Thread: [Help with Pligg bot](#)

jangedoo - June 7, 2011, 2:37 am

I'm making a pligg auto poster but stuck. When I try to submit thru my bot it says "Incomplete title or description" from the browser its no problem.

But the data posted is same from my browser and from the bot. but the submission by the bot is rejected every time... can some one help plz.

Here is form data from browser

Request header

Code POST /pligg/submit.php HTTP/1.1

Host: localhost

User-Agent: Mozilla/5.0 (Windows NT 6.1; rv:2.0.1) Gecko/20100101 Firefox/4.0.1

combo634 - July 27, 2011, 4:43 am

hey i am making bot too for pligg but

I stuck on first submit form when i have to enter url, all the time i got message "wrong security code"
jangedoo about which step you talk?

form looks like:

```
<input type="hidden" name="phase" value=1>
```

```
<input type="hidden" name="randkey" value="3836927">
```

```
<input type="hidden" name="id" value="c_1">
```

```
<input type="submit" value="Continue" class="submit-s" />
```

i send randkey without a problem, also compared post in firebug with what i have no difference but

still i am missing something
