[b]About:

RELATED: <https://hackforums.net/showthread.php?tid=1354876>

I can take down almost any website that doesn't load balance aka have standard DoS protection, I can take down any home connection there is, and most Dedicated Servers, Game servers and so on.. I am also the most inexpensive DDoS provider there is on HF!! I also DO NOT USE unreliable Bots or Shells, I use my own dedicated servers hosting threaded udp / tcp sockets with over 1Gb/s output. IM NOT USING SKIDDY TOYS LIKE OTHER DDOS SERVICES

Price:

\$8 per hour

\$30 per day

Payment Options:

PayPal

Contact:

AIM: GBFuTuReee

Other Information:

Before you pay i will test the attack on the ip / website and make sure I can hold it offline before you pay, once you pay the full service starts!

Also HF Ub3r / l33t can negotiate the price per/hour but regular members can not. Thanks.[/b]

Nope... I'm doing it for \$1/hour. Probably more powerful too. I can do it for months at a time. ;D

Your spelling sucks. You're probably a 5 year old who found a booter. I never said I have 5 GB. Learn to read. You have no rep and no vouches.

Arron XR - June 7, 2011, 4:28 pm

to much lower the price or you wont get anything.

SyN Bigman - June 7, 2011, 4:29 pm

Your prices is pretty high an most ppl should know how to boot on their own.

You don't know SHIT how my DDoSer works.

Foh_Da_Win - June 7, 2011, 4:33 pm

First off Nmcats service isnt no Shitty shell booter etc. He can ddos for as long as he wants can you? his DDoS is fucking far more powerful than yours. And its cheap strong and reliable. How dose he lose money? he doesn't lose anything at all Oh and my rep is negative because of me being a dipshit and posting nothing relevant to different topics. But I have put out one useful thread. And Xr shell booters suck dick. Nuff said.

What are you even talking about. You make no sence. Please go take an English class.

Edit: Also good job. I can DOS<- up to how ever long I want.

Good job. DoS attack.
