Thread: [\[RELEASE\] ?Century 1.0 - MSN AIO? \[ALLOT OF FUNCTIONS\]](#)

Jeff. - June 5, 2011, 9:02 am

Century 1.0

Intro

Century is a new msn tool based on allot of other tools.

The idea for Century started on because of the fact that many applications like Century are too hard to use.

I started thinking 'That could be easier' and Century was born.

I stopped developing this application so that's why I'm releasing this here, there is still a update system build-in so I will probably fix bugs and be updating the application.

The application is not as stable as I wanted it to be but still it's a good program as I say for myself.

Century is made by me with sources from Viperx28 & Shiru so a big thanks to them.

Enjoy the application please say thank you if you downloaded this.

If you have any suggestions or problems PM me or post here. But please no stupid questions.

Timo - June 5, 2011, 9:20 am

im gonna try it m8,thans for making this shit.

brothaxkilla - June 5, 2011, 9:23 am

looks nice....nice sharing

Jeff. - June 5, 2011, 9:25 am

Not a problem guys. I hope you can do some damage with this haha. :]

Jeff. - June 5, 2011, 9:41 am

I tested this on my XP machine and I gave an error so I assume it's not working on XP

Timo - June 5, 2011, 11:31 am

oke,if you can,please port it to xp :D,that would be awesom.
btw,what is toaster?

Jeff. - June 5, 2011, 11:47 am

A Toaster is that you go 'Online' and 'Offline' for all your contacts.

OfficialNutty - June 5, 2011, 2:30 pm

how do u use the name changer/ name stealer?

SIM-676321 - June 5, 2011, 2:36 pm

1 word AMEZINGG thankx ~~!!

Jeff. - June 6, 2011, 12:02 am

(Jun 5, 2011 02:30 PM)sh1k4m4ru Wrote: [\[CITE\]](#) how do u use the name changer/ name stealer?
Name Changer : Basically just ill in the textbox with a new name for your msn

Name Stealer : Click one time on a victim in the contacts list of Century and it will fill the name of the victim in the textbox and and then click steal.

Timo - June 6, 2011, 8:14 am

keep this thread on tha top :D
so to all of you:
KEEP BUMPING!!

Jeff. - June 6, 2011, 11:00 am

Thanks for the b.umps man :] ! Enjoy the program everyone.

Aatto - June 6, 2011, 12:01 pm

Awh, I'm sure it works great, if only it was for XP as well. Judging by the posts, it works well, so good job. :]

same prob here m8.
but this guy deserves the top thread.
SO KEEP BUMPING!

Jeff. - June 6, 2011, 1:57 pm

@XP Users : I'm currently looking in to a XP version of Century I already preformed 2 tests but they both are terribly unstable and allot of functions don't work at all, the program will just crash because of the dll's.

Main reason for this is the communication with XP and MSN works very different. I will continue to look for ways to make this fully work on XP but as I said in the thread I don't develop this application as much as before and the XP compatible problem is getting a pain in the asz so I'm not promising anything yet.

@Topic : Enjoy guys for people who did got it to work :) !

Royalzm - June 6, 2011, 8:04 pm

BS theres guides that show you how to hide your virus right on this forum so im definety not downloading anything for jack s***!

Do you even look at my post count and rep.? Century is not a virus its a MSN tool so please move on and keep your hate away :]

Dignity - June 7, 2011, 9:16 am

Seems to work great, thanks man. But, I can't seem to get freezing working, lol.

Thanks for the feedback :]

To make freezer work the contact has to be offline and the freezer has to be on 24/7 to make the account frozen from use.

Dignity - June 7, 2011, 9:20 am

Thank you I will keep that in mind.

Y2KTHUG - June 7, 2011, 11:18 am

Guys Am sorry i dont understand. what does it do exactly? Can you describe for me in a layman's language what it's all about?

Thanks,

Y2KTHUG

This is a MSN Tool which you can use to basically troll your contacts with function build-in the application.

OfficialNutty - June 7, 2011, 12:05 pm

@Unflamed namechanger/stealer doesn't seem to work? after i put in the name and click steal, it just lags and types the name somewhere else rather than changing it to that name

There are some bugs with this yes, I noticed that if you focus only the program and WLM it will work perfectly but I know that there are a few bugs there and I'm trying to fix them all :]

Validify - June 7, 2011, 11:57 pm

I need a max unfreezer....Nice pc one though ;)

ants2795 - July 1, 2011, 9:32 am

What is the cen.exe?

When you open it cen.exe starts.

ignite2030 - July 1, 2011, 11:51 am

cool program, thanks for sharing.

Jeff. - July 1, 2011, 11:50 pm

When you open it cen.exe starts.
cen.exe is the main application

Century.exe is a compiled version of cen.exe and all the DLL's you can open Century.exe in winrar and see for your self.

ThaTorrentBoy - August 9, 2011, 4:53 pm

Nice release. Works like a charm.

Stevo - August 9, 2011, 7:32 pm

Looks nice, will try this out. thank u.

Gangster Disciple - August 14, 2011, 2:11 am

Bump for you :)

Nice release will be downloading soon.

collinsmika - August 17, 2011, 5:29 am

I have tried the method above and it isnt working. Any more ideas?

Jeff. - August 19, 2011, 6:07 am

I hope everyone enjoy the release and back for the feedback.

What method you can PM me about a question mate.

I Failure - August 19, 2011, 11:02 am

What does the "Freezer" actually do, since I knew some Script that froze people which made them unable to login in, what does this one actually does?

Ohh got it, tested on my other account makes me unable to login, haha well thanks that's what I needed great program although it has some issue's it gets stuck if wanna stop spam etc a little delay.

And please if you want, make an mute button if freezing someone it sound pretty annoys me, but it does it job very well you don't have to just asking.

Edit : At arround 1850 attempts, seems the sound went away checking if it's my speakers/system or program itself!

soving - August 19, 2011, 3:41 pm

Great program but is there a way to unfreez my e-mail because someone freezed me:(

What kind of account do you have then?...

Well I kept freezing, at 1850-1900 attempts my sound went off I did something and now my sound is fucked I have an idea it was due the program never had this before.

To be honest I used my freezer for over 10000 attempts for ALLOT of times and my sound is fine so I'd have to say that it's NOT my program that is causing this. Good day.

@sol Yes it only works on Hotmail/Live accounts. I PM'd you back about your question keep in touch with me.

Alright I didn't have any other explanation for it since I never had it before and after the use of this program it happened, but can you do my request to mute the sound anyways it's kinda annoying.

I'll be sure to look into it but I'm not promising this because of you can mute your sound too before you activate it, the function to mute it when starting is very offtopic of the whole concept which is being a MSN AIO.

If any of you guys find any other bugs or things that possibly could make me interested for implementation then PM me.

necdet_87 - August 20, 2011, 5:26 pm

thank you, i will try this => i hope it will work

Grimro - August 20, 2011, 7:54 pm

This is pretty rad. Thanks for the share!

SCRIPTED - August 21, 2011, 5:56 pm

Not bad :P Could do with fixing a few bugs and cleaning up the source altogether. Apart from that, Amazing!

tactt - August 21, 2011, 9:08 pm

Thanks a lot for the download. So far so good. I will be sure to give my thoughts on it, once i used it a bit more.

Tabaq - August 21, 2011, 10:34 pm

If someo1 tried this and it worked can u unfreeze my msn for me..

Pm me for email.

Looks very nice good functions goodjob.

Jeff. - August 23, 2011, 5:37 am

Thanks for all the feedback guys we are now on 265 downloads which is great !

Keep this up and I will keep updating it the best I can :) !

Karlstad™ - August 25, 2011, 11:23 am

Is this for Windows XP yet? I would love to try this :#
