people don't take care about security. :D

El_Zilcho666 - July 26, 2011, 8:32 pm

(Jul 26, 2011 07:01 AM)Z3RO C00L Wrote: [\[CITE\]](#) could this be converted to work on nokia n900 running maemo ???Well it is just simply arp spoofing and session hijacking.

I whipped up a similar script that runs on linux (as long as you have arpspoof and a few other utilities installed) in about an hour for demonstration purposes.

sexysam - July 28, 2011, 5:05 am

I've ordered a N900 from a friend in Finland and should get it soon but it's a better "hacking" tool than facesniff!!!

"Backtrack" is working on N900, all the aircrack, ssh, arp spoof, ... name it, they almost all works!

jaredsk74 - July 28, 2011, 12:50 pm

Tested this out on my Thunderbolt and Xoom, works perfect on both devices. Website is [HERE](#).

methodbeat - July 31, 2011, 10:25 am

i've a nokia n900 and i've got gingerbread (2.3.3) on emmc

the app does install and works just till getting the usernames of people.

when i try to open them in web browser, just fails and redirects me to the facebook mobile login page.

"Backtrack" is working on N900, all the aircrack, ssh, arp spoof, ... name it, they almost all works! forgot to add Kismet, also works.

and recently air-crack-ng got an update for maemo client :D

i agree, n900 is the best device ever made for people like us xD

Rage Against The Machine - August 12, 2011, 9:05 am

this works on Optimus M also is there a way to also extract their password while the session is goin on?

vytor - August 16, 2011, 8:44 pm

Loaded on galaxy s phone and right away pulled a session cookie. Had to clear my cookies out so would not auto login to my account. This is what was probably happening to the poster that got on the neighbors and found himself. Nice app. Unlocked it and cant wait for updates!

kompton01 - August 18, 2011, 5:30 pm

works on htc hero also just a little slower

Cha0z_ - September 3, 2011, 9:32 am

Worked like a charm. I tested it with my htc wildfire in a public wifi and the results were gr8. :-)

I didn't touched any accounts :P I'm ethical hah

z3r0day - September 13, 2011, 9:04 pm

Used this today at my college on public wifi got alot of accounts, it works perfect. I am running HTC Evo with CM7 Rom. If you want the cracked version of 1.9.2 go to 4shared.com and type in Faceniff and its the first one.

S7DrPhil - September 17, 2011, 5:46 pm

Can't wait to go to some local hotspot around my area and try this out :)

Blad3 - September 28, 2011, 6:14 am

1.9.2 is not limited here?

or still limited 3 sniffs

and another question it will work if someone from another android will join to my same wifi address and will surf on facebook it will sniff this?

SIM-747559 - September 28, 2011, 7:01 pm

used this before and it works flawless!

Anyone know if it works for the G2?

I want to test this with it when i get time.

Xyr0n3r - October 6, 2011, 8:49 am

You could try droidsheep also it is similar to faceniff..

dilerim - October 7, 2011, 3:28 pm

You can add that it doesnt work on HTC Wildfire.

?Sakura? - October 7, 2011, 4:23 pm

for some reason, this doesn't work for Droid incredible . but droid sheep is good too. its like firesheep

The Protagonist - October 8, 2011, 3:43 pm

Look up DroidSheep!! Its way better than this :D although I keep both FaceNiff and DroidSheep and if you're pro there's Wireshark on android too.

Rocklegend117 - October 8, 2011, 4:39 pm

I just tried this app out. I found that it is the funnest thing to do in McDonalds or a coffee shop. Bit disturbing to see what people are watching in public but anyways its one of my favorite apps now! --By the way i tested on Droid 2. Rooted by Z4root and it works fine.

CallMeSteve - October 26, 2011, 12:11 pm

I'm using LG P990 and neither FaceNiff works nor DroidSheep does. Anyone using the same device and experiencing the same problems? I'm using CM7 custom ROM and my phone is rooted.

Detrox2010 - November 18, 2011, 6:43 am

force closes on samsung galaxy 5. hohoho.!

Chandler243 - February 10, 2012, 2:48 pm

Hey, Thanks for the link! I saw this posted on another thread, but couldn't seem to be able to find it. If your still maintaining this thread, you can add the Nook Color running CM7 CFW. Works perfectly for me, no issues what so ever.

Bulletproof OMG - February 12, 2012, 5:06 am

It works on my Optimus 2x too.

Its cool but it would be amazing if its possible to sniff Accounts from the Android Facebook App too.

z3r0day - February 13, 2012, 8:08 am

Being at college and getting on other peoples accounts are amazing and hilarious

bernardbear - May 22, 2012, 9:46 pm

thanks guys,but download link broken,i will try find another mirror using google :)

Executor - May 23, 2012, 1:43 pm

That looks quiet nice. :D never know its that easy! :O

Tnks!

Quien - May 27, 2012, 4:52 pm

>Install app on Kindle Fire
>Take your KF to starbucks
>Connect to WIFI and fire up app
>Sniff-sniff
>????
>PROFIT

Am I right?

Either way, seems like a really interesting application, thanks a lot for the share.

uR x S0NiiC - May 27, 2012, 5:55 pm

Link is broke dude! Try fixing it asap.

d1slact0r - June 5, 2012, 10:04 am

working link:

<http://adf.ly/9NaNu>

enjou!

dutchproducer - June 11, 2012, 3:34 am

Link is broke can you OM me for new one ?

kaliowned97 - November 14, 2015, 3:16 am

Awesome tool, can't wait to try it out, thanks!

WindowsOS - March 24, 2017, 4:44 pm

Could someone PM me a working link to a legit download? I'm always timid of infected files from hacking tools so I like to come here lol..

Peronasama - April 9, 2017, 9:17 am

i Cant download it. Fix the link please...

JimPanse - July 3, 2024, 2:15 am

Still working? Thanks
