What it is?

This product is a VPS/Putty Server that can hit kids internet off for hours! Mostly used for Xbox Live, but can hit peoples home internet off, as well.

Why You Should Buy It?

This product can hit much harder than any Bot Net or Shell Booter, and can take down the internet of anyone you want for as long as you want!

@Influence - Why do I feel like you troll around the forums and flame every thread you see. Does that bring up your self esteem?

He's not trolling or flaming, he's stating that this Perl script will not hit harder than a 21k botnet. Which is obviously true.

Very Very legit nice booter and hits hard 10/10 for the booters I have owned

**Dooqii™** - June 7, 2011, 8:40 pm

Great booter, one of the best I have, I give it 5 stars...keep up the good work

**I'm Gone** - June 7, 2011, 8:45 pm

If you want me too vouch than you can hmu and I'll check it out.

**PrestigeWorldwide** - June 7, 2011, 8:47 pm

Good luck with sales, but please don't make a false claim that a VPS can hit harder than "any botnet". It obviously depends on the size of the botnet - a botnet with thousands of bots will hit much harder than a single VPS.
