Very nice and clean site. 5,- per month is very cheap:) I'm definitely gonna use you're services.

Edit: 1 thing i noticed though. Ur pricing is a bit weird. You ask 10,- for 3 months, and 50,- for 12 months. This means that if you buy the 3 months package 4 times it will cost you less..

4 3 months = 40
1 12 months = 50

If you buy the 12 months you should get some discount right? ore at-least pay the same price..

A 1 month subscription of unlimited scans is \$5. There is no point in having \$1 payment options since you would have to pay five times to buy a month subscription.

I am using this for few days and got to say that I love using it. Average scan time is less than 20 seconds and the price is also less.

Vouch!

BTT: the site looks awesome

BTT: the site looks awesome

Because Scan4You and ScanWith.Me do not submit their results to the anti-virus companies, whereas VirusTotal does. As well as several other free anti-virus scanners online. I sincerely suggest you actually read into this material rather than randomly challenge all with their business propositions.
