How to use:

1. Reference the binary to your project.

2. Type in this code:

```
Code Dim gener As New MaxCaptcha.GenerateCaptcha
```

```
gener.SecurityLevel = 3
```

```
gener.Generate()
```

```
PictureBox1.Image = gener.ResultingImage
```

TextBox1.Text = gener.ResultingString
The SecurityLevel property needs to be between 3 and 10,
This is how many lines there are.

Note* This is Version 1, I plan to add rotating letters, and randomize colors.

If you use this, Be sure to give credits to me please.

I got the idea from a thread, I made this source by myself.

Version 1.5:

Random Colors for everything

New Class "AutoDisplay", Displays text and stores it. Returned from Generate Function.

Enjoy Version 1.5!

ExitYourLife - June 5, 2011, 8:29 pm

Sounds nice, but can't someone just leak into process and see the strings currently being modified and make a auto(anti)-captcha system?

H4xer - June 5, 2011, 8:33 pm

Like I said it's 1.0, I'll add some sort of memory encryption later. Enjoy while no one knows what it is!

ExitYourLife - June 5, 2011, 8:36 pm

Also, please have a virus scan of your binaries'. Even the most trusted people need a virus scan on their binaries'.

H4xer - June 5, 2011, 9:04 pm

Done, Hope you enjoy the captchas!

Coleak - June 5, 2011, 9:14 pm

This is pretty cool. Saw a similar thread somewhere, but nonetheless thank you sir. Im sure lots of people will find this of use.

Cherish Life - June 5, 2011, 9:25 pm

Thank you very much for the share. Plan to use it! Appreciate it. ?

Make sure you set the SecurityLevel!

Also, PM me the code you used.

ra1d - June 6, 2011, 7:36 am

Amazing Share :)

I have added this thread to [VB.NET Learning resources \[Part 2 \]](#)

H4xer - June 6, 2011, 8:01 am

Version 1.5 is released, Check the main thread for details.

Spasilac - June 6, 2011, 8:25 am

i was looking for this a long time.

Thanks mate

H4xer - June 6, 2011, 8:26 pm

Version 2.0 will be out within 15 hours! I plan to add rotating randomly, random colors for all letters, more kinds of security!

tflo - June 6, 2011, 9:23 pm

Not bad, but sometimes I can't read the string. That's why you should have a set of separate predefined colours for backgrounds, shapes and the text itself. You should add other shapes as well like ovals and rectangles.

H4xer - June 6, 2011, 9:33 pm

That's what I'm planning in V2.0, But not predefined, Instead still random but, Checking for colors to close to one another.

H4xer - June 8, 2011, 8:22 am

I have version 2.0 ready(final version), New Thread:
