Thread: [DeadAuth 0.2b Source](#)

DeadCode - June 3, 2011, 11:03 am

I keep getting PM requests for the DeadAuth source, so here it is:

<http://localhostr.com/download/K8zxv8Q/DeadAuth.zip>

I'm working on DeadAuth 2.0, so expect it within the next few weeks.

Why do you use the odd alternative PHP syntax?

Referring to your odd if statements and stuff

if (condition):

endif;

Why not if (condition) { }

Just my choice of syntax at the time. I'd use the standard curly braces way now.

I noticed, I'm looking all through the code and notice you can't make up your mind XD

x.x - June 3, 2011, 11:38 am

thanks,I was really in need of this

CaZzUaLLv3x - June 3, 2011, 11:50 am

nice release keep it up :]

E.T - June 3, 2011, 12:02 pm

Thank's :D

Can i use it to made a better and advanced system like yours one ? I will give you credits if you

want ^^

DeadCode - *June 3, 2011, 11:57 pm*

Yes of course. Use this for whatever, it's old and broken.

KOSS - *February 6, 2012, 11:15 am*

what is this i have no clue.plaese tell me thanks
