Please post a virus scan and Xbox 360 modding? Could you please tell me what it is.

xRobG - June 7, 2011, 1:04 pm

It is that USB Modding, there are no viruses. The other programs have no viruses, they are MyneCrack and the aimbots are .dlls not exe's.

So you can even scan them yourself, scanning the rar doesn't work :S
