Thread: [Scammed By Fraud \[ub3r\]](#)

?Sean - June 7, 2011, 4:32 pm

Scam for \$3, really?

Trade was \$3 for a FUD crypt + 50 bots.

I didnt recieve any bots and he said I made the bot wrong.

My bot works 100%! He sent me the "FUD" server and it doesn't even work.

PP Transaction:

I got no slaves or a crypt and he refuses to give me compensation.

PROOF I GOT NO INSTALLS:

[I had these before I bought them and gained nothing.]

Paranoid - June 7, 2011, 4:35 pm

Here bro, what's your MSN?

Add me "Hack@live.de"

.illogical - June 7, 2011, 4:37 pm

Roflmao, I'm sure you got the installs as Fraud does do his services.

Problems that occurred:

- Poor Crypt
- Botkilled

Need to realize alot of the install sellers on HF have botkilling customers, as much as they try its hard for them to track.

IMO its crypted wrong, cause I ran it in sandboxie and nothing appeared on my bots. I paid \$3 for a FUD Crypt + 50 installs, I really don't care about the \$3 but still its lame that he crypted it wrong and even if he did install it I ended up getting nothing cause of the poor crypt.

S-Moneyy - June 7, 2011, 4:41 pm

Let me make this clear. I don't sell bots, i sell executions of your server on bots. The only way you would not get your bots is if something was wrong on your end. Annd vital, i was very busy at the time and you would not give me a second. Due to my morals i probably would have helped you and resent/recrypted but you would not be patient. I then had to block you.

Gone-KaPPaH - June 7, 2011, 4:43 pm

Frauds on my server i watched them get send and guess what we use a hearing bot no botkiller just install and update

Lol? Nothing was wrong on my end, my unencrypted server worked perfectly. After you crypted it it didn't work. And I did wait for you to respond, like 20 minutes actually. Then You just never responded back. Im sure 20 minutes is enough time to reply, even if it is just one word.

Im not saying he's my bitch, I'm his customer. I expect to get what I paid for. Not more not less. If I paid for something and got nothing out of it what am I supposed to do? It was nothing wrong on my end.

I watch my server im pretty sure i saw installs running from the channel

Well even if he did install, I didn't get anything because his "FUD" crypt didn't work. So basically if he did install he installed a server thats FUD but does nothing at all.

Still the crypt can be said but not the bots i saw them get sent

I have never bought installs and got all of them. Nobody does.

eight - June 7, 2011, 4:54 pm

Frauds legit, I bought bots from him before. Your end bro.

Yeah but i didnt get any at all. Not even one.

(Jun 7, 2011 04:54 PM)eightworks Wrote: [\[CITE\]](#) Frauds legit, I bought bots from him before. Your end bro.

Nope, I did NOTHING wrong. My unencrypted server worked 100% then after he "Crypted" it the server didnt work and im guessing that he tried spreading the FUD one and i didnt get any cause the crypt didnt work

Oh and fraud is STILL ignoring me on MSN

B??mer - June 7, 2011, 4:57 pm

I think it's possible his crypter corrupted your bot. He should re-send the installs to your non-FUD bot. that would be the fair thing since it was HIS crypter that fucked you over.

Gone-KaPPaH - June 7, 2011, 4:58 pm

Just send your unfud botlink so youll quit your bitching

Thank you! Im fine even if I get the installs on the non crypted server but he's ignoring me on MSN...

Yeah I would if he would stop ignoring me.

S-Moneyy - June 7, 2011, 5:02 pm

Pengu - June 7, 2011, 5:02 pm

not surprised. he got \$20 out of me for a e-book that doesn't work.

Mytre - June 7, 2011, 5:03 pm

Huh, may not be the right place the post, but WHAT the fuck are FUD crypting, RAT, etc and what not. I've been lurking for like two days? One maybe, and none of you have ever stated this before xD just requests to purchase, or give,

Tunasty - June 7, 2011, 5:04 pm

I got around 400 installs the first time and around 100 the second time. Every time i got botkilled. Anyways, Fraud, dude just crypt his server again and give his installs. There you go problem solved :)

Stated what? I just want him to at least give me 50 installs with the NON crypted server link, and I also feel as I should be refunded the extra \$2 i paid for the FUD crypt since it didn't work at all...

Who's dumb here? ?

Here is what i think, all the freaking E-books here on HF are leached and the methods dont work. Just think about it, if you making a lot of money, would you tell your method out like this in public...?

You obviously didn't understand my post. It wasn't meant for you at all (at least not technically) I'm simply asking what the Hell you're all talking about, because I don't know what a RAT, bot, FUD, crypting and what not is.

Doesnt that mean that you shouldn't be on this thread then?

I am very trash - June 7, 2011, 5:07 pm

The real problem is why you are making a scam report if its 3 dollars. Lets get real.

eight - June 7, 2011, 5:07 pm

I would take your thread seriously, but your avatar stops me from doing so.

Read Fraud's rep, it says he's a legit seller.

RHCP - June 7, 2011, 5:08 pm

Google it or search it. Not a big deal. and as for the deal yeah darkcomet is a bitch to crypt, should

have tested the server before the installs. im sure it wont be a problem with Fraud, its just 50 installs..

Like I said I don't care about the \$3, I'm posting this because of the lame customer support, ignoring me afterwards, and cause he could do this for a higher amount to others.

Vital, I seen where you said OnlineCrypter won't work for you. It's as simple as changing options. Idiot for letting someone crypt for you.

Fraud, you should've sent him a test install or two. He says the crypt corrupted his bot, and you are the one who crypted it. You should send him more bots.
