Thread: [\[RELEASE\]Ani-Shell v1.0--PHP Shell with features like DDos , Fuzzer , Mail\[/RELEASE\]](#)

lionaneesh - June 3, 2011, 8:46 pm

Hey guyz! ?

This is lionaneesh , and after 4 hectic days of coding i am back on HF with a PHP Shell for all!

Ani Shell v1.0

==[0x00] Introduction

Ani-Shell is a simple PHP shell with some unique features like Mass Mailer , A simple Web-Server Fuzzer , and a DDoser! This shell has immense capabilities and have been written with some coding standards in mind for better editing and customization.

lionaneesh - June 6, 2011, 4:22 am

WoW! 2 votes for it suckx! Please comment so that I could get idea how to improve it!

[H]ell - June 6, 2011, 6:17 am

Great job, you copied a public shell and put your logo on it.
?

How about you just post the code here in
[code] tags?

lionaneesh - June 6, 2011, 6:42 am

[code] tags?

Sir , You must have checked the shell before blaming me for coping a Public Shell! I have made this shell from scratch and if you want a proof simply check out the source! Thanks! Please let me know what you feel ! Secondly about the code! I wanted to keep it on sourceforge , so as to get the reviews and get more people to work on it!

[H]ell - June 6, 2011, 6:45 am

<http://privatepaste.com/a8821cceab>

Source code.

lionaneesh - June 6, 2011, 8:41 am

(Jun 6, 2011 06:45 AM)[H]ell Wrote: [\[CITE\]](#) <http://privatepaste.com/a8821cceab>

Source code.

Thanks and add me some rep if you like my project ! Really need that!

Orgy - June 6, 2011, 8:44 am

PHP Code

```
<?php
function getClientIp()
{
    echo $_SERVER['REMOTE_ADDR'];
}

function getServerIp()
{
    echo getenv('SERVER_ADDR');
}
function getSoftwareInfo()
{
    echo php_uname();
}
function diskSpace()
{
```

```

    echo HumanReadableFileSize(disk_total_space("/"));
}
function freeSpace()
{
    echo HumanReadableFileSize(disk_free_space("/"));
}

```

Did you seriously make these one-line functions?

Did you seriously make these one-line functions?

+1 for that ^^

Indeed if it's a one-line function you might aswell just write the original statement where you need it.

lionaneesh - June 6, 2011, 9:28 am

    echo HumanReadableFileSize(disk_total_space("/"));
}
function freeSpace()
{
    echo HumanReadableFileSize(disk_free_space("/"));
}

```

Did you seriously make these one-line functions?

I used functions just to make it easy to understand! and a more readable code! But yeah you have a point too!

Asking for rep huh? I don't think that's allowed.

(Jun 3, 2011 08:46 PM)lionaneesh Wrote: [\[CITE\]](#) Ani-Shell is a simple PHP shell with some unique features like DDoser...

Well... That's unique... And stuff...

Brunchy - July 9, 2011, 9:13 am

I thought that this seemed like a public shell.

Haxalot - July 9, 2011, 9:23 am

Nice grave digging... This threads over a month old!

erne - July 31, 2011, 5:26 am

Ilike nice job man really

next time please add in new version which sends me a all logs like ,space available on server and when server is rebooted in particular time interval. because i not see any shell have his feature Basically I want the server informati on my mail in every 10 hour time.

Is there any way I can do it,

?

Hey thanks erene for your reply..

Yeam i thought about addig this functionallity the method i think by which its possible is simply adding some cronjobs but for that we need r00t access which is hardly available on any machine! Second way was to make a python backdoor and send emails ! That can be done and am working o that only! Thanks again for the support! Bye for now.

(Jul 9, 2011 09:13 AM)Brunchy Wrote: [\[CITE\]](#) I thought that this seemed like a public shell.
It is a PUBLIC Shell!

..

DaL33T - July 31, 2011, 1:19 pm

Code in a shell shouldn't be easy to read.

They are supposed to not let server admins know what's in them.

erne - July 31, 2011, 6:08 pm

and i forget 1 more feature "the best if" send logs to my mail about directory where is shell like www.server.com/Ani-Shell.php if this done is amazing

Thanks

(Jul 31, 2011 01:19 PM)DaL33T Wrote: [\[CITE\]](#) Code in a shell shouldn't be easy to read.
They are supposed to not let server admins know what's in them.

always possible to encode yours self use online php encoders

better clean code then u can set shell password

Fuzed - August 5, 2011, 3:40 am

how the fuck do i even get on this shit?

pax666 - August 5, 2011, 3:46 am

<http://www.thehackernews.com/2011/07/ani-shell-v13-released-mail-bomber-with.html>

lol, shame on thn because they promote skid shit written like crap by a one hand, one eye, half a brain retard.

Teddies - August 14, 2011, 3:09 pm

looks legit yo nice.. more vouches would be nice though tbf

lionaneesh - September 12, 2011, 9:05 am

They are supposed to not let server admins know what's in them.

Yeah , make a clear source code for a shell is totally stupid.

Personally I encrypt the source of shell that i use.

blackshadows - October 1, 2011, 9:09 am

guys DDOS atack direct link plz emergency

ari12 - October 2, 2011, 3:59 pm

if someone can help me upload it, can they please pm me. thanks guys

Bloodsports - October 5, 2011, 12:21 pm

Great Job , Nice Stuff On This Forum , !!!!

NinjaHax - October 7, 2011, 6:07 am

Well graping sources jerking them together and babbling that you made your own shell !
thats pathetic!

anyways spend time on coding rather then you waste on grabing shits all around :)

lionaneesh - October 7, 2011, 8:57 pm

When and Where did i grab source from! Listen! Before Blaming me u better check the source! I don't know why you guyz! Comment without even checking what the code is! I don't wanna get in these flame wars ! ? , If you have some problem with my shell , You can use a little Sensible language! Flaming or Criticizing for no reason , I dont get it! Sorry for being a lil rude , But i cant take this anymore!
