Thread: [Compilation of tutorial threads & a complete guide for beginners in hacking](#)

Brilliant™ - June 5, 2011, 11:47 am

Index of contents

Introduction

Beginning

Understanding Network & it's structure

Anonymity

Programming

Miscellaneous Tutorials

Remote Administration & it's tools

Introduction

Hacking is an act of breaking into the computer networks in an unauthorized manner. The act may be legal or illegal; It depends upon the way of working of a hacker. The word "Hacker" does not refers to a criminal in any way. The word is used to refer a person with incredible intelligence who solves problems related to computers & computer networks efficiently, Within the guidelines of the law.

Hackers are of three types:

White Hat Hackers

Black Hat Hackers

Grey Hat Hackers

Both are completely different from each other. Black Hat Hackers are those hackers who hack illegally for the money leading to financial loss & damage of public resources/property. White hat hackers are the people who protect the systems from Black Hat Hackers. They work in accordance to law, So are called "Ethical Hackers". Grey Hat hackers are those hackers who are involved in both white & black hat activities.

Beginning

It's good if you choose hacking as your future because IT security has a higher demand of hackers & it'll probably grow. But before you go wrong way, Take a look at the following guides. They will

help you choosing the correct way:

Guides

[What Kind of a Hacker Should you Be? - White hat, Black Hat, or Grey Hat?](#)

[How To Be A Hacker-- The Ultimate Guide](#)

[\[TUT\] A Guide For Every Beginner](#)

[The Basics](#)

[The Art Of Human Hacking](#)

Understanding Network & it's structure

Before you start, You need to have a sufficient knowledge of Computer Networks. This is one of the most important parts which cannot be ignored at all. If you've already got basics of networking, Then you may leave this part.

Tutorials

[\[TuT\] Introduction to Networking \(Part 1\)](#)

[\[TuT\] Introduction to Networking \(Part 2\)](#)

[\[TuT\] Introduction to Networking \(Part 3\)](#)

[How To Port Forward \(Router & Modem Style\) -/ Noob Friendly -- Now With Utorrent!](#)

Anonymity

Before performing any hacking act, Be sure to hide your self. Anonymity is a great factor & plays a very important role in the hacking world. To do that more effectively you may use Proxies, Socks, VPNs (Virtual private networks). To know more about Anonymity, Proxies & socks please go [here](#).

Tutorials

[How to protect your identity online \[Part 1/2\] \[Extremely DETAILED\]](#)

[How to protect your identity online \[Part 2/2\]\[Extremely DETAILED\]](#)

[\[TuT\]Surfing Anonymously / Proxies\[TuT\]](#)

[\[*TUT*\]PortForward WITHOUT PortForwarding for your RAT using Free VPN\[*TUT*\]](#)

[\[tut\]How to connect to a VPN in windows 7 /vista*noob proof*\[tut\]](#)

[\[TUT\] How to spoof your MAC Address without using programs \[TUT\]](#)

Programming

Programming plays a vital role in hacking world. While it is not the very necessary part, But is Important. Programming makes it more meaningful. It can be implemented in various ways like :

Making Deface pages.

Identifying Vulnerabilities.

Making anonymity & stealth programs. (For example: Crypters)

Coding security programs with AI (Artificial intelligence).

To find & explore more about programming please go [here](#).

Tutorials

[\[HOT\]\[TUT\] How to make a simple deface page](#)

[\[TUT\] Choosing the Programming Language Best For You \[TUT\]](#)

[Baic Codes/Scripts](#)

[\[TuT\] Show Hidden Passwords! Simple Java-Script Code!](#)

Miscellaneous Tutorials

After you have made a completion with the steps above, You should now find no difficulty in practicing these tutorials. Be sure you go through each step wisely.

Misc

[How to hack with a cellphone Part 1/2 \[Extremely detailed\]](#)

[How to hack with a cellphone Part 2/2 \[Extremely detailed\]](#)

[\[TuT\] Hacking How Too: Key logging \[Noob Friendly Guide\]](#)

[\[NOOB TUT\] Getting the IP of every site! \[NOOB FRIENDLY\]](#)

[\[TUT\] Crack Windows password using Ophcrack \[TUT\]](#)

[\[TuT\] Turning Firef0x into Keylogger \[TuT\]](#)

[\[Tut\] FIXED Hacking any computer in LAN and get all his logins \[TUT\]](#)

[\[TuT\] How to check if a file is infected \[TuT\]](#)

[\[TUT\] Router Hacking For Network Exploration \[/TUT\]](#)

[\[TuT\] XSS - Tunnel // Control slave via. XSS Scripts \[TuT\]](#)

[\[TuT\]Spy-Net 2.7 Complete Tutorial\[TuT\]](#)

[\[TUT\] How to hack SpeedTouch Wi-Fi \[NOOB PROOF\] \[/TUT\]](#)

[\[TuT\] KonBoot & What Can You Do With It \[TuT\]](#)

[\[TuT\] Multiple Ways of Getting IP's \(For Beginners\) \[TuT\]](#)

[\[TuT\] Hacking a Website \(must see\) \[TuT\]](#)

[\[Tut\] How to make a dos shell \[Tut\]](#)

[\[Tut\]How to set up a shell booter\[Tut\]](#)

[\[GUIDE\] Using TCPView to monitor connections \(detect rats, malware\)](#)

[\[GUIDE\]\[Premium\] ? Infecting Methods & AV Targeting ?](#)

To find & explore more hacking tutorials please go [here](#).

Remote Administration & it's tools

Remote administration is the widely used type of hacking. While It can't be clearly considered as hacking but, We can Gain control on victim's computer through them so they are considered under hacking category. The remote access may be Authorized or Unauthorized. To explore more about RATs & learn more please go [here](#). Some of the most popular Remote Administration tools (RATs) are:

Cybergate

Poison Ivy

Cerberus

ProRat

Blackshades etc.

Tutorials

[\[TuT\] How To Setup Cybergate RAT 1.07.5 -- Port Forwarding -- Noob Friendly \[TuT\]](#)

[\[TUT\] Setting Up Poison Ivy RAT + No-Ip DNS + Pictures NOOB FRIENDLY \[TUT\]](#)

Note: If you have got any good tutorial for beginners & it isn't listed here, You may contact me so that I may update this thread with your thread's link under appropriate topic after reviewing it.

christiano - June 5, 2011, 7:17 pm

Nice Thread

Good for beginners

Thanks!

The GRim - June 5, 2011, 7:18 pm

Great Work Bro.

Keep It Up.

+Pirate - June 5, 2011, 8:16 pm

Great thread for new people. As in a previous thread, Possibly include a glossary?

seskanda - June 5, 2011, 8:27 pm

I like the layout of this thread, keep it up

cyberflexxx - June 5, 2011, 9:01 pm

every nice tutorial /Compilation thanks a lot

praveer - June 5, 2011, 9:28 pm

Awesome thread mate. Thanks a lot for this.

Regards

Praveer

Brilliant™ - June 6, 2011, 12:56 am

Thank you everyone. My pleasure.

Eclipse - June 6, 2011, 1:09 am

I really like this tutorial. I read it all, and going to start my journey of Hacking. :D

Eclipse - June 6, 2011, 1:09 am

I really like this tutorial. I read it all, and going to start my journey of Hacking. :D

Frankstare - June 6, 2011, 1:12 am

Nice list. But I know this aint much. But to fix my OCD on this page. it should be

White Hat

Gray Hat

Black Hat

:) if you get it.. because white... is the--- I wanna say goodest but thats not a word. Are the anti virus people. Gray hats to a little both black hats are just HACK HACK HACK DESTROY INFECT.

Br4v0 - June 6, 2011, 3:18 am

you got epic skills and you make alway awesome thread that attracts me and other members to it and i enjoy your post everytime. So, i would like to say that its a great contribution to HF keep it up

Aesthetics - June 6, 2011, 3:20 am

Really nice informative compilation. Bookmarked.

Developer - June 6, 2011, 3:28 am

You might want to add my tutorials to that list since Facebook threads are seen every single day.

ngit01 - June 6, 2011, 5:04 am

THIS ONE IS NICE, IT HELPS ME A LOT. THANKS FOR THE SHARE :D

RebornX - June 6, 2011, 7:19 am

Fantastic work you did there.

Keep it up bro!

MoonWalker - June 6, 2011, 7:54 am

Wonderful work. This thread should be stickied!

Brilliant™ - June 6, 2011, 8:49 am

Basics. - June 6, 2011, 8:52 am

This is a good tutorial. 10/10 and good job bro!

Water Antilope - June 6, 2011, 9:00 am

great thread but it would be nice if you add darkcomet rat in Remote Administration chose as you wish

Morbid Saint - June 6, 2011, 9:08 am

Awesome thread bro it's nice to see such quality threads, thanks you a lot. I rate that 5 stars.

Brilliant™ - June 6, 2011, 9:41 am

(Jun 6, 2011 09:08 AM)H4CKCID_BURN Wrote: [\[CITE\]](#) Awesome thread bro it's nice to see such quality threads, thanks you a lot. I rate that 5 stars.

Thank you. Just because I see many threads here in Beginner Hacking section regarding learning hacking. People Just make threads about that instead of using Search button. Also using that feature would take too much of time of newbies. So, I decided to take out time to make this one to help all the new members.

Joey Tribbiani - June 6, 2011, 10:37 am

I just briefed through the thread. I loved the layout. It's attractive and pretty easy to read.

Nice job. ?

Guess Who Is Back - June 6, 2011, 10:54 am

Nice thread i think this is better than the last one :P

Anonymous.7654 - June 6, 2011, 12:29 pm

Thanks for information,great Thread.

anas88 - June 6, 2011, 2:21 pm

Gret tutorial awd well explanation .

Brilliant™ - June 6, 2011, 9:31 pm

Thank you :)

(Jun 6, 2011 10:54 AM)Dalina. Wrote: [\[CITE\]](#) Nice thread i think this is better than the last one :P
Thank you, But which "last one" ?

14th - June 7, 2011, 1:49 am

Man, this is so cool...

I'm not done reading it's links so I'd subscribe to your thread first..

Thanks a lot for this detailed Compilation..

Lokeal - June 7, 2011, 1:53 am

This looks nice, Thanks bro Now to read every single guide head to toe.

Brilliant™ - June 7, 2011, 9:25 am

huh ? welcome.

raamee - June 7, 2011, 10:03 am

Wow bro. This is a great work . Really appreciated. This will help much for beginners and for all which will come handy.

Must be stickied IMO.! The best compilation ever.

ifido2020 - June 7, 2011, 10:08 am

Really a helpful tut... Keep rocking Brilli..

LiamLC - June 7, 2011, 10:13 am

good thread i hope you get sticky! =)

Brilliant™ - June 7, 2011, 7:01 pm

Hey thanks raamee, Nice to see you after long time.

The Dane - June 8, 2011, 1:03 am

Gr8 work mate :D

Keep up the damn good work! :D

Developer - June 8, 2011, 1:45 am

Good extra addons. Deserves a sticky.

Amzo - June 8, 2011, 2:09 am

Aww, my tutorial isn't up ~ An introduction to writing buffer overflow exploits

used.syringe - June 8, 2011, 3:54 am

very excellent thread.Thanks for share :)

Napsteren - June 8, 2011, 5:01 am

Its a nice thread yea, but not for beginners. Its the same problem again and again. You can't just jump right into hacking, you need some basic computer knowledge like how a computer works down at the hardware. You need to know Assembly, and how the CPU interacts with the other hardware.

See this thread, that shows you the basic from the start where all new hackers/coder should start.<https://hackforums.net/showthread.php?tid=1359753>

Brilliant™ - June 8, 2011, 9:00 am

Thank you everyone for your valuable feedback. :) I'm still waiting for your HQ threads, PM me the link & If I find them good, I'll add them into this & give you credits. Remember, I'll not add those threads which are related to Black Hat activities. ;D

Mr Kewl - June 8, 2011, 9:02 am

Hackers are of two types:

White Hat Hackers

Black Hat Hackers

Grey Hat Hackers

How fail :|

Three types?

Brilliant™ - June 8, 2011, 9:05 am

(Jun 8, 2011 09:02 AM)Kewl Wrote: [\[CITE\]](#) Hackers are of two types:
