Post the size of your botnet army, and what type

lulz here is mine
So far, all in america
I infected a school computer "30 more to go"
My laptop
and my neighbors computer using a net-bios attack
here is a pic :D

It's currently DBD, but i'm making my own source, so i'm going to update them.. I might even get rid of a few bot's still a bit unsure to be honest. It's taken quite a while to get to what it's at now. It seems to be growing well because i'm not ddosing every site that i can find.

But yeah, i'll update the source in around a week.. With something more fresh, and see how things go. Once it gets to 100k then i think i'll just give people bots for free lol..

Altho, not all of this is my work, around 60k is my work.. I just re-rooted some hacked boxes a while back, and took their nets too. :D

Meh.

/Want underground dbd's.

And to the OP, I suggest buying 100-1000 installs from someone with a bot that has auto spreading, go from there.

I am making a customized IRC that will have many features

keylogging

Very stable, the commands sent are less than 4 bytes

use very low memory

Flooding attacks are opened in a new procces, so the bot wont become unstable via DOS'n
can flood more than the default 65000 ICMP and TCP-IP "more than dark ddoser and xrbot

I want to add

Torrent Seeding ~ downloads & seeds torrents

Your Pal - March 4, 2010, 8:36 am

Because the highest option is 100 bots this makes me feel better :)

I have around 200-300 online at most times, so im guessing 500+ in total.

MisterDeepRot - March 4, 2010, 8:57 am

Had 200-300 online at most times and lost them all, so right now I have 0. Being slack setting it up again though even though I get a lot of downloads on my istealer from youtube vids.
