Thread: [\[Video TuT\] Make glowing lines in Photoshop CS5 \(REALLY SIMPLE\)](#)

xCR1Mx - June 8, 2011, 12:58 pm

This is my first tutorial. I am really sorry for the quality and the mistakes :/ ?

Your outcome should look like this... You can add alot more tools to it and it will look way better than mine.

I tried to follow your tutorial and it's hard to see your cursor.. but my issue was that my pen tool wasn't on it's own layer.. but my result was still horrible, haha.

it doesn't look like it's glowing.. try to use outer & inner glow instead of stroke. ?

Not bad downloaded for future reference but too bad it doesn't have any sound.

Ha cool tut. Hot girl too.

?

sexy.jc™ - August 3, 2011, 11:34 pm

Nice and good tut!!

Next time use HYPERCAM 2 to record. IT's free.

Nice tutorial, though it was hard to see I figured it out. Was confused how you made the colors into the pentool but then toyed around and got it. Might be confusing for some noobies like myself :P

Nice tut,
also, she might be one of the hottest girls I've ever seen :)
